Dear Erector Set Contributors,

Fall 2003 finds the Construction Engineering program with six faculty members for the first time in more than 10 years. We are, by far, the largest Construction Engineering program in the nation with 338 students as of Spring 2003 (Purdue University is next in line with 133 students according to ENR October 29, 2001). And our design build Associated Schools of Construction student team won first place in the national competition. There are lots of exciting things to mention, so read on for the details.

The construction industry is providing extra funding to the Construction Engineering program through the Construction Engineering Fund for Program Excellence. We are using this funding to teach extra lab sections and extra classes as well as support our Associated Schools of Construction student competitors. Some funding also goes into building speech and writing skills and supporting future fundraising efforts. A subgroup of our industrial advisory board monitors the use of the funding -- this assures that the funding is being put to good use. Last year the funding was used to teach six extra lab sections and one extra class. For example this means that instead of having one Cost Estimating lab section with 36 students we had two with 18 students and instead of having one Contract Documents class with 80 students we had two with 40 students each.

Why are class sizes so high? Compared to many construction and civil engineering schools, we have been very successful in recruiting new students in the last few years. Meanwhile, state budget shortfalls have prevented hiring as many faculty as we would like. Our high enrollments and industry and alumni support have resulted in the hiring of some new faculty and staff. I will start out by introducing the new people and telling you a bit more about the others who have been with us for a while.

Our newest faculty member is Kelly Strong who joined our faculty in January of 2003. He has a Civil Engineering Degree from Iowa State University and seven years of experience with Opus Construction and Knutson Construction in Phoenix and Minneapolis. While he was working for Opus he received his MBA at St. Thomas University in St. Paul, MN. Next he earned a PhD in Strategy and Organization Management at University of Colorado, Boulder. He came to us from Michigan Technological University where he held a joint appointment between the Business School and the Civil Engineering Department. Several of our alumni and industry partners have mentioned the importance of the business side of Construction Engineering; Kelly's background will help us give the proper emphasis to this area.

Larry Cormicle (ConE '78) also joined our team last August. He came to us from Walsh Construction Company in Chicago, where he last managed the construction of a 56-story, concrete-frame high-rise condominium building just north of the Loop. Not only does he have 24 years of construction experience, but he also has 12 years of teaching experience with construction management night classes at Triton Community College in the western suburbs of Chicago. Larry has been teaching ConE 322 Construction Equipment and Heavy Construction Methods; ConE 351 Electrical and Mechanical Systems; ConE 441 Planning and Scheduling; and ConE 221 Contractor Organization and Management. He is also our AGC Student Chapter Advisor and coach of the ASC Student Teams.

Rhonda Wiley-Jones just joined our staff as our first full-time professional academic advisor, replacing Jamie Beyer who is now training for the next Olympics in San Diego. She has a variety of teaching and advising experiences and a Masters Degree in Higher and Adult Education. In addition she became a nationally certified firefighter while developing curriculum for Fire Protection Publications at Oklahoma State University. Rhonda advises students in their freshman and sophomore years so she can focus on the intricacies of navigating physics, calculus, chemistry and other courses that students take in preparation for their Construction Engineering courses. She has particular interests in how students can learn more effectively.

April Fanksain recently joined our staff as a secretary to enhance our ability to support students and to edit the erector set. She works half days in the mornings.

We have six faculty and staff members who continue to work with us:

Todd Sirotiak teaches our Capstone Design Class (the last ConE class that students take in their senior

year to integrate everything they have learned in separate classes). He taught our graduate class in Project Management and Cost Estimating and was also our DBIA Student Chapter Advisor.

Russell Walters is teaching our Electrical and Mechanical Systems Class and our graduate class in Information Technology. In addition he advises our National Electrical Contractors Association and Mechanical Contractors Association of America Student Chapters.

Ed Jaselskis is teaching Cost Estimating and our graduate class in Preconstruction Management. He advises the Sigma Lambda Chi (Construction Honorary) Chapter and is currently serving as President of the ASCE Construction Research Council and Editor-in-Chief of ASCE Journal of Construction Engineering and Management.

Ron Roth is celebrating his 27th year as a "Temporary Professor," by far the most permanent of the staff. Last year he taught ConE 241 Construction Materials and Methods and ConE 340 Concrete and Steel Construction. He has retired from his engineering practice and next he is only going to teach ConE 340 so he has more time to enjoy his retirement.

Steve Bell (ConE '81) Teaches ConE 245 Contract Documents for us on the side while he leads a Midwest-based business called Leading Change, Inc.

Our secretary Kathy Sturtevant tries to keep track of us, the students, alumni, and recruiters-- and does a great job. She is looking forward to having extra help from April so we can do more with the erector set, students and alumni.

We now have two PhD students with industry experience: Kevin Behling (ConE '90 [BS] and '92 [MS]) and Augusto Canales.

Kevin comes to us with over ten years of experience, mostly with Ringland-Johnson Construction Company in Rockford, IL. He is assisting us in teaching a number of course and laboratories. For some of our larger labs, he has been taking half the students and teaching them while the regular instructor takes the other half. I doubt there are many programs that can boast of offering laboratory assistants that bring ten years of industry experience to their job. Many of Kevin's efforts are underwritten by the previously described Construction Engineering Excellence Fund.

Augusto Canales is a Professor from Instituto Tecnológico y de Estudios Superiores de Monterrey, (Monterrey Tech), arguably the finest engineering school in Mexico. He has 20 years of construction experience, owned his own construction company in Mexico for 13 years and has been teaching with a Masters Degree since 1997. Monterrey Tech is encouraging all professors to obtain a PhD degree and Augusto chose to come to Iowa State University to earn his. He is developing English as a second language courses specifically for Hispanic construction workers in an effort to ease their integration into our workforce. Please contact us if you have an interest in this issue.

This completes my second year as Professor-in-Charge of the Construction Engineering program. I have been enjoying the opportunity to work with our staff, both new and previous members. The high level of alumni support is one of the more gratifying parts of the job. I have been teaching a professional development course and leading a research effort to provide better scheduling methods for urban freeway reconstruction projects. We are using the \$426 million, 6 year reconstruction of I-235 through downtown Des Moines as our case study site for the research project. For me, the highlight of this academic year was being named the W.A. Klinger Teaching Professor. This is the first endowed Professorship in the Construction Engineering Curriculum and was made possible by the wife and the decedents of "Bill" Klinger, a Sioux City Contractor who was instrumental in founding the Construction Engineering Program at Iowa State University. The naming ceremony was held at The Knoll (President Geoffrey's house) and was attended by students, faculty and industry representatives. The student's and industry's enthusiasm made a good impression on Geoffrey. We have included the press release and a reprint from the *Iowa State Daily* that gives more details.

We are proud of the accomplishments of our students this year. In Iowa State University tradition, these student activities are truly student led with minimal faculty input.

The Associated Schools of Construction (ASC) competition went well for Iowa State University. Student teams of 5 people respond to RFP's in 18 hours with a written proposal and within 24 hours after the written proposal is submitted they give a presentation in support of the proposal. We entered three teams in the regional competition: Commercial Building, Design-Build and Highway and Heavy. The Commercial and Design-Build teams won first place, while the Highway and Heavy team won third place. The two first place winners advanced to the national competition in Dallas, TX. Design-Build performed flawlessly at the national competition and won first place. Although the Commercial Building team did not place, it won high praise from the judges.

Our AGC Student Chapter was very active having monthly general meetings with guest speakers, service projects, field trips, and other activities. Several of the meetings had more than 100 students in attendance. The AGC student chapter organized the VEISHEA float which won second place and the Banquet which had attendance of more than 200 people.

Our Design-Build Institute of America Student Chapter had some smaller meetings at member offices and one larger standing-room only meeting. From my comparative discussions with other universities, this is a high level of activity for DBIA student chapters.

Sigma Lambda Chi, our student honorary chapter, has been an active partner in recruiting new students by leading "Hotel Lego" activities for prospective student groups grades 7 to 12 who visit campus; and by meeting with prospective high school and transfer students with our advisor. Participants attempt to build a Lego "Hotel" structure with and without planning and compare their times. This opens up all kinds of opportunities to talk about what a construction engineer does and how they can add value to the construction process. We are happy to share this activity with alumni who can help bring more young people into the construction industry.

