

2007 Erector Set

150
1858 2008
IOWA STATE UNIVERSITY
THIS IS A SESQUICENTENNIAL CELEBRATION EVENT

ASC/AGC National Student Competition (San Antonio, TX) March 19-23, 2007

Commercial Team

L to R:

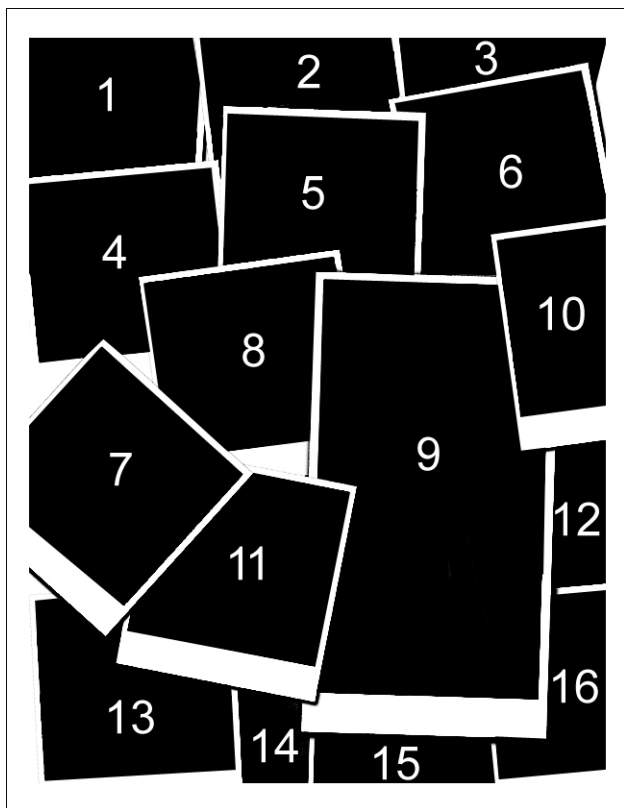

Luke Miller
Clark Bowden
Tom Kinsinger
Nicole Bell
Dan Frohardt
Eric Lindquist, captain
Larry Cormicle, coach
(See article page 24)

Design Build Team

L to R:

Rachel Potthoff
Kevin Heisdorffer
David Frischmeyer
Cory McDermott, captain
Curtis Ehler (architecture)
Andrew Rotta
Larry Cormicle, coach
(See article page 24)

1. Marston Hall construction 1900-1901
2. Town Engineering Building construction
3. Water Tower construction 1897
4. Mule teams ca 1907
(for early road construction)
5. Iowa State College entrance ca 1911
6. Meat Lab ca 1976
7. Concrete mixer 1912
8. Meat Lab ca 1976
9. Water Tower construction 1897 and
Water Tower present
10. Town Engineering Building construction
11. Building under construction with Maxon crane
12. Marston Hall construction 1900-1901
13. Meat Lab ca 1976
14. Water Tower 1900-1901
15. Water Tower Engineering annex Morrill Aero
16. Meat Lab ca 1976

Dear Alumni and Friends:

This year there have been lots of exciting changes for ConE -- new faces and some familiar people doing new things -- and lots of good news. There are other articles in the Erector Set about each of the following items, but I will highlight them here.

We welcomed a new faculty member this year: Jenifer Shane. She comes to us from University of Colorado and has interests in project management and integrated project delivery systems such as design-build. She has been teaching our introductory Construction Engineering class and our first ever graduate/senior elective course on design-build. She has a research project with Minnesota DOT and is the faculty advisor for Sigma Lambda Chi, our programs student honor society. Please welcome her if you have a chance to meet her.

Our student groups continue to do our program proud. This year the AGC Student Chapter tied for first place in the student chapter of the year contest, giving Iowa State University first place honors for the second year in a row. Then our ASC student competition teams took two first place awards in the regional competition so ISU qualified for the national competition again this year. Our students competed well in the national competition, but did not place.

Larry Cormicle was named AGC Educator of the Year, a very important and well deserved honor. This was especially notable because this was the first year that Larry was eligible to be nominated for this award (nominees must have five years of teaching experience). It is impressive to for someone to accumulate the required qualifications in such a short time. The nomination emphasized his leadership with the AGC Student Chapter and the ASC Competition Teams and his excellence in teaching. Congratulations to Larry!

Our capstone design course (the final course that ConE's take to apply everything that they have learned in simulated projects) is evolving from one four-credit course to a two-credit and a three-credit course. The two-credit course will continue to have projects use integrated delivery systems (such as design-build); however the groups will be composed of both civil and construction engineers. In the past, the "designers" for the design build teams were construction engineering students who agreed to play the designer role. In the future civil engineering student from our department will play designer roles as part of their capstone course. ConE faculty members Larry Cormicle and Kelly Strong will be the instructors for both the Construction and Civil

Engineers. After the civil and construction engineers compete this capstone course, they will continue with another three-credit course that focuses on their own discipline. The construction engineers will continue with the unique commercial mock bid letting in the ConE only capstone course where our students turn in bids that are read aloud for regional projects with sizes of up to 30 million dollars.

Our enrollments are increasing as the size of our freshman classes have increased. We are seeing more transfer students from undeclared engineering, other departments and community colleges. This is good news for employers who have been anxiously awaiting each graduate. Almost all of our graduating student have jobs before they graduate -- often staying with an intern employer.

Russell Walters, our electrical construction specialist has accepted an offer from University of Florida and will be starting there at the beginning of next semester. We wish him well in his new life. We are in the process of recruiting someone who can take over his teaching duties and have a candidate identified.

Ed Jaselskis has spent the last year as a director for the National Science Foundation for the division that covers construction engineering and infrastructure. Such directors positions are rotated among faculty members from various institutions for one or two years. Being selected for such an appointment is a distinct honor and allows the candidate to bring back information on the latest in construction research to his or her home institution. So we are very pleased that Ed had this opportunity.

When Ed comes back on August 15th, I will be stepping down as Professor-in-Charge and he will be taking over that position. In 2001, when Jim Rowings left this position, both of us were possible replacements and both of us had one more promotion remaining to attain full professor. Since Ed was closer to the promotion, we decided that he would take over a the ASCE Journal of Construction Engineering and Management editorship from Jim and I would be Professor-in-Charge allowing Ed to focus on his promotion (which he earned), with the idea that we would later swap so I could focus on my promotion. I have served two three-year terms as Professor-in-Charge and have taken over editorship of the journal, so it is a good time to make the switch.

My new position is the "Warren Associate Professor of Distance Education". I will continue my teaching duties by leading the highly success freshman learning

community and by teaching senior and graduate elective courses in highway and heavy construction. In addition, I will be working with faculty members in Civil, Construction and Environmental Engineering to develop a distance education program. We expect to serve people in a number of different ways including

- Classes for Freshman and Sophomores in Community Colleges and other institutions who wish to transfer to ISU
- Summer classes that current students can take during summer jobs and internships
- Masters degrees for students who cannot attend on-site classes
- Continuing education and training for professionals.

We hope to benefit all of our potential students, current students and alumni with this program. Contact me with ideas and questions.

The editors job that I mentioned before is indeed exciting and challenging. The ASCE Journal is a monthly journal that reviews more than 300 scholarly manuscripts per year and publishes about half of them (the other half are judged not to be of sufficient quality for publication). My volunteer editorial staff includes many of the most prominent construction engineering faculty in the world, including a lot of young talent. Retaining this editors position helps Iowa State University to remain plugged into the latest.

Personally, I would like to thank the alumni and friends of construction engineering for their great support in my past six years as Professor-in-Charge. I have enjoyed meeting you at alumni gathering, career fairs or when you just stop by the office when you are on a recruiting trip. I am especially pleased by your participation with the Erector Set; this is a wonderful way for everyone to stay in touch and I am grateful the first Professor-in-Charge, Tom Jellinger and his wife Ro for starting this special tradition. Thanks go to the ConE faculty and staff for its support and to ISU in general for being a great place to have a Construction Engineering program. I am looking forward to seeing ConE continue to grow and improve under the leadership of my colleage, Ed. Of course, this is not good by, because I'll continue to work with you from my new position.

Sincerely,

Charles T. Jahren
Professor-in-Charge
Construction Engineering

Cormicle, Larry
Senior Lecturer

426 Town Engineering
515-294-8299
cormicle@iastate.edu

In 2006-2007 Larry instructed:

ConE 245. Construction Contract Documents.

Definition, interpretation, and utilization of drawings, specifications, agreements, bidding forms, general conditions, bonds, subcontracts, shop drawings, and related documents.

ConE 322. Construction Equipment and Heavy Construction Methods. Selection and acquisition of construction equipment. Application of engineering fundamentals and economics to performance characteristics and production of equipment. Heavy construction methods and economic applications.

ConE 441. Construction Planning, Scheduling, and Control. Integration of previous construction coursework into the planning, scheduling and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer applications.

ConE 461. Construction Engineering Design. Application of team design concepts to a construction engineering project. Conceptual planning. Detailed analysis. Advanced cost and schedule applications. Contract negotiation. Development of a complete project history. Technical presentations (oral and written).

Larry's research included:

Construction Scheduling Support for I-235. Iowa State University researchers are assisting Iowa DOT Construction personnel by reviewing contractor schedules and progress for over \$150 million in freeway construction from downtown Des Moines to the Northeast Mix Master Systems Interchange.

