

APPROVED SOCIAL SCIENCE & HUMANITIES (SSH) ELECTIVES

This list is applicable to the 2009-2011 General Catalog for students in Civil Engineering.

General requirements: Minimum of 12 credits chosen from the following list. A minimum of six (6) credits must be at the 200 level or above. The intent is that the University's U. S. Diversity (DIV) & International Perspectives (IP) requirements (minimum 3 credits each unless waived) will be included within these 12 credits. If either of the DIV/IP requirements are waived, the 12 credit total must still be met.

Notes: ¹Indicates course may meet the “U.S. Diversity Requirement.”

²Indicates course may meet the “International Perspective Requirement.”

The student is responsible for confirming that courses chosen to meet these requirements are on the official university approved lists (see below).

U.S. DIVERSITY and INTERNATIONAL PERSPECTIVES REQUIREMENTS

The University U.S. Diversity and International Perspectives requirements may be met using several approaches as described fully in the Registrar’s designated webpage (see below). Most students will complete the requirement by selecting appropriate courses in the social science or humanities areas. Many such courses, which might be used to simultaneously meet your SSH requirements in Civil Engineering and the University requirements, were identified in the preceding elective list.

Please refer to the web page below for complete guidelines and lists of currently approved courses that may be used to meet these requirements.