Our National Electrical Contractors Association and Mechanical Contractors Association Student Chapters took advantage of their smaller size to have more intimate meetings with contractors, sometimes around a conference table over pizza.

We had alumni gatherings in Des Moines, Omaha, St Louis, the Quad Cities and Kansas City since we last published the erector set. So far this year we are planning gatherings in Minneapolis, Denver and Kansas City. These gatherings are usually an hors d'oeuvres reception where people can gather and talk and an update on the latest news from Iowa State University. Please come if we have one in your area; it's a nice chance to see you and other Iowa Staters. If you can help us have one in your area, please contact us.

Sincerely,

Charles Jahren
Professor-in-Charge
Construction Engineering

August, 2003

Dear ConE Alumni:

I am your new editor for the *Erector Set*! I started in Construction Engineering as a half-time secretary on May 7, 2003 and jumped right into this project! I have made a few changes in the book which I hope you like, and I have a few ideas for next year also. If you have further suggestions for the Erector Set or how to get more participants be sure to send me your comments and suggestions (some of you have already and I thank you!). The best way to reach me is by e-mail at twerp@iastate.edu.

I have been with Iowa State University for 13 years now and the last 12 years were spent with the same department in the College of Agriculture. I have to admit that when I came to Construction Engineering I thought the "content" of the job might be a little dry and boring. After all, in agriculture you are at least working with living plants and animals! But after reading your submissions to the Erector Set I am happy to find out I was mistaken! Your jobs all sound very interesting and I have learned a lot about the construction field just by reading what you have sent in.

On a personal note, I am married to Roger and our son, Bryce is 11 now and looking forward to starting the sixth grade. We live on a small acreage in rural Boone with our two dogs and 11 cats (soon to be three dogs when my mother's dog comes to live with us).

I looked forward to having a lot more free time when I began this half time job, but something always seems to fill my day after I get off work. It makes me wonder how I was able to work full time for all these years!

I have really enjoyed putting together this latest edition of the *Erector Set*, and getting to know you alums and I look forward to meeting and getting to know more of you in the future!

Sincerely,

April Franksain

6605 Sally Ln
Edina MN 55439
August 8, 2003

Dear Con E Faculty and Alums:

I was very pleased that April Franksain and Chuck Johnson asked me to put a letter in the Erector Set again this year. Jim Rowings and I weren't far enough along to retire when we left so we didn't get the emeritus status.

All is well here in Minnesota. We are moving closer to retirement. Actually, retirement for me will mean working half time at my company (CC&I, Ltd) then half time on one of my other interests. The other big interest is still hockey. I am very involved in developing hockey players at the high school level in the upper midwest.

My wife, Susan, will be on the ISU campus a number of times this fall as she is curating a Russian painting show at The Brunnier Museum. If any of you get a chance between August 26th and January 4th, stop in at the Scheman Building and see it. It's a fascinating exhibit. We are also collectors of Russian artists. What's an old engineer and hockey guy doing collecting art!

My son, Matthew, is now engaged, with a wedding coming next February. We are very pleased and look forward to possible playmates (grandkids) from the newly weds down the line.

I hope to hear from some of you. Any time you are in the Twin Cities vicinity, give me a call (952-944-7018).

Have a great year and keep the Con E banner flying.

Jim and Susan Russo

15 Fenchurch Lane
Bella Vista, Arkansas 72714

June, 2003

Greetings from Arkansas:

News of the Con. E. program informs me that all is well with the curriculum. I keep reading of honors and awards and it is most impressive. The program has grown and matured by leaps and bounds from those first tentative starts in the early sixties. It makes me grateful to know I was connected to the best construction engineering program in the country.

Ro and I are still enjoying life in northwest Arkansas although Ro has had some fairly serious health problems. We're trying to work our way through it and hope we're making progress.

Wishing all of you good fortune and good health in the year ahead!

God Bless,

Thomas C. Jellinger
Professor Emeritus

June 19, 2003

Telephone: (813) 910-8807

E-mail: iward001@tampabay.rr.com

Greetings to Con E Faculty, Alumni, Staff and Students:

I see there will be another new editor of the Erector Set this year. You will have your work cut out for you, April, if you match or exceed the outstanding publication put out by Kathy for 2003. I am sure you will, and I look forward to receiving it. John Russo, it was good to read about you and Susan in the 2003 book. The years do go by in a hurry. The last of our four grandchildren graduated from high school this spring, and already she is a student at the University of Central Florida. They do grow up in a hurry!

As always it appears that the curriculum and graduates are doing well. It is good that there are always people to carry on when the old ones depart for other activities. Retirement is still being good to Phyllis and I. We ended our RV camping experiences last summer, and we are down now to only a car. Fortunately, we are still able to enjoy that. We are going to leave shortly for a trip to Iowa.

There is construction everywhere in Florida. It appears that it is a good field to be in. Our nation has recently suffered through another war and there seems to be no end of turmoil in the World. If only all people could live in Peace how wonderful it would be. I have fond memories of my time at Iowa State and all of the wonderful persons we associated with while there. Tom, we hope to get by and see you and Ro again one of these times on our travels through Arkansas. Phyllis has a sister in Harrison, AR that we visit occasionally.

We stay busy, eat well, and pretty much enjoy life in our retirement community. We wish you all well being and happiness. Keep up all of the good work in the Curriculum. You have many things to be proud of. The curriculum layout sheet still looks very familiar. I still remember how hard it was away back fitting all of that information on one sheet. It seems to have been worth it.

My Best Regards to You All,

Ira J. Ward
Associate Professor Emeritus

1311 Wisconsin Circle

July 1, 2003

Dear ConE Alumni and Friends;

Life has not slowed much since retiring the end of September 2001; it is a myth that one has lots of leisure time when retired. However, our busyness is mostly of our own choosing. It is so easy to get involved in numerous activities when living in Ames.

Iowa State University is still a part of our lives: men's and women's basketball, football, club baseball, retirees functions, College for Seniors classes, ConE tailgates, and "first Wednesday" lunch with the CCEE secretaries—must keep abreast of Town Engineering activity.

Travel has been mostly short, one-and-two day trips in-and-around Iowa. With elderly parents (94 years and living in their own home), we don't travel too far away or for too long a time. (Jerry's mother died last January at age 93.) So travel to Alaska via automobile is on hold for now.

There have been several Iowa trips this past year, i.e., Manning, Iowa to see the authentic 1660 hausbarn that was disassembled in Germany and reassembled in a German heritage community, Pella to see the only working windmill in the US, and Northeast Iowa parks to see fall leaf color and do some hiking. Before last fall, I had never toured the Salisbury House in Des Moines. There are lots more things yet to do and see in Iowa.

Last January, both our sons were home together for the first time in ten years; Air Force life had kept them apart in different parts of the World. Jim, retired Air Force, works in Anchorage for a petroleum company refueling tugboats, trains, and, most importantly, construction equipment. Jeff just returned to Oklahoma City following a year tour of duty in Korea with the Air Force. Mid-July, we will drive to Oklahoma City to pick up our two grandchildren to spend a couple weeks with us here in Ames.

So with a couple volunteer commitments and church activities, there is no time to be bored. Life has been good to us this past year; hope you can say the same for yourselves. I am looking forward to receiving the 2003 *Erector Set* to learn what is new with you.

God bless,

Donna Schradle

July 2003

Dear Alumni and Friends;

The previous year included many memorable moments from the high-rises of Dallas, Texas to the green grass of Central Campus. The Student Chapter continues to build and shape its members into successful role models and leaders, not only here at school but coast-to-coast. We are grateful for your involvement and support in our many student run activities and national competitions. I believe our chapter has assembled a sturdy leadership board bustling with fresh ideas and focused towards a common goal of Student Chapter of the Year.

In our quest for Chapter of the Year, we plan to build on previous successes while continually exploring innovative and exciting opportunities. We look forward to working closely with our Alumni and the Industry not only to create many informative and enjoyable experiences for our members, but also collection of Construction Engineers ready to take on the challenges that await them.