In Addition:

Coop/Intern Advisor
Advisor for Associated General Contractors Student Chapter
Coach for Associated Schools of Construction Student Competition Teams
Chair of the ConE Curriculum Committee

Franksain, April

453 Town Engineering
3/4 Time Secretary (academic year) 515-294-9926
1/2 Time Secretary (summer) twerp@iastate.edu
Scholarship Coordinator; Erector Set Editorial Assistant,
Curriculum Committee secretary

Heemstra, Brad

Story Construction
515-232-4350 x 241
bheemstra@storycon.com

In 2006-2007 Brad instructed:

ConE 245. Construction Contract Documents.

Definition, interpretation, and utilization of drawings, specifications, agreements, bidding forms, general conditions, bonds, subcontracts, shop drawings, and related documents.

Hunacek, Mark

In 2006-2007 Mark instructed:

ConE 380. Engineering Law. Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability. Emphasis on development of critical thinking process, abstract problem analysis and evaluation.

Jahren, Charles
Professor-in-Charge

458 Town Engineering
515-294-3829
cjahren@iastate.edu

In 2006-2007 Chuck instructed:

ConE 381. Bidding Construction Projects.

Permission from the instructor. Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties: A. Heavy and Highway,

ConE 481. Bidding Construction Projects II. Same as Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience. Offered in the following specialties: A. Heavy and Highway,

CE 505. Design of Construction Systems. Advanced design of concrete formwork and falsework systems.

Design for excavation and marine construction including temporary retaining structures and cofferdams. Aggregate production operations, including blasting, crushing, and conveying systems. Rigging system design.

CE 594 Special Topics in Construction Engineering and Management. Emphasis for a particular offering will be selected from the following topics: A. Planning and Scheduling, C. Project Controls.

Chuck's research included:

Performance Evaluation of Concrete Pavement Granular Subbase (TR-554) Research Objective:

1. Determine if recycled PCC pavement subbase is performing adequately by evaluating representative pavement sections with comparisons to virgin aggregate subbase sections (in particular with respect to the specification changes since 1992).
2. Evaluate the variation in subbase stiffness and permeability by performing multiple tests within a given test section using semi non-destructive methods (i.e. permeability measurements through core hole, pavement FWD tests, and down hole LWD and DCP tests).
3. Determine the gradation of the subbase materials using bag samples and non-destructive X-Ray CT scanning of epoxy filled core samples.
4. Characterize the ride quality and geometric characteristics of the pavement layer for correlation to the subbase properties.
5. Evaluate the pavement drainage system at each test section site by inspecting the subdrain outlets.
6. Develop suggested material guidelines and specifications for construction of pavements using recycled PCC aggregate for subbase.

Madison County Bridge Evaluation. Research Objective: With the assistance of the Iowa DOT and Iowa State Bridge Engineering Center (BEC), Madison County will construct a single span bridge using rapid construction techniques. The BEC will conduct field monitoring on the bridge to help assess the behavior of individual elements during construction, the long-term performance of the individual components, and long-term performance and overall behavior of the completed bridge.

Effective Shoulder Design and Maintenance: Identify practices for design, construction, and maintenance of granular shoulders that result in reduced rutting and drop-off, improved safety, reduced maintenance costs, and extended performance life with recommendations specific to Iowa materials and conditions.

Developing an Effective Construction Training Program for Hispanic Supervisors and Craft Workers-Phase III: This study addresses language and cultural barriers by investigating the most effective way to

deliver training material developed in Phases I and II to Hispanic workers, American supervisors, and department of transportation (DOT) inspectors. The research methodology consists of assessing the needs and interests of potential and current course participants in terms of exploring innovative ways to deliver the training. The training courses are then adapted and delivered to fit the specific needs of each audience. During Phase III of this project, the research team delivered the courses described in the Phase I and II reports to eight highway construction companies and two DOT groups.

Manual of Practice for Roadway Maintenance Workers: A comprehensive maintenance manual for roadway maintenance workers that draws available information together, illustrates proper methods and procedures and also explains why these procedures are important.

Thin Maintenance Surfaces – Phase III – Municipal Streets and Low-Volume Rural Roads: To fully develop a thin maintenance surface technology transfer program specifically for municipal and secondary road personnel; specifically the following groups: municipal and county engineers, consulting engineers and contractors involved in secondary road and street maintenance, secondary road and street superintendents, and officials involved in street maintenance for small municipalities.

Evaluation of Long Term Field Performance of Cold In-Place Recycled Roads (TR-502): The ultimate objective is to develop an understanding of: how the engineering properties of CIR material, the environment, traffic and subgrade conditions influence the performance of the CIR pavement; how the engineering properties of CIR material changes over time; and how the mix design and construction methods influence the engineering properties of CIR materials. Final objective is to obtain a rational mix design method and construction quality control system that is generally accepted in Iowa.

Embankment Phase IV PCC Base Granular Shoulder Design.

Construction Scheduling Support for I-235. Sponsored by Iowa DOT. Iowa State University researchers are assisting Iowa DOT Construction personnel by reviewing contractor schedules and progress for over \$150 million in freeway construction from downtown Des Moines to the Northeast Mix Master Systems Interchange.

In Addition:

Trustee, Associated General Contractors of Iowa Foundation

Member of the ConE Curriculum Committee

Associate Editor *ASCE Journal of Construction*

**Jaselskis, Edward J.
Professor**

450 Town Engineering
515-294-0250
ejaselsk@iastate.edu

In 2006-2007 Ed was on sabbatical:

NSF Assignment Article

Edward J. Jaselskis

This past year I have been working at the National Science Foundation (NSF) as a program director for the Information Technology and Infrastructure Systems Program. This program funds innovative basic research to improve the competitiveness of the construction industry as well as improve the condition of our nation's civil infrastructure. My principal responsibilities include establishing review panels to review submitted proposals and selecting ones that meet the intellectual merit and broader impact criteria at NSF. I also meet with researchers in order to explain NSF funding opportunities and the review criteria in order to improve their chances of success.

Being associated with NSF has opened doors at several organizations such as the National Academy of Science, Transportation Research Board, the National Institute of Science and Technology, American Society of Civil Engineers, and the American Society of Engineering Educators. The greatest highlight for me has been the ability to fund a workshop related to building sustainable infrastructures in developing countries with cooperation from World Bank, USAID, and ASCE. I have had a special interest in improving developing countries since my time as a field engineer in Columbia, South America at the very beginning of my career. When my assignment with NSF is completed in August, I look forward to returning to Iowa State University to head up the Construction Program this fall.

Ed's Research Included

CE 501 Preconstruction Project Engineering Ed's research included:

Developing an Effective Construction Training Program for Hispanic Supervisors and Craft Workers-Phase III: This study addresses language and cultural barriers by investigating the most effective way to deliver training material developed in Phases I and II to Hispanic workers, American supervisors, and department of transportation (DOT) inspectors. The research methodology consisted of assessing the needs and interests of potential and current course participants in terms of exploring innovative ways to deliver the training. The training courses were then adapted and

delivered to fit the specific needs of each audience. During Phase III of this project, the research team delivered the courses described in the Phase I and II reports to eight highway construction companies and two DOT groups.

Using Scanning Lasers for Real-Time Pavement

Thickness Measurement-Phase I: The goal of this research is to investigate and test a new method that can determine the thickness of the pavement in real time by scanning the surface of the base prior to paving and then scanning the surface after paving. Using a scanning laser to record an elevation map of the pavement and its subbase provides thorough coverage that will assure transportation authorities that the entire pavement surface meets thickness requirements.

Field Evaluation of Compaction Monitoring

Technology: Phase 2:: This report documents an extensive field program carried out to identify the relationships between soil engineering properties, as measured by various *in situ* devices, and the results of machine compaction monitoring using prototype compaction monitoring technology developed by Caterpillar Inc. Primary research tasks for this study include the following: (1) experimental testing and statistical analyses to evaluate machine power in terms of the engineering properties of the compacted soil (e.g., density, strength, stiffness) and (2) recommendations for using the compaction monitoring technology in practice.

The compaction monitoring technology includes sensors that monitor the power consumption used to move the compaction machine, an on-board computer and display screen, and a GPS system to map the spatial location of the machine. *In situ* soil density, strength, and stiffness data characterized the soil at various stages of compaction. For each test strip or test area, *in situ* soil properties were compared directly to machine power values to establish statistical relationships. Statistical models were developed to predict soil density, strength, and stiffness from the machine power values. Field data for multiple test strips were evaluated. The R2 correlation coefficient was generally used to assess the quality of the regressions.

Strong correlations were observed between averaged machine power and field measurement data. The relationships are based on the compaction model derived from laboratory data. Correlation coefficients (R2) were consistently higher for thicker lifts than for thin lifts, indicating that the depth influencing machine power response exceeds the representative lift thickness encountered under field conditions. Caterpillar Inc. compaction monitoring technology also identified localized areas of an earthwork project with weak or

poorly compacted soil. The soil properties at these locations were verified using *in situ* test devices. This report also documents the steps required to implement the compaction monitoring technology evaluated

Kandil, Amr
Assistant Professor

494 Town Engineering
515-294-8824
kandil@iastate.edu

In 2006-2007 Amr instructed:

ConE 340 Concrete and Steel Construction.

Planning and field engineering for concrete and steel construction. Design and applications of concrete formwork to construction. Erection of structural steel.

CE 304. Civil Engineering Project Management.

Project management including work breakdown structures, cost estimating, scheduling, and project control. Civil engineering project life cycle, including planning, design, construction, and maintenance processes.

CE 502 Construction Project Engineering Management. Application of engineering and management control techniques to construction projects. Construction project control techniques, equipment selection and utilization, project administration, construction process simulation, Quality Management, and productivity improvement programs.

CE 510. Information Technologies for Construction.

Information technologies including microcomputer based systems, management information systems, automation technologies, computer-aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

Amr's research included:

Research on multi-objective optimization for highway design and construction projects. He envisions that a computer program will provide professionals with guidance as they select the best designs and construction methods for each of hundreds of activities on construction projects. They would be optimized for cost, schedule, safety and environmental impact.

Perkins, Brad
Lecturer

455 Town Engineering
515-294-2872
bperkins@iastate.edu

In 2006-2007 Brad instructed:

ConE 221. Contractor Organization and

Management of Construction. Entry level course for construction engineering: integration of significant statistical, engineering, economics, and management

issues related to efficient construction company operations. Probability and statistics; time value of money; methods of evaluating alternative projects; organization; operations; construction company administration; marketing; insurance and bonding; project safety; labor law; productivity; total quality management; and motivation and leadership

ConE 241. Construction Materials and Methods.

Introduction to materials and methods of building construction and to construction drawings. Foundation, structural framing, floor, roof, and wall systems.

Blueprint reading and quantity takeoff techniques

ConE 251. Mechanical/Electrical Materials and Methods.

Introduction to the materials and methods for mechanical and electrical construction systems and drawings. HVAC, water and waste water, vertical transportation, power distribution, lighting, and fire protection. Blueprint reading and quantity takeoff. Specialty contractor organization and management.

ConE 351. Mechanical and Electrical Systems.

Comprehensive coverage of mechanical systems, electrical systems, plumbing, fire protection, security, vertical transportation, lighting, acoustics and communications. The course includes analysis techniques and design principles for each system. A comprehensive design project is required for a major building project.

Con E 421. Construction Estimating. Conceptual estimating. Bid preparation for buildings, highways, heavy, mechanical trades. Estimating costs for material, labor, equipment, overhead, and profit. Quantity surveys, unit costs, production rates, and pricing methods. Subcontract bid analysis and bid procedure. Cost analysis and cost control.

CE 120x. CE Cornerstone Learning Community.

Cr. R. May be repeated for credit. The CE Cornerstone Learning Community will assist first-year students integrate into the Civil Engineering program. Under the direction of faculty and peer mentors, students will work both individually and in learning teams to complete assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the civil engineering profession. Offered on a satisfactory-fail grading basis only.

CE 304. Civil Engineering Project Management.

Project management, including work breakdown structures, cost estimating, scheduling, and project control. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Junior assessment.

In addition:

Advised students

Shane, Jennifer
Assistant Professor

498 Town Engineering
515-294-1703
jsshane@iastate.edu

In 2006-2007 Jennifer instructed:

ConE 221. Contractor Organization and Management of Construction. Entry level course for construction engineering: integration of significant statistical, engineering, economics, and management issues related to efficient construction company operations. Probability and statistics; time value of money; methods of evaluating alternative projects; organization; operations; construction company administration; marketing; insurance and bonding; project safety; labor law; productivity; total quality management; and motivation and leadership.

CE 594. Special Topics in Construction Engineering and Management. M. Design Build Construction. Graduate and senior elective class that investigates design-build as well as other emerging project delivery systems and procurement methodologies from the owner, contractor, engineer, architect, subcontractor, and public perspectives.

Jennifer's research included:

Mn/DOT Cost Estimation Process Improvement and Organizational Integration Project. The purpose of this project is to build upon national and Minnesota Department of Transportation (Mn/DOT) cost estimating and cost management best practices to strengthen key focus areas for improving Mn/DOT cost estimating and cost management policies, processes, and practices.

In addition:

Sigma Lambda Chi faculty advisor (construction honor group)

Department representative, Academic Standards Committee
President ACI Iowa Chapter

Strong, Kelly
Associate Professor

454 Town Engineering
515-294-1460
kstrong@iastate.edu

In 2006-2007 Kelly instructed:

Engr 101 Engineering Orientation. Introduction to the College of Engineering and the engineering profession. Considerations in choosing an engineering curriculum. Information concerning university and college policies, procedures, and resources. Opportunities to interact with departments.

ConE 110. Introduction to Construction Engineering. Introduction to skills required for professional success in construction engineering. Teamwork, leadership, and critical thinking skills applied in a service learning project involving design, construction, and financial controls. Guest lectures by industry leaders and field trips to construction sites.

ConE 120x Learning Community. Students in independent teams will plan, manage and conduct several projects with a small budget and guidance from a peer mentor, designed to develop skills in critical thinking, problem-solving and leadership.

CE 485. Civil Engineering Design I. The civil engineering design process, interacting with the client, identification of the engineering problems, development of a technical proposal, identification of design criteria, cost estimating, planning and scheduling, codes and standards, development of feasible alternatives, selection of best alternative, oral presentation and poster.

Kelly's research included:

Temporary Traffic Control and Enforcement of Traffic Laws in Closed Road Sections **Research Objective:** Public travel by motor vehicles is often necessary in road and street sections that have been officially closed for construction and/or repair. This authorization is allowed to provide access to homes and businesses located beyond the point of closure. The MUTCD does not include explicit guidance for temporary traffic control measures within closed sections.

Interpretation and enforcement vary. For example, some law enforcement officers in Iowa have indicated a reluctance to enforce traffic laws in closed areas because the Code of Iowa only appears to address violations on roadways open to public travel.

Enforcement of traffic laws in closed road sections is desirable to maintain public safety for specifically permitted road users. Occasional unauthorized entry by motor vehicles is experienced in closed road areas. Citations beyond simple trespass may be advisable to provide better security for construction sites and for sections closed to public travel during winter storms. The objectives of this project are to synthesize current practices and policies regarding temporary traffic control and enforcement of traffic laws in closed road sections; evaluate the needs of state, county, and municipal traffic/transportation agencies relating to potential changes in enforcement policy for closed road sections; recommend changes in enforcement policies and procedures to improve safety in road closure zones.

Performance Effectiveness of Design-Build, Lane Rental, and A + B Contracting Techniques **Research Objective:** Mn/DOT specifications are generally prescriptive in that they attempt to describe how a contractor should conduct certain operations using minimum standards of equipment and materials. These prescriptive specifications, commonly known as method specifications, have performed admirably in the past with an experienced workforce and fairly repetitive operations. However, rehabilitation and reconstruction projects, especially in a rapid renewal scenario, demand more creativity and innovation. Prescriptive specifications do not properly foster this innovation. In addition, government budgets (e.g., state DOTs) are generally insufficient to provide the human resources necessary for planning design, project administration, and construction management services in an accelerated delivery schedule. This research identifies success factors in alternative contracting techniques and compares relevant performance criteria

for three alternative contracting techniques as well as for traditional contracting.

Asset Management Strategies to Mitigate Freeway Work Zone Congestion: State transportation agencies are implementing a variety of work zone and congestion mitigation strategies. The purpose of these strategies is to minimize the road user impacts when constructing and maintaining critical highway assets. However, there is limited understanding of the quantitative benefits of specific strategies, and a compilation of these benefits would aid state agencies in making decisions on work zone congestion mitigation strategies.

Sturtevant, Kathy F.
Secretary

456 Town Engineering
515-294-2045
kathys@iastate.edu

Supports ConE faculty, student organizations and advisory council. Handles employment questions.

Walters, Russell C.
Assistant Professor

452 Town Engineering
515-294-2171
rwalters@iastate.edu

In 2006-2007 Russ instructed:

ConE 251. Mechanical/Electrical Materials and Methods. Introduction to the materials and methods for mechanical and electrical construction systems and drawings. HVAC, water and waste water, vertical transportation, power distribution, lighting, and fire protection. Blueprint reading and quantity takeoff. Specialty contractor organization and management.

ConE 351. Mechanical and Electrical Systems. Comprehensive coverage of mechanical systems, electrical systems, plumbing, fire protection, security, vertical transportation, lighting, acoustics and communications. The course includes analysis techniques and design principles for each system. A comprehensive design project is required for a major building project.

ConE421. Construction Estimating. Conceptual estimating. Bid preparation for buildings, highways, heavy, mechanical trades. Estimating costs for material, labor, equipment, overhead, and profit. Quantity surveys, unit costs, production rates, and pricing methods. Subcontract bid analysis and bid procedure. Cost analysis and cost control.

CE 506. Case Histories in Construction Documents. Study of cases involving disputes, claims, and responsibilities encountered by management in construction contract documents. Analysis of methods of resolving differences among the owner, architect, engineer, and construction contractor for a project.

CE 510, Information Technologies for Construction. Information technologies including microcomputer

based systems, management information systems, automation technologies, computer-aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

CE 594. Special Topics in Construction Engineering.
E. Project Controls. F. Computer Applications for Project Controls.