Our chapter members have encountered countless educational opportunities during their many summer and co-op experiences and are looking forward to learning from them. One of our goals for the year is to improve the AGC community on campus. We plan to provide various opportunities for members to interact, building a foundation for success. With this solid foundation, our numerous outreach and chapter activities will be energized with a sense of community and fellowship.

Building from this foundation, I am looking forward to providing many educational and entertaining opportunities for members and Alumni. We are looking forward to the annual AGC Tailgate October 4th vs. Oklahoma along with the Spring Awards Banquet and golf outing, an Alumni favorite. We plan to bring in many informative speakers, provide multiple opportunities to experience unique and exciting construction projects and offer ample time to relax and share laughs at Friday After Class, Wednesday For Lunch or year-ending camping trip.

I am excited to take on these challenges as another school year approaches, and with the support of Alumni, I have an unwavering belief that we can accomplish our goal of Student Chapter of the Year. If you would like to be involved with the chapter, know of educational opportunities or provide support of the chapter in some other manner, please contact me. You can reach me via email at bwessels@iastate.edu or fax at 1-515-294-3845. Also, check out our new website at <http://agc.n3.net>.

Thanks for your continued support of our program.

Sincerely,

Brian J. Wessels
2003-2004 President
AGC Student Chapter

AGC participated in the 2002 VEISHEA Parade and received 2nd place on their float!

Dear Alumni and Friends:

The Design Build Institute of America ISU student chapter has had another year of growth in 2002-2003. Students from Construction Engineering, Civil Engineering and Architecture have gathered once a month to listen to speakers talk about Design-Build in the industry. More students are interested in learning about this popular building method and have gained insight into this topic by attending the meetings.

The cabinet members this year made a goal to organize the student chapter. This would involve making binders for all the positions which would include descriptions of their job titles, a contact list, and other topics included to make the organization run smoothly.

This fall DBIA had a couple of meetings and social events. One of the most memorable meetings was going to Story Construction in Ames, IA and meeting with one of their Architects. Members learned about Design-Build contracts, estimating and scheduling. Another popular event for the fall semester was the Friday After Class at Pizza Hut. Students were able to eat pizza, hang out and socialize with other design build members. In order to eat the pizza students needed to bring a canned food item and donate \$2. The money received helped purchase turkeys and other food for four families during Thanksgiving. All members were happy that they were able to contribute in providing families a Thanksgiving meal.

The first meeting for the Spring semester was hosted by Peter Kiewit & Sons. During this meeting the chapter had an ultimate high in attendance as students were crowded together to listen about the projects Peter Kiewit has worked on. Peter Kiewit gave several examples of projects that used the design-build methods and the management style they used to complete these projects. Another anticipated meeting was with Ryan Companies, whom spoke about the IMAX theatre in Cedar Rapids, Iowa. Once again the chapter donated canned food and money to the Grand Avenue Baptist church. The DBIA also had social gatherings at the Pizza Pit where members could enjoy each others company while eating free pizza. The year ended with the elections meeting where members elected candidates to fulfill the positions for the 2003-2004 cabinet.

The DBIA student chapter had another successful year in giving students a chance to learn more about how architects, engineers and contractors all work together to create a finalized project. All students were able to gain more insight from professionals in the area and were also able to make relationships with them and other students.

Sincerely,

Leslie Peterson

Associated Schools of Construction ASC Competition

As in previous years, the ISU Construction Engineering program sent three student teams to participate in the regional competition for the Associated Schools of Construction Region IV. In this competition, the student teams are given real construction projects in the area of: commercial, design/build and heavy highway construction. The results speak for themselves, with two teams winning the region IV competition and then competing in the national competition in Dallas and winning one national championship.

Two ISU Teams Win ASC Region IV Construction Contest Other ISU Team Places Third

Two teams of ISU construction engineering students won first place at the Associated Schools of Construction Region IV Competition that was held in Nebraska City, Nebraska on February 8, 2003. One team competed in the Commercial division and the other in the Design/Build division. The winning commercial team members were: Derek Hemphill (team captain), Barry Determan, Alexis Coen, Tony Fucinaro, Hilary Jensen and Grant Sjostrom. The winning design/build team members were: Nicholas Obbink (team captain), Joe Tripp-Rieks, Jodel Fesenmaier, Ryan Hawkins, Jay Wiederholt (architecture) and Leslie Peterson. The commercial team responded to a mock request for proposals for a \$60 million medical center that would be constructed in Fayetteville, Arkansas. The design/build team responded to a mock request for proposals for a municipal criminal courts and law enforcement complex that would be constructed in McAlester, Oklahoma. Both teams were allowed only sixteen hours in a hotel room with four computers, two printers and a plotter to develop a thirty-five page proposal, with the design/build team also producing twelve architectural design computer drawings. Thirty-five hours later, both teams made a presentation in support of their proposal to a group of industry judges who were involved in construction of the actual project. This is the sixth consecutive year that ISU's design/build team won this first place award.

In addition to design/build and commercial divisions, the contest had a separate division for heavy highway construction. This ISU team placed third in tight competition out of a field of eight schools. Team members Ryan Cheeseman (team captain), Justin Clausen, Justin Lechtenberg, Ed Cox, Clint Rhoads and Nate Franje developed a proposal for the construction of over 700 deep concrete foundations for the replacement of a portion of the elevated mass transit rail system (Blue Line) in Chicago.

ISU faculty member Larry Cormicle, (ISU Con E 78), coached all three teams during the competition. Twenty teams from nine universities competed representing the states of North Dakota, Minnesota, Iowa, Nebraska, Missouri, Kansas, and Colorado.

Iowa State Wins National ASC Construction Competition ISU Sends Two Teams and Brings Home One Championship

Two Teams from ISU's Construction Engineering Program competed on April 2nd -5th, 2003 in the National ASC / AGC Student Competition in Dallas, Texas. One team competed in the Commercial Building Division and the other in the Design Build Division.

The Design Build Team consisting of: Nicholas Obbink (team captain), Joe Tripp-Rieks, Jodel Fesenmaier, Ryan Hawkins, Leslie Peterson and Jay Wiederholt (architecture), brought home the National Championship for the second time in the four year history of the National Competition. This honor was added to the undefeated mark at the regional competition. For their project the Design Build team was faced with an Agricultural Research Facility with a price tag of 54 million dollars to be located in St. Louis, Mo. The team had 18 hours to design both the architectural aspects of the building, along with the structural and mechanical systems, schedule the construction and put together a cost estimate for the facility. The final proposal consisted of well over 40 pages of written material, 24 architectural drawings produced both by hand and computer and 12 pages of technical estimates and schedules. The following the day, the team presented their solution to the project to a panel of industry judges that worked on the project. For their win the Department of Construction Engineering will receive a gift of \$3000 from the sponsoring company along with engraved plaques and watches for the team members.

The Commercial Team consisting of: Derek Hemphill (team captain), Barry Determan, Alexis Coen, Tony Fucinaro, Hilary Jensen and Grant Sjostrom came up a bit short in their bid to bring home a title. The commercial team had a similar time frame to bid a \$21 million Middle School project in New Albany, Ohio. The commercial teams received rave reviews on their performance, but were not one of the top two teams in the eyes of the judges.

ISU faculty member Larry Cormicle, (ISU Con E 78), coached both teams during the competition. Twenty one teams from seven regions representing the entire U.S. competed in the three divisions.

All three teams represented ISU with the highest level of professionalism and skill. They all make us very proud in their accomplishments and their national recognition.

The schedule for the ASC Region IV competition has been changed to a fall date of early November 2003, with the national competition remaining the same with an early April 2004 date.

JAHREN APPOINTED TO ENDOWED PROFESSORSHIP

AMES, Iowa -- Charles Jahren, professor-in-charge of construction engineering in the department of civil, construction, and environmental engineering at Iowa State University, has been named the first recipient of the W.A. Klinger Teaching Professorship. The appointment recognizes Jahren's teaching and research leadership in Iowa State's construction engineering program.

"The Klinger teaching professorship is a true 'investment in people,' in that it will ultimately benefit engineering students today and well into the future," said Iowa State University President Gregory Geoffroy. "The Klinger professorship will ensure that the high level of learning, encouraged by exemplary professors like Chuck Jahren, will continue in the department of civil, construction and environmental engineering for many years to come."