In Addition

Advises National Electrical Contractors Association student group

Advises Mechanical Contractors Association of America student group

Member of the College of Engineering's computer committee

Member of ISU's Diversity Committee

Russ' research included:

OODAS: The vision of this study is to turn paper-based design standards and construction specifications into an object-oriented design and specification (OODAS) system or a visual electronic reference library (ERL). Individuals can use the system through a handheld wireless book-size laptop that includes all of the necessary software for operating in a 3D environment. All parties involved in transportation projects can access all of the standards and requirements simultaneously using a 3D graphical interface. By using this system, users will have all of the design elements and all of the specifications readily available without concerns of omissions.

Electronic Reference Library, Phase II Analysis of Web-Based Content Management Systems for Managing Iowa DOT Engineering Specifications: Assessing Best Practices. Research Objective: This proposal addresses construction of an online content management system that will support distributed collaborative authorship and editing of the Iowa DOT's Specifications Section documents. The project builds on previous work between Iowa DOT and Iowa State's Civil, Construction and Environmental Engineering Department on the Electronic Reference Library (ERL). Just as the ERL vastly improved distribution of these documents, the proposed content management system will streamline their production and editing by consolidating the text into an XML-based database system that supports refined version control, detailed editorial workflows, and multiple output formats.

Using Scanning Lasers for Real-Time Pavement Thickness Measurement, Phase I (TR-538)

Research Objective: The goal of this research is to investigate and test a new method that can determine the thickness of the pavement in real time by scanning the surface of the base prior to paving and then scanning the surface after paving. Using a scanning

laser to record an elevation map of the pavement and its subbase provides thorough coverage that will assure transportation authorities that the entire pavement surface meets thickness requirements.

Wiley-Jones, Rhonda
Academic Advisor

451 Town Engineering
515-294-2183
rwiley@iastate.edu

In 2006-2007 Rhonda instructed:

Engr 101. Engineering Orientation (R credit)

ConE 110. Introduction to Construction Engineering (1 credit)

ConE 120x Cornerstone Learning Community (1 credit each semester)

In Addition:

- ◆ Served as co-coordinator of the Cornerstone Learning Community with Dr. Strong, working with the transfer student section
- ◆ Supervised and trained 4-8 peer mentors to facilitate high-leverage, educational activities in the learning community with Dr. Strong
- ◆ Attended an ASEE sponsored First Year Engineering Workshop at U. of Notre Dame, summer 2006
- ◆ Assisted with the final preparation for the ABET Review Report
- ◆ Advised approximately 150 students and served as back up to faculty advisers and trained new faculty advisers
- ◆ Participated as a member of the College of Engineering's Advising Committee
- ◆ Served on the College of Engineering Learning Community Task Team and as the chair of the Peer Mentor Training sub-committee
- ◆ As chair of the Peer Mentor Training sub-committee, developed training for college-wide peer mentor training
- ◆ Coordinated New Student Orientation for all incoming first-year and transfer students summer 2006
- ◆ Served on the CCEE Women and Minorities committee (2003-2007, 2006 and 2007 Chair)
- ◆ Partnering with Dr. Shane, hosted an All ConE Girls Night Out party, January 2007. As a result the women students established a list serve to stay in contact with each other.
- ◆ Designed a job shadowing program for students of color and women Fall 2006, recruited one new student as a result
- ◆ Developed and oriented a core of volunteer ConE Student Ambassadors, who conduct recruitment meetings with high school students on campus, who are interested in ConE
- ◆ Serving 1/4 time for the College of Engineering

Leadership Program (ELP) January-December
2007

- ⇒ Received approval by college curriculum committee for an experimental course, Engr 327x Voices of Public Policy (3 cr.), as an outgrowth of the COE Engineering Leadership Program
- ⇒ Served on the COE Engineering Leadership Program leadership model development team, which also identified the expected outcomes of the program and the intended competencies of students

In the Future:

- ◆ Teaching Engr 327x Voices of Public Policy (3 cr.) fall 2007 for the college
- ◆ Serving as Engineering Leadership Program (ELP) interim director for the summer of 2007, while director is out of the country
- ◆ Coordinating and conducting college-wide training for Learning Community Peer Mentors, August 2007
- ◆ Attending and presenting on the ConE Cornerstone Learning Community Integrated Curriculum at an ASEE sponsored First Year Engineering workshop at U. of Notre Dame, summer 2007
- ◆ Instituting a new on-line Student Handbook

Past ConE Personnel

Chase, Gerald W.

Assoc. Prof. Emeritus
1707 Northwestern
Ames IA 50010
515-232-0150
gchase7934@aol.com

Dear friends,

This has been an enjoyable year for me. I was asked to fill in as an advisor for Ed Jaselskis who was on sabbatical to the National Science Foundation (NSF), and Rhonda Wiley-Jones, who needed some release time for other departmental activities. So, I volunteered. The experience was great. I quickly learned that face-to-face meetings, except for pre-registration, are almost a thing of the past. E-mail is clearly the mode of communication preferred by students. I thoroughly enjoyed the interactions, not only with the students, but also with the faculty and staff. Kathy Sturtevant, April Franksain and Rhonda were of immense help. It was a great learning experience, and it continues until Ed Jaselskis returns in mid-August.

Sally and I have enjoyed another year in this wonderful community of Ames. It is changing, of course. More traffic, more houses, more apartments, more stores, etc. But it remains a wonderful place for people of all ages.

I had the privilege of attending the dinner for our graduating ConE students. You would have been proud to hear their praise for the program, for the faculty and staff, past and present, for the alumni, for our wonderful industry support, and for each other. Their comments were very heartening. I can tell you that everybody here is working hard to help this program maintain its reputation as the best in the country.

I have enjoyed encountering many of you alumni during the year, to include the retirement function for Dick Johnson of Story Construction Company, the Engineering Career Fairs, the Master Builders of Iowa convention, and unexpected encounters on the bike trail and at a water-park resort. We

look forward to seeing you somewhere, sometime this year, and reading in *The Erector Set* of your activities. Best wishes from Sally and I.

Jerry Chase

Federle, Mark

Associate Prof.
The Weitz Company
400 Locust St Ste 300
Des Moines IA 50309-2331
515-698-4273
mark.federle@weitz.com

Greetings from Des Moines/Ames:

Although it has been over 8 years since I left Iowa State, I have the great fortune of seeing many former students (some as colleagues, some as clients, and some as competitors!!). The Weitz Company continues to expand. Due to our operations in Guam, I had the opportunity to take a 13.5 hour plane ride (in the middle of two other 3 hour plane rides) all for 16 hours of meetings!!

I am still the "Head Geek" (Chief Information Officer) for Weitz, so not much has changed there.

Little Sarah (for those that remember her from the Student Chapter meetings) is headed off this fall to Juniata College in Huntingdon Pennsylvania to study Biology and Religious Studies (she still hopes to be a Forensic Pathologist) and did succeed in finding an expensive college outside of Iowa. Jackson will be a sophomore in the fall and should be driving around Ames by himself soon. Our littlest will be in the Middle School this fall and is 5'2" and clearly built to be a lineman on the football team, although soccer goalie is his passion.

Michele keeps everything organized and can be seen on ESPN2 in ads for Ames Racquet and Fitness!!

I look forward to hearing/seeing many of you - my email remains mark.federle@weitz.com

Best Wishes to All.

Ferree, David

Assistant City Attorney
Des Moines International Airport
5800 Fleur Dr
Des Moines IA 50321
daferree@dsmairport.com
dferree@justice.com

Greetings:

Let me begin by saying how much I miss teaching in the ConE department. From my first semester there I was impressed by the quality of the department and the students in it. It was a thoroughly enjoyable experience for me, as I hope it was for my students.

I left Ames in 2006 and moved to Des Moines where I work for the city attorney's office at the Des Moines International Airport. In a nutshell, I am the legal adviser to the airport in all aspects of its operations. This includes real estate acquisitions, leases, contracts, aviation issues and several other matters. It takes in many subjects I dealt with previously, but it also gives me the opportunity to learn some new and interesting things.

Those of you who were paying attention during class may remember I asked you to send me examples of the kinds of problems you encountered in your work that were relevant to the material in the Engineering Law class.

The invitation is still open. My intent is to return to teaching some day and those examples will be invaluable, and you can feel that you have contributed in some way to another's education. Even if you don't have examples, I invite former colleagues and students to send me a note and let me know how things are going.

tcjrej@yahoo.com

June 2007

Greetings from Arkansas:

It's a different time for me this year - I lost Ro on May 2, and in doing so I lost my best friend. Some of you knew Ro from the early days of the program, maybe it was the Seniors' party, the hayride, or some other activity. She always enjoyed meeting you and keeping up with your lives. She's very much missed.

News from the ConE Program continues to impress me!! The awards for both students and faculty are very rewarding. And now we'll be operating under a new professor-in-charge - good luck Ed!!! I recently received word of Don Kawal's retirement after twenty-five years as president of Klingers in Albuquerque. Some of you will remember Don as one of the very first instructors - he taught while he was getting his doctorate.

Life goes on here in Bella Vista - I'm still playing golf two or three times a week. My game isn't what it used to be, but I still enjoy being out and enjoying the company. My best to all of you and may all your projects be successful!!!

God Bless -
Tom Jellinger,
Professor Emeritus

June 14, 2007

To all:

Karen and I have spent the last year providing care for her parents. Her dad is 96 and her mom is 92. They celebrated 75 years of marriage, they are both great role models for us all. They moved from their home to a retirement village this year.

I sat for my first amateur radio license exam 50 years ago. Life got in the way of that hobby until this year. I sat for the amateur radio license exam in May and passed. I am now KD0AUU.

We spent some of last summer in Colorado. We will try to go again this year, probably in the fall.

We continue to support the Cyclones in football and basketball. We are very pleased with ISU's new Men's BB coach and it will be interesting to watch the 2007 FB team with their new coach.

We are involved with our grandchildren. Sam is 16 and driving, Pa (me) watches with his eyes closed. Sam is on the robotics' team at his high school, they traveled to

Florida for a national competition. Emma is 12 and it is great fun watching her dancing career, she is performing and doing choreography. Isabelle is 9 and our youngest artist.

Other than my continuing yard work, that is about it from here.

Loving retirement.

Sincerely,
Ron Roth

Russo, John

7029 Comanche Ct
Edina MN 55439
952-944-7018
jrusso@mn.rr.com

Dear staff and alums:

Another year has sped by. It certainly doesn't seem like 21 of them since I left ISU! Thanks for including me in *The Erector Set*.

There have been some changes in the Russo "front" in the last year. We have moved (downsized) -- I've included the new address. We just didn't need the 4,000 square feet. Sold the "big" house to our 33 year old (youngest) son Matt and his wife Kara, plus new little one Alexander John (AJ). We only moved six blocks away in Edina, so we visit often, but not so much as "Raymond" on TV.

My consulting business gets smaller each year as I ratchet into semi-retirement. Now only working 3 days a week, about 40 weeks. Still getting in 1500 hours or so a year, however.

We're still working on a large variety and size of projects -- that's what keeps me interested. Our condo conversion development (we owned) is now well over. Sold all 40 units plus two floors of commercial in St Paul. A good but time consuming experience.

My wife, Susan, retired in March, so I now have a new primary office assistant for the first time in 21 years. Sue is enjoying retirement and is living at our lake house in Wisconsin most of the summer.

Our (former) children, now adults, are doing well. Lynne is still in California primarily writing and producing art (trying to make a living). The other two boys (John and Matt) are in town and have wonderful families. We spend

as much time as possible with granddaughters Laura (11) and Jackie (8); they are jewels.

I still hear from a few lone alums each year. If I hear enough requests, I'll have a Minnesota gathering of alums at my home. Let me know, guys and gals.

Best wishes to you all and to Tom J., Ira W., Gerry C., Ron R., and Teresa -- and all the "old" gang; plus Steve Bell (he's pretty close to being part of the old gang!)

Ward, Ira

Assoc. Prof. Emeritus

We received news that Ro Jellinger passed away. She was Tom Jellinger's spouse. Tom was the first Professor-in-Charge of the ConE program at Iowa State University. She is fondly remembered by early alumni of our program for her positive attitude and enthusiasm. I have had the opportunity to meet her and share our alumni's impressions of her. Tom credits her with suggesting the title for our annual alumni publication The Erector Set. ~Chuck Jahren

Romilda E. "Ro" Jellinger

Jan. 2, 1926-May 2, 2007

Romilda E. "Ro" Jellinger, 81, of Bella Vista, Ark., died Wednesday, May 2, at Highlands Health Care in Bella Vista. A Mass of the Resurrection will be at 10 a.m. Saturday, May 5, at St. Bernard Catholic Church, One St. Bernard Lane, Bella Vista, Ark. Burial will be in Bella Vista Cemetery.

Romilda E. "Ro" Jellinger was born Jan. 2, 1926, in Ft. Thomas, Ky., to Frank X. Bertsch and Anna C. Simon Bertsch. She was a member of the St. Bernard's Women's Club, a graduate of LaSalette Academy and an avid bowler and golfer.

She is survived by her husband, Thomas Jellinger, of Bella Vista; one son, Richard T. Jellinger and wife, Peg; two daughters, Susan M. Jellinger and Nancy Jellinger Graeve and husband, Mike; two brothers, Paul Bertsch and Ronald Bertsch, both of Southgate, Ky.; four sisters, Rose Hall, of Lexington, Ky., Anne Kendall, of Alexandria, Ky., Lillian Bruegge, of Highland Heights, Ky., and Joan Jones, of Florence, Ky.; and six grandchildren.

She was preceded in death by her parents and three brothers.

Published in the Ames Tribune from 5/4/2007 - 5/5/2007.

(Memorial contributions may be made to St. Bernard Catholic Church, One St. Bernard Lane, Bella Vista, AR 72715)

Get Your Graduate Degree Online

By Leah Barton, Engineering Distance Education

The Department of Civil, Construction, and Environmental Engineering now offers two of its graduate programs—Construction Engineering and Management, and Environmental Engineering—completely online through Engineering Distance Education (EDE). The new online programs make it more convenient and cost-efficient than ever for professionals to attain a master's degree or certificate.

The master's degree in Construction Engineering and Management provides a unique blend of technical and managerial education to help professionals solve problems and compete in the ever-changing construction environment. The program, endorsed by the Associated General Contractors of America, focuses on three components: management techniques, construction operations, and construction methods. Instead of a traditional master's thesis, students will develop a project paper in conjunction with their employer that explores a project or process improvement. Students may complete this 30 credit degree program in approximately two years (four semesters and two summers).

The graduate certificate in Environmental Engineering allows students to improve their technical skills through advanced study without committing to a full master's program. By earning the certificate, students will learn more in the growing and advancing field of water supply, wastewater treatment, environmental protection, recovery of byproducts, and improved management of wastes. The certificate consists of a total of 12 credits (4 courses).

Courses are delivered via streaming media over the Web, ftp download, or on CD. Students may choose the day, time, and location to view their class lectures, allowing for maximum flexibility. All students, regardless of location, are assessed in-state tuition for the online programs. Up to nine credit hours can be taken as a non-degree student, so it is possible to begin your studies this year without formally applying to a program. The fall session begins August 20, 2007 and the spring session will begin January 14, 2008. For more information on the programs, courses, or to register, visit the EDE Web site at www.ede.iastate.edu or call (800) 854-1675.

ConE Awards and Honors

Larry Cormicle, senior lecturer, was named as this year's Outstanding Educator by the Associated General Contractors of America. This award recognizes the achievements of faculty members in construction management or engineering programs.

Nominees were judged on their full-time undergraduate teaching responsibilities, extracurricular activities with undergraduate and graduate students, and activities with AGC chapters, national AGC, and/or other construction organizations.

"The AGC Educator of the Year is a highly coveted and competitive award in construction education circles," says Chuck Jahren, professor-in-charge. "The fact that he got this on his first nomination heightens the honor."

The award included a cash prize and an all-expense paid trip to the 2007 AGC Annual Convention in March in San Antonio, TX where the award was presented.

Larry Cormicle, was named CCEE department's Outstanding Faculty of the Year by the ISU AGC Student Chapter.

Larry Cormicle received the 2007 Joseph C. and Elizabeth A. Anderlik Teaching Award. The award, given by the CCEE department, honors a faculty member each year for his or her contributions to undergraduate teaching. The award includes a cash prize.

Brad Perkins, Todd Sirotiak, and Larry Cormicle, all lecturers in construction engineering, were recognized as "Memorable Teachers" by the Center for Excellence in Learning and Teaching (CELT).

Students were asked to submit stories of dynamite teachers - ones who truly encourage students and help them succeed. The nominations for inspiring and memorable teachers were then reviewed by CELT. The Department of Civil, Construction, and Environmental Engineering received the most nominations per university unit.

The three CCEE lecturers were recognized at a luncheon March 28 in the Campanile Room of the Memorial Union, along with 30 other teachers

from various departments on campus. During the recognition ceremony, Peter G. Beidler, Lucy G. Moses Distinguished Professor of English at Lehigh University and a former Carnegie Foundation National Professor of the year, delivered the keynote address and presented each teacher with an autographed copy of his book, *Why I Teach*.

Nicole Bell, learning community peer mentor for three consecutive semesters, won the Exemplary Returning Peer Mentor award at the 6th Annual Peer Mentor Recognition Celebration held on April 4, 2007, in Morrill Hall.

There are over 150 mentors working with learning communities on campus and seventeen exemplary mentors were selected.

Mentors are nominated for the exemplary award in one of three categories:

- 1) Class-Affiliated (mentors who facilitate a class session or work with instructors to plan and deliver the course content)
- 2) Returning (mentors who have served in the role for at least one year and returned to the position for a 2nd or 3rd year)
- 3) Live-in (mentors who work with a residential learning community and are assigned to a residential learning community house/floor)

Nomination packets were submitted in December of 2006 and screened by members of the peer mentor subcommittee. Exemplary mentors were selected based on such qualities as: initiative, programming, complexity of course role, group facilitation skills, course support and knowledge, and leadership.

Construction Regionals build on student's skill

By Ginny Hammes/Daily Correspondent
Reprinted with permission from the November 13, 2006, ISU Daily

Iowa State, once again, shows its excellence in yet another area.

Two construction engineering teams were sent to the Associated Schools of Construction Region IV Competition. The competition was held in Nebraska City, Neb. The commercial and design/build teams placed first, and the heavy/civil team was right behind with a second place.