Jahren's teaching interests have included cost estimating, construction equipment and construction process design. His research emphasizes construction process improvement and scheduling.

Jahren came to Iowa State in 1993. After earning a doctoral degree in construction engineering from Purdue University in 1987, Jahren spent six years at the University of Washington, Seattle. He also has six years of industry experience in construction. He earned a Master's in Business Administration and a civil engineering degree from the University of Minnesota, Minneapolis.

The W.A. Klinger Teaching Professorship was created by a gift from the estate of William and Catherine Klinger. William Klinger was the founder of W.A. Klinger Inc., an Iowa-based construction company. In the 1950s, he was deeply involved in helping to

create Iowa State's construction engineering curriculum. William Klinger died in 1971 and Catherine Klinger in 1990.

"Bill Klinger was regarded as the authority on higher education in construction engineering and since his direct influence helped to create our program, there could be no more appropriate legacy than to establish this teaching chair in his name," said James Melsa, dean of engineering at Iowa State.

Iowa State is one of only seven schools in the country that offers a construction engineering program accredited by the Accreditation Board for Engineering and Technology. With an undergraduate enrollment of 337 students, it is the largest program of its type in the U.S.

Jahren is one of 14 engineering faculty members who hold distinguished, named positions established by designated gifts within the College of Engineering. He will be honored at a reception April 24 at the Knoll. Members of the Klinger family, including their daughter Helen Gleeson, and her three children, John Gleeson, Barbara Gleeson Johns, and Jane Gleeson, are expected to attend.

-30-

IOWA STATE UNIVERSITY

Becoming the best.

Charles Jahren, associate professor of civil and construction engineering, stands before a portrait of W.A. Klinger, for whom a teaching award is named, Wednesday. Jahren recently won the Klinger award for his skills in the classroom.

By Lucas Grundmeier
Daily Staff Writer
May 01, 2003

The man who inspired the creation of Iowa State's construction engineering department is the namesake of a new teaching professorship for the department head.

Charles Jahren, professor-in-charge of construction engineering and associate professor of civil, construction and environmental engineering, is the first recipient of the W.A. Klinger Teaching Professorship.

Jahren said William Klinger changed the way construction was taught at many colleges and universities.

"This guy had the idea that construction was an engineering topic," Jahren said. "He looked at it as being more like architectural engineering and civil engineering."

Before Klinger's efforts, Jahren said construction majors dealt less with the physics and aesthetics of construction and more with the business of contracting.

Today's construction engineers, at Iowa State and elsewhere, learn about the business and science of construction, he said.

Jahren said when Klinger decided to develop a construction engineering curriculum, he was running a construction company in Sioux City he founded in 1919, so he brought his idea to former ISU president James H. Hilton.

"[Klinger] said, 'Construction engineering is something we need to do at Iowa State,' " Jahren said. "But they didn't have the money then."

Jahren said Klinger went to local contractors to get the necessary funding to create the program and the first construction engineering professor-in-charge, Thomas Jellinger, was hired in 1960.

Lowell Greimann, professor and chairman of the civil, construction and environmental engineering departments, said construction engineering has become a popular major since its introduction.

"The construction engineering program [at Iowa State] is often recognized as one of the top construction engineering programs in the nation," Greimann said. "About one-half of our undergraduates [in the department] are construction engineering majors."

John Gleeson, grandson of William Klinger and president of W.A. Klinger Inc. in Sioux City, said Catherine Klinger, William's widow, left \$200,000 in her will for the teaching professorship at Iowa State.

However, Gleeson said the will was created in the 1970s, and when Catherine Klinger died in 1990, the money was no longer enough to fund a professorship.

Gleeson said a representative from the Iowa State University Foundation called him last year to ask if his family would help augment the endowment to fund a full professorship.

"Education was always very important to my grandfather," Gleeson said. "[He felt] curriculum needed to be modified to be more beneficial for contractors ... he was instrumental in education on the national level with the construction industry."

Jahren and future professors-in-charge of construction engineering will have use of the endowed professorship.

He said no decisions have been made about the use of the new endowment, but the priorities will be retaining quality faculty members and reducing class sizes for labs.

Jahren said it was important for coursework in construction engineering to be modified continually to keep it relevant.

"[We] need to look at what's effective, what's worth spending your time," he said.

Professor gets \$54,000 to study fuel cells

THE REGISTER'S IOWA NEWS SERVICE

Ames, Ia. — An Iowa State University engineering professor received \$54,000 to study the economics of using fuel cells to power homes and businesses.

Russell Walters, professor of civil and construction

engineering at the university, is looking at fuel cells as an alternative avenue for purchasing clean, reliable, economic power.

Preliminary results suggest fuel cells are economical for businesses

that require power availability, such as banks and telephone switching stations.

Walters' research was paid for by the Electrical Contracting Foundation.

ISU, UI engineering schools lead in research income

Civil engineering schools at Iowa State University and the University of Iowa are ranked among the top U.S. schools for percentage of income from research activities. The high marks come from Engineering News-Record (ENR), a McGraw-Hill publication, which issued its first-ever survey of more than 117 research universities.

According to the ENR survey, Iowa State University ranks 9th in the nation in drawing 57% of civil engineering department income from research. The University of Iowa is ranked 13th and draws 43% of its civil engineering income from research.

The list raises the national profiles of Iowa State University and the University of Iowa engineering schools as leading institutions and builds their prestige. It also is expected to assist in recruiting of talented students to the programs and increase their competitiveness for attracting new research.

The University of Florida, Gainesville, was 1st in the ranking attracting 71% of its civil engineering department income from research.

Retired

Worked for EXXON, Orange, CA from June '63 to Aug '69 as District Engineer building service stations in S. CA and NV. Worked for CASEY'S building convenience stores in E. IA from '75 to '79. Worked for ENRON as System Planner and Construction Supervisor from '81 to '94 designing gathering systems, building pipelines, compressor stations and LP distribution terminals. Took early retirement in fall of '94.

We retired from our public works and military general contracting. We've expanded our commercial fishing business and stay busy with that and a 110-house development project that we have going. Gwen decided to go to law school and is at William Mitchell School of Law in St. Paul MN. So Northwest Air is getting rich on Tony's ANC-MSP segments. I am always thankful for my education at ISU.

nraufaste@erols.com

Noel's wife, Lynn, is in her 4th term as mayor of the town of Kensington and completed her year as President, Maryland Municipal League in June, 2003. Last year Noel and Lynn purchased Noel's grandfather's house in SW France nestled up against the Pyrenees Mountains. The 300-year old house is undergoing some restoration – new roof and windows.

After retirement from the National Institute of Standards and Technology (NIST) in 1998, Noel became Managing Director of Technical and International Activities, ASCE for three years. In January, 2002 Noel started a consulting firm focusing on program evaluation, managing bilateral programs, and introducing other country experts to US S&T. For the former, last June, Noel was in the West Bank and Gaza to develop a strategic plan to improve the competitiveness of their construction section. As a guest researcher at NIST, Noel manages several activities including a bilateral US-Japan Program on wind and seismic effects and organized an international symposium on automation and robotics in construction. For the latter, Noel planned and coordinated several Japan delegation technology scans of US design and construction practices in areas such as contaminated soils including PCBs and dioxins, geospatial engineering and remote sensing, highway transportation engineering and others where they met senior level US public and private sector officials and academia.

Last year, Noel was asked to serve as a reviewer of ASCE's Journal of Construction Engineering Management.

There is life after retirement.

The other 1967 graduates

Retired

Well, it finally happened. Joe retired last October from his ‘professional’ career at PPL. Unfortunately, Sally wants to continue her daycare business for a couple more years, so Joe has to ‘stay out of the way’ or get put to work! Joe helps out at the local florist three days a week just to get out of the house! Sally and Joe now have their first grandson, Ian, who just turned one. All of the kids live within 1 ½ hours of Fogelsville, so frequent visits are possible. Life is great! Golf is great!!

A special hello to the Jellingers in Arkansas! Tom and Roe were very special to the Gordons during those years at ISU, seeing both Mark and Kevin born in Ames. Thank you Tom and Roe for making it all possible; you truly are responsible for Joe’s success in his professional career!!