The students were advised by Larry , ISU Construction Engineering graduate of '78, and civil, construction and environmental engineering senior lecturer.

"I provide guidance, resources and a belief that they can become champions with complete preparation and hard work," Cormicle said.

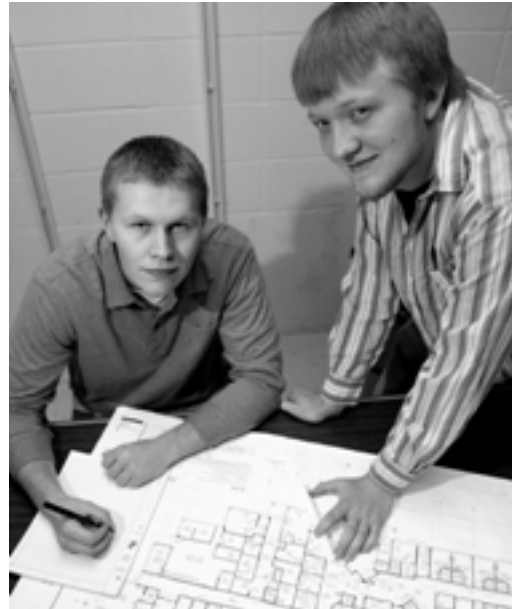

The winning commercial team consisted of Eric Lindquist (team captain), Daniel Frohardt, Nicole Bell, Josh Gaube, Clark Bowden, and Tom Kinsinger. They responded to a mock request for proposals for a \$5.6 million medical center project for the I-70 Medical Center in Sweet Springs, Missouri.

The commercial team has taken the title of first in 2003, 2004, and now, 2006.

The design/build team was assigned a project for the Expansion of the Lexus and Mercedes Benz auto dealership in San Diego, California with a guaranteed maximum price of \$9.98 million.

The team members were as follows: Cory McDermott (team captain), Andrew Rotta, David Frischmeyer, Rachel Potthoff, Kevin Heisdorffer and Curtis Ehler (architecture).

This makes for the ninth time in the past 10 years that ISU's design/build team has walked away with a first place award.

Eric Lindquist, left, and Cory McDermott, seniors in construction engineering, led their respective teams to first-place finishes at a regional competition held in Nebraska City, NE. Emily Sadler/Iowa State Daily photographer

"[All of] our students believe in themselves and exceed my expectations every year," Cormicle said.

The heavy/civil team had a mock request for proposals for the \$92.4 million Hartsfield-Jackson Atlanta International Airport Runway Repavement Project in Atlanta, Georgia.

The team members were Mike Grim (team captain), Zach Steffen, Jeff Theis, Jesse Spain, Caleb Lyon, and Tyler Sparks. This team finished with an incredibly close second.

This team has won first place for the third consecutive time.

There was also a separate division for residential construction which consisted of team members Kelsey Peverill (team captain), Kyle Mueller, Tyler Millard, Anders Hurd, Matt Barchman, and Jessica Meredith. The following team members generated a proposal for a \$15.5 million residential subdivision. This team did not finish in the top three, but came in close with fourth place.

This is the fourth year in which Iowa State's residential construction team has competed in the residential division.

All of the teams put in an endless amount of time and hard work.

“Our student teams are self selected without any faculty coach input. With the students hiring each other to form their teams they take full responsibility for their performance and consistently achieve extraordinary results year after year,” Cormicle said.

All of the teams were allowed the following conditions for the competition: 18 hours in a hotel room with six computers and four printers. They were to develop a proposal that consisted of twenty pages. The design/build team was also required to create ten architectural design computer drawings as well as building a scale model of the building. A twenty minute presentation was then given to a group of industry judges, who were involved in the actual construction of the project, in support of the proposal. Pamela Reinig, Program Director for the Engineering Communication and Marketing Department, provided the above information. She has helped to support the students through their advancements.

The two first place teams will head to San Antonio, Texas March 21-24 in order to compete in the AGC/ASC National Student Competition.

ISU ConE Students Receive Top Honors

By Larry Cormicle, Senior Lecturer

For the ninth time in the last 10 years, Iowa State construction engineering students placed first in the design-build division of the Associated Schools of Construction (ASC) Region IV Competition. Iowa State students also received first place in the commercial, second place in the heavy/civil and fourth in the residential divisions. The students competed with 30 teams from 12 universities in North Dakota, Minnesota, Iowa, Nebraska, Missouri, and Kansas.

“ASC is a good competition,” says Cory McDermott, senior in construction engineering and the design-build team captain. “You don’t get any credit for this. It’s all student motivated and it’s a great learning experience.”

At the competition October 26-28 in Nebraska City, Nebraska, the teams were given mock requests for proposals and allowed 18 hours to develop a 20-page proposal and prepare a 20-minute oral presentation. The design-build team also designed 10 architectural computer drawings and constructed a scale model of the building. The teams presented their proposals to a group of industry judges who were involved in the construction of the actual project.

McDermott’s first place design-build team created a proposal for the expansion of a Lexus and Mercedes Benz auto dealership in San Diego, California. The project had a guaranteed maximum price of \$9.98 million. “We had a really good team dynamic, almost better than last year. I have high hopes for the national competition in March,” McDermott says. His other team members included construction engineering students Andrew Rotta, David Frischmeyer, Rachel Potthoff, Kevin Heisdorffer, and architecture student Curtis Ehler. *(See photo inside front cover.)*

The commercial team responded to a request for a \$5.6 million project at the I-70 Medical Center in Sweet Springs, Missouri. Eric Lindquist, senior in construction engineering and the team’s captain, says he thinks the team’s experience gave them an edge. “We had three returning team members,” he says. “We were almost last place last year, but that gave us the motivation to do well and we knew what to expect because of our experience.” Lindquist’s other team members included Daniel Frohardt, Nicole Bell, Josh Gaube, Clark Bowden, and Tom Kinsinger. *(See photo inside front cover.)*

Lindquist also says that communication was key for their team and that he’s learned as much from this experience as he has in any of his classes, especially in terms of giving presentations. “The competition shows the importance of teamwork and definitely prepares you for the real world,” he says.

The commercial team placed first in 2003 and 2004 as well.

Students in the heavy/civil division placed a close second with their proposal for the \$92.4 million Hartsfield-Jackson Atlanta International Airport Runway Repavement Project in Georgia. The project schedule was 60 days, which required 24-hour operations. Team members included Mike Grim (team captain), Zach Steffen, Jeff Theis, Jesse Spain, Caleb Lyon, and Tyler Sparks. The team won first place in 2004 and 2005 and has three members returning for next year’s competition.

Additionally, this year’s competition marked the fourth year Iowa State competed in the residential division. Team members Kelsey Peverill (team captain), Kyle Mueller, Tyler Millard, Anders Hurd, Matt Barchman, and Jessica Meredith developed a proposal for a \$15.5 million residential subdivision with 396 lots and three model homes.

The two first place teams will compete in the Associated General Contractors of America/ASC National Student Competition held during the AGC national convention, March 21-24, 2007 in San Antonio, Texas.

Iowa State faculty member Larry Cormicle (ConE 1978) coaches all four teams.

The design-build team presents their proposal to industry judges at the Associated Schools of Construction Region IV Competition.

Iowa State University Team Places Third in National Construction Contest

Two teams of ISU construction engineering students competed at the Associated Schools of Construction/Associated General Contractors of America National Student Competition that was held in San Antonio, Texas on March 19 -22, 2007. One team competed in the design/build division and the other in the commercial division. With student teams from seven regions competing for the nation championship in three divisions, the two ISU teams competed in the “Final Seven” in their respective divisions. The design build team placed third with the judges commenting that the scoring was extremely close with only 0.7% separating first from third place. The commercial team did not place in the top three, but performed very well with the judges commenting that only a few percentage points separates each team.

The design/build team members are: Cory McDermott (team captain), Andrew Rotta, Kevin Heisdorffer, David Frischmeyer, Rachel Potthoff and Curtis Ehler (architecture).

The commercial team members are: Eric Lindquist (team captain), Daniel Frohardt, Josh Gaube, Nicole Bell, Tom Kinsinger and Clark Bowden.

The design/build team responded to a mock request for proposals for a \$55.2 million West Campus Student Housing Project for the University of Northern Colorado. The project consisted of a four-story and a five-story building which total 288,000 SF. The project integrated various green building techniques in order to obtain Silver LEED certification.

The commercial team competed in a project on the Alabama coastline called The Four Seasons at Romar Beach Condominiums. This was an existing complex consisting of two nine-story, post tensioned condominium towers. After Hurricane Rita hit a few years back, the building suffered significant damage and was condemned. Six months after the building was condemned, the reconstruction of the project was scheduled to begin.

The project consisted of demolition of the existing building, with interior demolition and repair being the majority of this work. The 72 tenants who owned condominiums in the tower were represented by a panel of 5 owner’s representatives, which the team had to cater to during the presentation. The competition was based highly on logistics on how to turn over the buildings as quickly as possible while maintaining positive

relationships with numerous parties (close-by next door neighbor, owner representatives, strict building code official, out-of-state architect). Some of the issues the team faced included how to handle tenant move in, keeping the next door neighbor happy, and how to phase the reconstruction of the exterior finishing system (part of the skin was in-tact, part was destroyed). The project cost came in at a little over 17 million, with a total duration of about a year and a half.