We are keeping busy doing projects for several institutional customers, in particular for several of the local private schools and universities. This appears to be one of the few segments of the market in Boston that is holding its own. Our son, Chris, received his MBA this spring and is now actively involved in the business.

Professional Contact Information

STAN and Associates, Inc.
7750 Paragon Rd
Dayton OH 45459

The year started out slow and didn't improve much. Several decent sized educational projects died when bond issues failed. Commercial work was also slow, but did have more medical work than in recent years. Made nearly ten trips to the University of Minnesota to commission HVAC systems in Riverbend Commons, Coffmann Memorial Union, Plant Genomics, Plant Growth and Art Teaching and Research. Still played a little volleyball, but did not travel to any tournaments out of state.

Kathy still enjoys working as an insurance agent/office manager. She "retired" from Girl Scouts this spring after 17 years in various capacities. Marissa graduated cum laude from Bowling Green State University with a Bachelor of Science in Early Childhood Education. She is back home sending out resumes and checking the internet for job postings. Jessica completed the first year of the associates degree program at Sinclair Community College in visual communications. She stays in shape working as an associate dance teacher at her old studio here in Centerville.

dgilbert@skanskausa.com

Still enjoying life in Phoenix, although I've done a lot of traveling lately with Skanska USA Building Inc (formerly Beers Skanska) since joining them in September 2002. Living in Phoenix and working for an Atlanta-based firm has a tendency to require that.

Sports work is still my passion and I've been doing essentially business development work with Skanska (hence the travel). There remains many exciting sports projects to pursue in spite of the professional market dwindling especially with minor league and collegiate projects throughout the country.

PO Box 419
Appleton WI 54912-0419
920-225-6127
ron.jochimsen@boldt.com

Ron celebrated 30th anniversary with Boldt this year, has been designated as Certified Quality Manager by the American Society for Quality, and continues to hold the position of Quality Process Manager at Boldt. Ron finished writing and just rolled out a comprehensive ISO-9000 based Quality Management System with Policy, System Procedures, Work Procedures for Quality Assurance, and Record Forms for Quality Control. Power Plant and other large projects have been requiring an increased use of Quality Control Records, but this QMS emphasizes Quality Assurance, where the money can be saved when the right work is performed correctly the first time. Ron is also initiating a Construction Reference Desk, utilizing much of the ConE Degree from Iowa State.

Oh Boy! Another year of time has passed so quickly. This year, as the last, has had it's ups and downs and offers new challenges. Kristi and her husband, Matt, moved to New Orleans last fall where he entered graduate school. Aric is, or should be, graduating this summer from UCF with his degree in Computer Engineering. His expertise is in networks and systems and now he needs to find a full time job. Amy and her husband, John, moved into a new home last December. This year's trip to St. Augustine was uninterrupted, and relaxing, as we completed closing down the farm and that chapter of life for the family. The time spent on the housing design for the church in the Dominican Republic has been interesting as they near completion of the first 32 homes. The expert services continue to be requested but I am still cutting back on the teaching and moving more toward the one-one internship training.

 grandprojects@aol.com

Larry continues to build commercial projects in the Twin Cities with his design/build firm, Grand Projects, Inc. (GPI). Deb handles office duties and pursues her avocation of buying/selling antiques. Next project is to "dress up" the dairy barn on their hobby farm to use for the antique shop. GPI designed and built an attractive neighborhood retail center last year along with other tenant buildouts. A new daycare facility

will soon be underway this summer after a lengthy municipal approval process. It definitely takes longer to get projects approved any more than it does to build them.

The White's enjoyed a winter break in Scottsdale, AZ last winter at a timeshare resort and plan to return for a few weeks again this year to "study" desert construction. While visiting Los Algodones, Mexico, they observed a small retail building that locals say has been under construction for over 5 years. Guess the liquidated damages are not very significant!

Sad to learn of the passing of former classmate and coworker Scott Kinkade. Scott was well liked by all.

The other 1974 graduates

Plan on coming to ISU for Texas Football Game (October 18th?) this fall. Looking forward to seeing campus since have not visited since 1983.

Just finished Star Spangled Banner Visitors Center and will be starting additions and restorations to the Basilica of Assumption Church here in Baltimore. The church was built in 1806 and is oldest Basilica in America. (Approximately \$25 million+ project.)

dhthompson@uss.com

I am the Senior Engineer – Drill and Blast and am responsible for drill and blast engineering and operations at US Steels Minntac Taconite (low grade iron ore) Mine. Our 2003 business plan will require drilling about 1 million feet of 16” diameter blast holes and blasting 150 blasts which will produce about 85 million tons of crude ore and waste rock. A new contract was recently ratified with the United Steel Workers that includes a 20 percent reduction in employment throughout the corporation and significant job rule changes. The goal is to improve productivity by at least 20 percent. The implementation of this contract will keep us quite busy. Hopefully, we will become more competitive in the world steel market.

Marla is a graphics artist for the local newspaper. Adam is a senior in Civil Engineering at the University of North Dakota. Marc is a high school senior.

A record was set for pounds of blasting agents shot in one patter, on April 18, 2003. Our blasters loaded 1,746,860 pounds of blasting agents in two days. Each day was a record for pounds loaded in a shift. The pattern had 425 holes ranging in depths from 25 feet to 56 feet and had 2.3 million tons of crude ore. The patter took 763 hours to drill.

I have been in England the past year managing construction on a series of projects for Merck & Co, Inc. The projects range from manufacturing facilities, lab buildings, office buildings, and research facilities. I have honed my metric skills working over here in Europe! I have also been working in France and Spain, and I have visited in Norway and Austria. It has been great, and I will be in England for another 2 years.

Do not believe everything you read in the papers! Europeans do not hate all Americans, and the visit here in Europe has been rewarding. Although, England and America are two countries separated by a common language! Flashlights are torches, elevators are lifts, and pants are underwear, are some examples. You have to be careful!

cgoettsch@adelphia.net

This is my 23rd year at Mortenson – how the time flies. We started a new operating group about a year ago called the National Healthcare Group, of which I am the Vice President. Mortenson has always done healthcare, but on a local level. With the new NHG we are now able to perform work for customers anywhere they build.

Jason is attending Pike’s Peak Community College (he wants to teach history) and is engaged. No date set yet (Mom and Dad are not ready for this!). Kristen is a sophomore at Colorado State majoring in international business. Corey will be a senior in High School this year – he also wants to teach. Bottom line is all three want to go to grad school. Oh well, it’s only money.....

Jenni is back to painting – I keep after her to start selling her work so I can spend more time on the streams (or pay for more college). Speaking of fishing, we bought a place in the mountains a few years back – never ending projects that tend to detract from the real reason we bought it – it’s close to world class fly fishing.

Lots of change for Steve this past year. In November, 2002 Swinerton shut down its division office in Phoenix and transferred Steve to the Oakland division as an Operations Manager. Currently Steve is managing staff on four projects in the Central Valley; \$117 million office project for the CA Franchise Tax Board, \$55 million site/infrastructure project for UC Merced, \$40 million library for UC Merced and a \$165 million hospital expansion for UC Davis Medical Center. The outlook for 2003/2004 looks good as long as the State of CA can deal with their budget crisis.

Steve's daughters joined him for a trip back to the great state of Iowa in mid-June 2003 and then on to CA for a week to learn more about construction. May have a couple of potential ConE students in a few years!

I have been in Chile for the past 2 ½ years working on a 570 MW hydroelectric power project. We are nearly finished constructing the 155 m tall roller compacted concrete (RCC) dam for the project. It has been a very interesting and challenging experience. We have endured 3 one-in-20-year, floods in the past 2 years (building a dam always seems to be a sure way of ending a drought). The first flood overtopped and largely destroyed our 25 m earth fill upstream cofferdam and set the project back about 10 months. We rebuilt the cofferdam with non-erodible RCC, which turned out to be a very good decision as it has

subsequently overtopped three times and held up well each time. The dam will have a concrete volume of about 1.6 million m3 of concrete. We placed over 100,000 m3 of concrete per month for six consecutive months and our peak month was 150,000 m3. What ever happened with the program for the US to switch over to the metric system?

bradphillips@beckgroup.com

Brad has been leading geeks for a year now as the Chief Technology Officer, which almost qualifies him to be one. Beck as made the decision to implement an ERP system so the year is going to be busy and lots of changes. Travel is still heavy and all across the country to all the offices as well as customers offices.

Karla has decided to take care of our youth director’s infant so life goes back 19 years for her. Courtney has bought in to the aggie cult 100% and bleeds maroon, she started in EE and is changing to IE -- good

move. Jessica is a snare in the drum line this year and just got her drivers license, so the house stays empty most of the time now.

 dhirsch@eig.com

It has been several years since I have contributed to the *Erector Set*, so I feel obligated to ramble on. I have been with Eagle as a Safety Professional for over seven years now. I work with construction companies, oil/gas, maritime construction, seafood processing, yacht builders and mining companies in Alaska and western Washington. I enjoy the work and the many clients I work with in the Northwest.

Matthew continues to excel in school and all sports that use a ball. Before his 9th birthday this July, he "hit for the cycle" while playing in a summer baseball league! Definitely something his Dad never dreamed of doing in *his* Little League career. Patti's corporate events production company, Lucydog Productions, LLC continues to be very successful. She has become a very respected resource in her industry, serving nationally/internationally recognized corporations whose names we all recognize.

We have lived in the Northwest for 16 years now and it is definitely our home. We take advantage of the many wonderful outdoor activities the region has to offer, including mountain climbing, hiking, downhill and cross-country skiing, camping, road and mountain bike (bicycle) riding to name our current favorites we try to squeeze in. I bought a new mountain bike in early summer and on the first single-track outing with it cracked a rib and learned a valuable lesson...know the trail...Oh well, live and learn. Patti and I ride road bikes with two other couples and I have one of the couples "kinda" talked into riding the RAGBRAI one year...unfortunately they are having a little trouble with the 90 degrees and 90% humidity concept in Iowa...But no worries, I will wear them down. Some of my bike riding group are riding the RSVP ride in August. (RSVP = Ride Seattle to Vancouver (BC) to Party"). Ya gotta love the name. I hope this year has been a great one for you and your family. Enjoy....And of course, be safe.

Omaha NE 68102-1618
402-221-4166
glen.f.stinn@usace.army.mil

It has been a busy year and an especially busy summer for myself and my family. In July, Deb and I went to Puerto Rico for a few days, then on a 7-day Caribbean cruise to celebrate our 25th. The first week in August we moved into the newer, larger house we had bought earlier in the summer. The following week took Deb's dad, Gilbert, to his 52nd Army reunion in Michigan, then upon returning, we moved Gilbert in with us. This gave us two houses to sell, and lots of garage sale items. In addition to all that stuff, I am still plumbing one or two Habitat-for Humanity houses each year.

I am still with the U.S. Army Corps of Engineers (17+ years). In June I received a pin for 20 years of Government service. Doesn't seem like 20 years, but I guess time flies. I continue to keep track of the workload budgets for the Omaha District. This year we are looking at some \$280 million workload, the largest I have seen in 17 years. Traditional military construction is still the biggest portion of our work, but Military Family Housing, especially in the Dakotas, has become our biggest single program. In addition to military construction, we still maintain rather consistent programs in Civil Works and in HTRW Cleanup.

Kevin is now in his Junior year at ISU. He is majoring in Poly Sci, with his eyes on Law School in a couple years. During the summer he worked at the Omaha Zoo for his fourth year, he took a couple classes at a local community college in Omaha, and he traveled to several places in the Midwest recruiting pledges for his Beta Sigma Psi Fraternity. Deb and I are also quite involved with the Fraternity. We are the Co-Presidents of the Beta Sigma Psi Parents group. With meetings, events, and an occasional ball game, we get back to Ames quite frequently.

Deb is still teaching grade school in Omaha. She takes care of the fifth grade home room and teaches math and computer science to most of the upper elementary.

The last 12 months brought with them a little more change for Jeff and Deltak. In December Jeff became manager of Deltak’s gas turbine hrsg project management group. It’s been 10 years since he left the project management group for sales and engineering positions so it’s good to be back. Cindi now keeps busy working part time for a local insurance company. Dan and Mike keep her busy the rest of the time. Dan’s been working out most of the summer getting ready for football this fall. Mike has been working on his golf game when he’s not playing soccer. As always, don’t hesitate to call or email if you plan to be in the area.

Mark assumed command of the 75 Civil Engineer Squadron at Hill Air Force Base Utah this summer. He is responsible for 200 military, 210 civilians and an annual budget of over \$30M. They maintain and repair 1,374 buildings (14 million sf), 10 dormitories (744 rooms), the largest industrial wastewater treatment plant in the U.S., 606 miles of utility (electrical, water, wastewater, steam and gas) lines and 6,802 acres of grounds. They also support two F-16 Fighter Wings, 24 tenant organizations and the 953,887 acre Utah Test and Training Range. Mark, Jenny and the kids are enjoying all the great outdoors activities in the mountains.

 tfm9@cornell.edu

After 14 years with general contractors on commercial projects and six years with an A/E firm in public school planning and construction, I have ventured on to the other side, to view the Owners' vantage point of capital project drama. Cornell is planning a 250,000 GSF integrated life science research building, and I represent the faculty and University Program Manager through the planning, design and construction process. The work is interesting and challenging, whether designing suites for transgenic mice, special chambers for tomato plants with viruses, or atomic force microscopes for the future needs of molecular imaging. We plan to be sure the dining facility is distant enough from the mice and tomatoes.

This April I was fortunate to visit ISU to tour the Molecular Biology Building and the animal research facilities at the Veterinary School. I was joined by old friend and classmate Michael Parsons, Con E '82. Was also able to connect with former favorite Professor Emeritus Jerry Chase, who was kind enough to provide a campus tour for my father (ME '43) and join us for a delightful evening of dinner and funny stories. I had a fine visit with Con E Chair Chuck Jahren, who has a very good grasp of teaming the

industry needs of future graduates with the curriculum and training of students. Both will be served extremely well with his guidance. Thank you Jerry, Mike and Chuck for your time and friendship, making it a great visit to the homeland.

The last year has been a challenging one for the industry, but we see things turning around steadily. Overall it came out okay for me. After many years I have moved on and joined Jacobs Facilities, a subsidiary of Jacobs Engineering Group. We have about 30,000 people world-wide doing all kinds of things for all kinds of clients. Despite the economy I've been able to find a better job this year both in terms of finances and career satisfaction.

As James Taylor says "the secret to life is enjoying the passage of time". Valinda and Mike were thrilled to see J.T. up close and personal in concert at Hilton Coliseum last year. For Mike, the passage of time is marked by major projects and what grade daughter is in. The year 2003 will see the completion of a new business college building on campus and daughter Meredith starting high school.

In his free time, Mike has become and aspiring guitar player. Summer work trips to Appalachia provided inspiration to pick up this instrument.

When you get back to central Iowa give Mike a call and in the meanwhile, enjoy life!

Well, it's been two years now since I left Turner to work for Orange County-based residential developer/builder, The Olson Company. I am currently a Vice President of Operations, specializing in high density, 4 over 2 for-sale development. The move has been a good one for me, as this state has a tremendous demand for housing, that far outreaches the available supply. A recent article in the LA Times

estimated the housing unit shortfall in the state at 1 million units, while current production rate is somewhere around 180,000 per year. The second phase of my career is off and running. On weekends I stay very busy with various school and sporting events with the boys. Katie is slated to start soccer in 2006!

clemenskw@aol.com

Our lifestyle is as exciting and crazy as ever. My work load has picked up as I am wearing at least 'two hats' now. Steel fabrication has picked up again - the steel detailers I supervise are back working overtime. We are working on becoming an AISC certified fabricator - Teri and I will be attending 'boot camp' in Chicago in August.

I also started my own engineering practice. I started marketing my construction engineering expertise early this season. I currently have concrete and steel design for a large warehouse addition underway. If I can help with quantity takeoff/estimating, scheduling, construct-ability reviews, concrete footing/slab design, structural and steel stair design, let me know.

When we aren't working, we are chasing our teenagers all over. Nicole is a senior in high school already and starting to look at colleges. Eric and Jason are hitting the IRCA rodeo circuit hard this summer. Eric

rides saddle broncs and bulls. Jason rides bulls and just started practicing on barebacks. All three participate in high school rodeo, which takes us all over Iowa - Sep thru Oct and April thru June.