The design/build team was allowed twenty-six hours and the commercial team sixteen hours in a hotel room with six computers and four printers to develop a thirty-five page proposal, with the design/build team also producing eight architectural design computer drawings. Twelve hours later, all teams made a presentation in support of their proposal to a group of industry judges who were involved in construction of the actual project. The design/ build and commercial teams will each have two returning members and both teams should be very competitive in the regional ASC Region IV Student competition next October.

ISU faculty member Larry Cormicle coached both teams during the competition. Twenty-one student teams out of 210 teams nationwide, from eighteen universities competed representing construction engineering and management programs from seven regions within the United States.

Spring Break Mississippi Trip 2007

By Eric Lindquist

The Iowa State AGC student chapter sent 36 Construction Engineering students 1,026 miles south to Kiln, MS. Kiln, a small town of about 1500 people, is located about 10 miles north of the Gulf of Mexico. With great success last year, we decided to continue our relationship with Community Collaborations Inc. (CCI) by staying at their newest volunteer camp facility in Kiln. For seven days the CCI campground served as a base for the AGC group's Spring Break activities. Through private fundraising of over \$12,000, the ISU AGC chapter was able to send the entire group to Mississippi with 2 trucks, 3 vans, and a 24 ft. trailer packed to the ceiling with donated tools. The following is an account of just a few of the projects taken on by the AGC Student Chapter.

On **Friday**, March 9th, eight of the 36 Construction Engineers arrived at the CCI facility to start preparing for a busy work week. Leaders of the group spent a good portion of the day driving between the storm damaged gulf communities scouting potential projects. Through coordination with CCI's leaders, we were able establish the initial set of jobs for the group. Later that day the rest of the group arrived in the three ISU vans, eager to get started on construction. After an initial orientation with camp directors, the AGC group was set and ready for action.

Each day after breakfast, the group would meet outside the cabins to assign crews, as well as equipment and tools. Depending on the size and scope of the projects, crews ranged anywhere from 2-3 people to as many as 10 on the larger projects. The AGC group was always the first up at the camp, and wouldn't return each evening until around 6:30-7:00 pm. The first day was quite an experience for the first timers on the trip. The group got to meet many of the homeowners and hear firsthand about the struggles they and their families have encountered.

Saturday at 6:00 AM sharp the group was awake and preparing for the first work day of the trip. A crew stayed at the CCI camp to renovate portions of the camp and build a shower house for the 50 extra people the camp would be housing over the next few months. It was absolutely critical that this job get done early in the week so the camp could accommodate the large spring break traffic. Two members spent a full day cutting up trees at the CCI facility to use as firewood to heat the hot water at camp. The morning was slow as we continually struggled with keeping the saws running, but by lunch had them chopping at full throttle. At the end of the day the crew had cut up about nine trees and were ready for day two.

Another crew of two went to a Waveland, MS family's home that was almost completely done rebuilding. Their only major portion of renovation left was to install new kitchen cabinets. As imagined, after a house survives a hurricane nothing is left square or straight, which makes setting cabinets very challenging. After the cabinets were set, we constructed temporary countertops and installed their kitchen appliances. After a day and half, all that was left for this fortunate family were a few minor touches, and their home will be completely repaired.

Sunday saw many of the initial jobs continuing to their completion. In nearby Pearlinton, MS, numerous elevated homes and trailers were in need of decks and stairways to provide stable access. A crew consisting of students experienced with drywall was able to make significant progress on multiple interior jobs.

One of the cabins at the CCI facility required significant work. A skilled member worked on plumbing in a sink, shower, and toilet in the Spring Hill Cabin, while others framed and sheeted another cabin.

Monday a crew of eight went to a local man's home. His family had been living on his land for over 200 years. He was a outdoorsman who enjoyed riding and taking care of his horses prior to the hurricane, but his barn was almost completely torn down when the storm surge hit. Using recycled lumber he was able to gather enough materials to completely reconstruct his barn. AGC was able to finish the entire barn in a single day, and was lucky enough to be treated to Randy's special crawfish recipe as a thank you for our work.

A one man crew continued work on plumbing the Spring Hill Cabin at the CCI Facility.

Another large project was begun -- the reconstruction of "Big Steve's" home. This particular home was completely torn off its 8 ft timber piles. A crew of 5 AGC members were able to splice new piles to the existing piles, effectively raising the entire home's structure to the code-complaint 14 ft. Big Steve lived a mile or so inland, but the devastation had still occurred. His house was destroyed by a 40 foot boat that crashed into it when the water rose from the storm surge. Big Steve was one of those guys that didn't say much, but he was real easy to like. We could tell what we did for him was definitely something that he felt he couldn't tell us thank you enough for. We worked hard for six days and did not receive a single dollar for our efforts, but the gratification in knowing that we started what would be a man's new home was worth more than any paycheck I could have received. We started work on the house on Monday and this process took all day Monday and most of Tuesday to complete.

Another crew of two went to Waveland to a elderly woman's trailer home to do some work. Her home was also nearing completion. While there, we were able to set the upper kitchen cabinets, bathroom vanities, and medicine cabinets. We also installed some crown molding, but were unable to get very far simply because of time. Even though we were unable to finish the crown molding both she and her son were extremely appreciative, and it was a pleasure working for them.

Tuesday was the start of one of the largest projects during the week. Augusta Acker, an elderly woman living no more than a few hundred yards from the ocean, was hit especially hard by the storm. Her entire home was destroyed in a surge of over 20 ft of water. When

AGC showed up at her lot, all that was there was a slab on grade and a set of plans. Over the next three days, a group of six and a few students from Boston were able to completely frame all exterior and interior walls of the home. The work literally brought Ms. Acker to tears, calling the AGC students her "angels."

Wednesday a crew of five set out to drywall a couple's home that had been completely destroyed in the storm. On the way, we made a quick stop at an elderly man's home, located less than a mile from the coast, to assess what materials would be needed to rebuild his storage shed.

After the shed estimate was completed we continued on towards our drywall destination. Ray's house was a 1000 SF home with nine foot ceilings and every room was waiting to be rocked. The crew started in a corner bedroom and after manufacturing some homemade ladders, put up the first sheets of rock on the ceiling. Members from other crews began showing up so we split into two rooms to get more rock up. With the late start on the home the crews worked late into the evening and didn't pack up until 8:30 that night. The owners couldn't believe the crews wanted to keep working and were so thankful for the help. Ray's wife said God had sent them angels and that they wouldn't know what to do without the AGC students.

Also, on Wednesday, we lost power after a few hours of work. The power was restored several hours later, however, several crew members had been dispatched to other jobsites. The crew that stayed on-site was able to notch the top of the 16 foot timbers and place one of the stringers before the day was done.

A few more members lent a hand at a project where a house had been completely destroyed. Working alongside half a dozen volunteers from California, AGC members helped to add a deck to a 20' x 40' garage that had been skillfully transformed into a home. Times of crisis really show the ingenuity people can exhibit.

Thursday the framing of Ms. Ackers' home was completed. She was absolutely ecstatic about the work we were able to do. (The work AGC accomplished certainly didn't go unnoticed. A local television news crew from nearby Biloxi came to the jobsite to highlight the work.)

A crew of eight continued Ray's drywall work and completely finished three bedrooms, a large dining room/living room, and the ceiling of the kitchen. Before any of the AGC students could leave the home Ray's wife made

sure to give each and every one of us a hug and thanked us for our help.

We worked to finish the first floor sheathing at Big Steve's so it would be ready to frame. We set the other stringer and began laying joists. As we were finishing up the sheathing, Big Steve came home and watched us as we worked until the daylight was gone. No sooner did we nail the last sheet of plywood and snap a few pictures, when the sun sank down and the clouds opened up, pouring rain everywhere.

Friday saw the bittersweet end of the 2007 Mississippi Spring Break trip. While the group was excited to return to Ames to finish up the semester, we were sad to have to leave our temporary home in Mississippi. In the seven days we were there, we were able to put in over 2000 manhours of labor for local residents in need of help. We met some amazing people and heard some stories that we will never forget. This trip undoubtedly was the highlight of our college experience and is something we will never forget. It was quite a humbling experience to be able help out in an area so desperately in need. While it was unfortunate we could only stay for a week, there is a promising future for AGC Spring Break Relief. CCI is taking it upon themselves to spread the word about the work our student chapter put in over the past 2 spring breaks, in hopes of bringing other student chapters from around the nation. It is such a benefit to the CCI organization and the Mississippi communities to have a crew of experienced construction workers that can take on and deliver substantial work.

ConE students that participated in the trip included:

Clark Bowden	Adam Brainerd
Luke Daugherty	Daniel Frohardt
Brandon Gries	Mike Grim
Justin Gross	Matt Harder
Wally Hudyma	Brian Johnson
Eric Lindquist	Zach Loy
Mark Taylor	Jay Mathes
Cory McDermott	Jessica Meredith
Patrick Mulloy	Ryan Paul
Brad Paulsen	Eric Peterson
Eric Poland	Rachel Potthoff
Kelsey Powell	Blake Pratt
Cole Qualheim	Cliff Rhoads
Nick Roberts	Bryan Schmidt
Zach Smith	Nathan Steffes
Mitch Stoullil	Landon Streit
Andrew Tribble	John Vonnahme
Dustin Worthington

SIGMA LAMBDA CHI

Sigma Lambda Chi is a National Construction Engineering Honor Society that recognizes outstanding students in construction. Students who have completed at least two years in a construction based curriculum and have an overall scholastic average in the top 20% of all students in the program are eligible to join.