Working as a Senior Project Manager and enjoying a busy year for heavy/highway in Minnesota (as usual). Building bridges along with some private work, currently we are on a growth spurt. New Con E's should keep an eye out for E.K.S. for future openings. Can call or email me for info.

In the process of moving locally, so things will be extra hectic this summer. Joyce keeps very busy running the family and working as an accountant for a manufacturing business.

Looking to hear from Jim Reno and Randy Smith one of these days.

Fourteen years later, I'm still doing fun cool things at Imagineering. Currently working the Disneyland portfolio on Space Mountain and preparations for the grand 50th anniversary including smokeless fireworks (taxes my memory of chemistry and fluids classes to the limit), parades, and figuring a way to make a human Tinkerbell "fly" in three dimensions while zipping down a lifeline from the top of the Matterhorn. Also working on some cutting edge applications of Primavera's Prime Contract product for use in project management and project controls applications. This one taxes my statistics and data measurement capabilities, but has great potential.

Jim Carlson (ConE 80) and Don Hughes (CE64) are busy on the Hong Kong project and Ali Al-tai (ConE 85) works in estimating.

I just successfully managed and completed a major interchange reconstruction project in Fontana. This proposed multi phase project would provide for reconstruction of I-10/Etiwanda Ave Interchange from the existing four-quadrant full-cloverleaf interchange to a partial cloverleaf "A" configuration to improve safety and weaving operations. However, after two years of long commute, I'm looking forward to being closer to home. Marketing would be an area that I would spend 50% of my time. Donna and I are busy with kids, Tony and Sierra. Donna, the super-women, works part-time, takes care of children and manages the Bokaie's household. If you are in the area, please give me call.

I shifted gears after two years with Nielsen-Dillingham and the Dillingham bankruptcy (100 year old company – done). Went to work for The Olson Company in March as they needed a Purchasing Project Manager on a 48-condo and 8-exec-home Faculty Housing project at Pepperdine University in Malibu. In May I was promoted to Senior P.M. as they needed on-site leadership and to wrap up another contract of 78 4-bedroom Student Apartments and an 18-room Executive Center for Visiting Professors, etc.

I've been working as a project superintendent for Power Construction Company, LLC for about 10 years now. I am currently involved at Loyola University on a new Life Sciences and Research Center, and recently completed a large campus development for Hyatt. In addition to managing work, I've had the opportunity to get back to Iowa State once or twice a year for the career fair and hiring opportunities. In addition to work, Julie and I have kept busy raising our two children. Construction is much easier to manage than children.....

In the last year I bought a 92-year old house, had it extensively remodeled, redecorated and re-landscaped the entire property. I also switched jobs and joined T.Y. Lin International. I am one of two project engineers for the design of Wacker Drive in Chicago. We are replacing an existing two-level roadway in the heart of downtown Chicago. This project is one of the biggest and most complicated projects that I have designed and is on a very aggressive schedule. The project includes the design of a post-tensioned structure, replacement of all of the utilities and also includes an interchange at the south end of the project, including the relocation of an existing 9 foot by 11 foot sewer, working over a subway tunnel, under an existing bridge, and adjacent to the Chicago River. I haven't had much free time in the last year, but I definitely am enjoying what I am doing.

A new addition to our family arrived on January 7th – a new baby boy named Gregory Alan. He is growing fast and helps his sister keep mom and dad very busy. Family vacations will never be the same!

Mark continues to work as a project manager for Mortenson in the Puget Sound area. He is currently wrapping up The Tulalip Casino project 30 miles north of Seattle (see their webs site at <http://www.djc.com/special/TulalipCasino/>). The construction market and the entire economy in the Pacific Northwest are very stagnant at the moment, but we look forward to significant improvement over the next 12 months.

Have a prosperous and safe year.

After almost ten years back “home” in northern Illinois, we returned to Ames at the beginning of January so I could pursue a Ph.D. in Civil Engineering. I have really enjoyed helping with the teaching and meeting many of our undergraduate students. I’m working on getting a funded research project and hope to graduate sometime in 2005. Amy is starting a teaching job at our daughter’s school in the fall, and we hope to be building a house near Ames soon. Our children are adjusting well to the move and are enjoying all that Ames has to offer. If you haven’t visited Ames in awhile, it’s grown a lot in just the ten years we’ve been away. Please stop by my office and say “hello” if you’re visiting Town Engineering.

After almost four years overseas (Singapore and London) we have found ourselves between projects and we have decided four years is enough and we will be moving back to Houston this summer (early August). Working overseas has been a great experience for the whole family but now that our daughter is starting school, it is time to get ourselves a bit more settled.

The most interesting aspect of our travels has been meeting all of the different people and learning about their cultures. Although this can also be one of the most challenging aspects of working overseas as well.

Celebrated ten years with Mortenson this June. After traveling around the country since moving out to Seattle ten years ago, I managed to make it back and stay put for four years now. Currently managing a new nursing facility project for Washington State Vetrans Association in Port Orchard, WA. No matter

how long you do this work, each project brings something new. This time it's ferry boat commuting. Also trying to fill spare time with hobbies from an ever increasing list. Latest addition is fly fishing. Accepting any and all advice at this point.

Hello Everyone: It's hard to believe that it is summer again. 2003 has been a good year so far. In January we moved to Johnston, IA. We needed a little more room for our newest addition, Elise Morgan, who was born on May 15th. Tammy is doing great. She is enjoying the summer off, but taking the kids from activity to activity can be more work than a job. Madie is growing up quick and has all kinds of camps lined up to keep her busy. She'll start school in the fall. Trevor is a huge bundle of energy and has a fascination with "big trucks" and "Daddy's cranes". As for me, work during the week and a lot of boating with the family on the weekends. Throw in some golf and bike riding and my plate is full. Have a great year and God bless.

My entrepreneurial endeavor with Robb Johnson (CE '95) continues to be successful. ECI's highlight project in 2002 was the Dillon Dam Spillway Rehabilitation Project. We successfully completed this \$2,000,000 shaft rehab with joint venture Partner Molte Constructors of Cody, WY. I was lucky enough to have the opportunity to travel to Africa last summer (June 2002) with my family for a hunting safari. Kathy and I continue to enjoy outdoor activities with our dogs in the great northwoods.

As always, we are continuing to look for new business opportunities and relationships. If there is anything that my fellow ConE alums may need, please feel free to call.

Last July we were blessed with our first child, Coleton Dale. After the death of my father in April and much consideration, I decided to hang up my engineering hat and work part-time at Ferguson Landscape. I decided life is just too short and want to spend as much time as I can with our son. He keeps me very busy. He just started walking and tears the whole house up. He is a huge bundle of joy. I miss my engineering work, but seeing his bright, shiny face everyday makes me know he comes first and there is always time for work later.

Working as a construction manager and contract administrator with Ellerbe Becket in Minneapolis. Completed construction of a \$28M 100,000SF control center for the Energy Reliability Council of Texas, northeast of Austin. Started an 18-month \$30M 115,000SF Center for Advanced Medicine and Surgery on the Franciscan-Skemp campus of the Mayo Healthcare System in La Crosse WI. Also working on a variety of small projects in Austin, TX; St. Paul, MN, and Sault Ste. Marie, MI. And during my spare time (ha ha!) I'm an adjunct professor at the twin cities campus of the University of Minnesota teaching construction management classes.

And when I'm not working...I'm enjoying freelance photography, traveling – riding my Harley around Minnesota and Wisconsin, snowmobiling in the upper peninsula of Michigan, and sightseeing in Hawaii (we just had to take advantage of all those frequent flyer miles!!!); hanging out with our collie dogs; and putzing around our house and yard. Life is great – call/stop by!!!

Life has taken a turn since the birth of Jonah, our son. I have mastered the fundamentals of diaper duty, although he seems to humor himself by engaging his “fountain of youth” just as I pull the diaper off. I tell him that, “It’s all fun and games until someone puts an eye out”. Needless to say, my warning hasn’t deterred him at all.

This year I finished working on the Wells Fargo Financial Project in downtown Des Moines which included a 10 story office building, two sky-walks, and a 1600 car parking garage. I was lucky to work with several ISU Construction Engineers including Russ Lewton, Eric Simon, and Dominic Punelli. At one point in the project I counted a total of 8 ISU Construction Engineering graduates working on the project! I have been working with Weitz's Southwest Division in Phoenix this summer and will be back to Iowa in August.

On the home front, Bree and I have sold our house in Urbandale and are building a house in the country, east of Des Moines. Bree continues to work for Shuck-Britson as a Structural Engineer and recently received her Professional Engineer License.

If anyone is passing through the Des Moines area, Bree and I would love to get together. Feel free to give us a call at 515-491-6170.

After working 4 ½ years on the Sprint World Headquarters Campus Project for J.E. Dunn, I was moved to another project in January. I am currently the Project Manager on the new University of Missouri

Basketball Arena – around 15,000 seats, 321,000 sf arena scheduled for completion for the 2004-2005 basketball season. It's not ISU, but still an exciting project to be the General Contractor on.

Personal Note: Julie and I are excited to announce that we are expecting our first child in October. Another little Cyclone coming into the world?

This year showed a big change from working in sunny and warm Florida to coming back north for projects in Indiana and Pennsylvania. While the cold/snow was a shock (worst winter in Pittsburgh in years) it was tempered with opportunities to see Notre Dame football from the sideline and Steelers/Pirates games as well. Continue to work as a field cost engineer for BV with most recent project being gas fired combined cycle generating units.

It is funny that I still prefer college life over working life. Embrace it while you can.

I have grown to like 'clam chowda' after spending over a year in Boston working on a power plant project. Great city, I encourage all to visit Boston when you have a chance. Currently, I am working on a hospital project in New York. Local contractors would be the MOST challenging people I've ever dealt with. Be prepared if your job brings you to New York.

Is Ms. Donna Schradle having fun with her retirement yet?

The grand opening for the Greenway Station Lifestyle Center will be September 26-28. This \$60 million development has a construction duration of less than 13 months. There are four more restaurants and two hotels that will begin construction by the end of the year.

Making a career change from General Contractor to Developer was a big change last July and I am very satisfied with the decision.

First child due mid-November.

After graduating in '98, I set my sights on becoming a professional surfer in south Florida while working on the side for Weitz Golf. Golf wasn't my thing, and neither was surfing, so I tried my hand at the exciting sport of swamp buggy racing while working the day shift for Weitz Florida on a 62-million dollar condo project. My career in racing was not successful, so having exhausted my aspirations for south Florida, I have moved on to Midwest to do another project in my spare time for Weitz.

In May of 2002, Kris and I left Kansas City and returned "home" to Iowa to start raising our family. Mason, our early Christmas present, was born on December 20th. I am now working as a project manager for Russell Construction and Kris continues to work as a software engineer for Cerner Corporation (but now she works out of her office in our home as a telecommuter...not a bad gig!). In Fall, 2002, I began taking classes toward an MBA degree from that "other Iowa school" in Iowa City. I'll graduate in Spring, 2005.

Currently, I am working on closeout and punchlist completion for the “F-1” Contract at Millennium Park in Chicago. I was brought in on this project late, but was able to see the completion of the Peristyle which is a replica of the original that sat on the site around 1905 and was demolished due to deterioration and age.

The entire Millennium Park is located over two parking structures, the Metra lines and a bus lane for McCormick Place which mandates a unique design to eliminate the potential of overloading the existing slab and structures, but also allowing for the needed flexibility of the features on the park. This particular project has allowed me to learn a great deal about landscaping, electrical and precast installation. Additionally, there are other projects that have been completed previously including the Ice Skating Rink and the Skate Rental Building and other projects under construction for the park that include a Music Pavillion, the Chicago Music and Dance Theater, a pedestrian bridge, the remaining landscaping (F-2) and Monroe Gardens. Walsh Construction is currently the General Contractor for all of the projects excluding the Music and Dance Theater and the remaining landscaping contract, F-2. These other contracts are interesting to witness and follow the progress.

Through my current project, I have been able to learn a great deal about the costs associated with construction, since I have to correct the cost report, complete change orders for the Owner’s review, process invoices, etc.

rschaefer@cahill-sf.com

Mary and I are still living in the SF Bay Area and loving it. We bought a house recently, and have been hard at work doing minor remodeling jobs and decorating. I got laid off at DPR almost two years ago during the tech crash, and have been at Cahill Contractors in San Francisco since. I've been lucky to land a couple of promotions, and am now Project Manager on a \$17MM, 9-story building just south of downtown. Working in the City of San Francisco is a daily adventure! I take a ferry to work every day, and sometimes feel like I'm on a permanent vacation living here. I work directly under the president of the company, and it's been a fantastic learning experience.

1) I have learned that sometimes old-line companies without a mission statement or set of "core values" sometimes have a stronger sense of mission and values than the companies that talk about it all the time. 2) Find someone in your company with gray hair, become friends with them, and get them to teach you everything they know. It will pay huge dividends.

I really hope the budget problems at Iowa State haven't seriously eroded the quality of education in the ConE program. Now that I'm out in the industry, I'd stack the education from Iowa State up against any other program out there. I feel very confident with the education I received at Iowa State, and I would be very disappointed if current and future students were not to receive the same high standard of instruction and real world practicality the program is grounded in.

Life is good when you enjoy what you do. I completed two projects since the last time that I wrote into the *Erector Set*. One at the University of Texas, Seay Pshychology Building, on the campus in Austin, TX. The second was a new addition and remodel of Midlands Hospital in Papillion, NE. This is in the closeout stages after the last year and a half. I currently reside in Omaha, NE (who thought that a national contractor would bring me back so close to home) and am working on the Alegent Health Bergan Mercy Medical Center. Looks like the next move may be back to home, yes Ames, IA. McCarthy has been awarded the new USDA BSL 3(Ag) Laboratory set to start construction in September 03. Maybe I will see some of you back at the football games!!

I am currently working as a project engineer on a Juvenile Courts and Detention Center in Phoenix and expect to start on the new Arizona Cardinals Stadium later this year.

Recently completed the Forensic Science Center in Phoenix and was exposed to real life CSI. Like the kid in "Sixth Sense", I saw dead people.

We started a wonderful year with my daughter, Leila being married. Also, I am proud to have three kids enrolled at Iowa State. Work has been a real challenge despite the political climate it has been a very rewarding experience here in Saudi Arabia. We really enjoy working and living in Dhahran and I also had the opportunity to make several business trips to UK, and the Netherlands, and soon maybe Japan. Also, I have been teaching a number of Project Management related courses, seminars, and workshops. I am currently on the Technical Committee for the Gulf Chapter of PMI organizing the 10th International Conference to be held in Dubai, May 11-13, 2004. Anyone interested in presenting a paper, send me your abstract by mid-September.

I got my Project Management Professional (PMP).

After almost ten years back “home” in northern Illinois, we returned to Ames at the beginning of January so I could pursue a Ph.D. in Civil Engineering. I have really enjoyed helping with the teaching and

meeting many of our undergraduate students. I'm working on getting a funded research project and hope to graduate sometime in 2005. Amy is starting a teaching job at our daughter's school in the fall, and we hope to be building a house near Ames soon. Our children are adjusting well to the move and are enjoying all that Ames has to offer. If you haven't visited Ames in awhile, it's grown a lot in just the ten years we've been away. Please stop by my office and say "hello" if you're visiting Town Engineering.

Another busy year at Master. We are currently working on a number of exciting mixed-use development projects in Minneapolis. After adding the real estate division last year we are now able to full real real estate development, engineering, construction and property management.

Sara and I have enjoyed spending time with the boys. They are getting excited about having a ne brother or sister join them later this year. We have our work cut out for us.

It is funny that I still prefer college life over working life. Embrace it while you can..

I have grown to like 'clam chowda' after spending over a year in Boston working on a power plant project. Great city, I encourage all to visit Boston when you have a chance. Currently, I am working on a hospital project in New York. Local contractors would be the MOST challenging people I've ever dealt with. Be prepared if your job brings you to New York.

Is Ms. Donna Schradle having fun with her retirement yet?