Sigma Lambda Chi held two initiations this past year, one this spring and one last fall for 13 new members. In addition, Sigma Lambda Chi held several monthly meetings throughout the school year, helped with transfer student class registration both semesters, helped peer mentors evaluate Learning Community presentations, and held several social activities.

This year, nine Hotel Lego presentations were entirely by Sigma Lambda Chi members to prospective high school, middle school, and elementary students. Members explained what construction engineering is at Iowa State and then allowed the students to act as construction engineers (on a smaller scale). Each student was provided a blueprint which they used to construct a miniature hotel. Hotel Lego presentations provide a learning experience for both parties.

NAWIC BLOCK KIDS COMPETITION

Rachel Potthoff (*in front*), Jessica Meredith (*behind Rachel*) and Brittany Horak (*right*) present a skit on safety.

On April 28 the Greater Des Moines Chapter of the National Association of Women in Construction (NAWIC) held their annual Block Kids competition. The chapter hosts approximately 30 kids from 1st to 6th grade. The competition requires each child to build a structure with 100 blocks (Legos) and the option of a few other materials including a length of string, aluminum foil, or a piece of tag board. Each child is interviewed by the judges about their structure and the winning project goes on to the regional level. This year the winning structure was a house with solar panels, a satellite dish, and a handicap accessible elevator.

Before and after the competition the chapter sets up stations for the kids to rotate through to learn more about construction. This year Dr. Jennifer Shane and three ConE students participated in the program. The students, Jessica Meredith, Rachel Potthoff, and Brittany Horak, developed and presented a skit to teach the children about safety on the job site. The students also played “telephone” with the competition participants to introduce the importance of communication in construction. Other stations this year included making and decorating paperweights made of mortar, building with Legos, and fun with hammers and drills.

A few of the Block Kids participants

Other Opportunities for ConE Students

VEISHEA is an annual celebration held at Iowa State each spring, and one of its oldest traditions. It's planned by students and serves as a showcase and display of the Iowa State community with a wide variety of educational and entertainment events. This year marked the 85th year of VEISHEA, and served as the kickoff for the University's 150th Anniversary celebration.

Larry Cormicle again served as the adviser for engineering students building the College of Engineering's

VEISHEA float. The students were all members of the Freshman Leadership in Engineering (FLiE) student organization. The theme for the float was "Moving Through the Ages", and featured an aircraft, Model T, sports car, and horse and buggy, as well as a birthday cake to celebrate the University's 150th Anniversary.

The Mechanical Contractors Association, student chapter booth at VEISHEA. Brian Steffens (*far left*) and Luke Wall (*far right*) talk with students about activities and job opportunities.

All students have the opportunity to study abroad if they so desire. Iowa State assists students in finding a program and financing that suits their situation. Many ConE students take advantage of this opportunity to have an adventure, get some language skills, challenge themselves, gain experience in their field while living abroad, gain exposure to other cultures and academic systems, and much more. Nimota Nasiru, a ConE junior from Chicago, IL, did a study abroad semester at the American University in Cairo, Egypt. Here Nimota experiences a ride on a camel.

Con E Internship Program Sets Record

Participation in the internship/coop program by construction engineering students for the summer of 2007 is at record levels with one hundred twenty-two (122) students participating. This is an increase of 26 percent from the summer of 2006, and an increase of 114 percent from the summer of 2005.

Many of you have been hiring our construction engineering students for years as summer interns, with great success in hiring new graduates a year or two later. My personal thanks for your continued support of the intern/coop program. For those of you that have yet to recruit our students for intern assignments, consider adding our program to your hiring goals and begin recruiting this fall for next summer's interns. With our undergrad enrollment approaching 360 students, you will find almost every student looking for that intern position.

The internship and coop program for construction engineering students is a great way for employers to begin recruiting our future grads. Many of our recent graduates accepted their first job with an employer that they worked for at least one term as an intern.

Many employers prefer to hire students as interns for either a summer, or for an eight month period covering either the spring and summer semesters, or the summer and fall semesters. Whether a three- month summer-only, or an eight-month two-semester term, employers are increasingly finding this intern or coop arrangement the best way to find future new graduates.

The overall program is administered by Engineering Career Services within the College of Engineering. Check out the below web site for more information for employers:

<http://www.eng.iastate.edu/ecs/employers/employers2.html>

The program is provided at no cost to either the student or the employer. The reporting is simplified and is paperless using a web-based reporting system. Students and employers will find the reporting process quick and easy at the end of the student's intern/coop work period.

We are asking all students that have a summer intern position to formally sign up for the internship program. Many students that work the three summer months as an intern have elected to not sign up for the formal program. In the ever tightening budget situation at ISU, the more we can document the summer intern experience, the more successful we will be in obtaining the financial resources for our program. As employers we ask that you strongly encourage your intern employees to participate in the formal intern/coop program. Their involvement begins with a short meeting with me as the faculty advisor of the ConE intern/coop program. Our goal is for the number of students to increase to over 200 students for the summer of 2008. Your support would be greatly appreciated. Just as a side note, for the entire college of engineering there are 590 summer intern/coop engineering students enrolled for the summer of 2007, which make the construction engineering total of 122 almost 21 percent of the entire college of engineering.

ConE Reunion

Join us again this year at Prairie Meadows
for the ConE Reunion.

Thursday, October 18

5:30 - 8:30 pm

Prairie Rose Room

Join old friends, classmates, and
colleagues for drinks and heavy appetizers

Watch your mail for an invitation with
event details.

BS 1966

Peterson, Cork (Becky) Peterson Contractors, Inc
Todd (ISU '93) Box A
1009 Blackhawk Reinbeck IA 50669
Reinbeck IA 50669 319-345-2713 x 204
319-345-2713 x 204 cork@petersoncontractors.com
cork@petersoncontractors.com

PCI is doing a lot of work on ethanol plants, having worked on over 50 plants the last five years. We do the site work and also install a lot of Geo Piers for ground improvement.

Becky is planning a new house so I am sure it will be Cork's Biggest Management Challenge to date.

I always enjoy the time spent with ISU staff and students as I still serve on the Advisory Committee.

Wedewer, Thomas E. "Tom" (Ann Webb)
3-children, Self-employed
5-grandsons Las Vegas, NV 89134

Still involved in consulting assignments from Hurricane Katrina; also litigations from Texas/2002.

BS 1967

Raufaste, Noel (Lynn Raufaste) Knowledge Access
Noel (34) and Services International
Colleen (32) 10301 Armory Ave
10301 Armory Ave Kensington MD 20895
Kensington MD 20895 301-467-6767
301-9494-4298 nraufaste@erols.com
nraufaste@erols.com

President, Knowledge Access and Services International (KASI). Retired from the National Institute of Standards and Technology (NIST) in 1999. Currently serve as NIST Emeritus and NIST Guest Researcher. For the National Science and Technology Council, Office of Science and Technology Policy co-chaired and published, Grand Challenges for Disaster Reduction, a ten year plan to make America more disaster resilient, June 2005. Chaired and developed Grand Challenges' strategic and implementation plan for 16 disasters (natural and technological), expected publication July 2007. Remain active in consulting through KASI such as working with 1) the NAS/NAE

Board on Infrastructure and Constructed Environment and chaired Research Challenges for Federal Facilities Needs, 2) the Government of Japan, and 3) others.

Planned and completed our 39th Joint Meeting of the US-Japan Panel on Wind and Seismic Effects, Tsukuba, Japan. Serve as volunteer in activities such as: ASCE's Editorial Board, Journal of Construction Engineering and Management (chaired by ISU's Department of Civil, Construction and Environmental Engineering), Vice President of NIST's Alumni Association.

Wife, Lynn has completed her 5th term as Mayor, Town of Kensington, Maryland, June 2006. We continue to renovate our house in the foothills of the Pyrenees, SW France. Two children; Noel IV 1995 ISU graduate and Colleen (UMD). Always interested to hear from anyone wanting to take the time to send a note.

BS 1968

Alm, Don (Jennifer) Retired
Kirk (34)
4713 NW 151st St
Vancouver WA 98685
tkl1119@aol.com

We continue to enjoy retirement. Wood cutting and gardening on our acreage, taking our boat up the inside passage in the summer, and traveling.

Professionally, Don owns a minor share in a local contractor and serves on their board.

BS 1971

Gordon, Joseph (Sally)
8133 Pheasant Run
Fogelsville PA 18051
610-398-7989
gordoni22@aol.com

Since retiring from PPL Nuclear in 2002, Joe had a delivery job for four years and after that is now on the staff of a local golf course -- Iron Lakes Country club!

Sally is a direct sales consultant for Tastefully Simple, a gourmet food company. We just can't seem to stop working at something!!

We enjoy spending time with the grandkids, some traveling, golfing, home projects and just enjoying the 'golden years'!

Our deepest sympathy to Tom Jellinger on the passing of Ro; she was a very, very special lady who we loved dearly. May she rest in peace and may God give Tom the strength to get through this difficult time.

Norby, Ron (Vicki) Hensel Phelps Construction Co.
Eric (24); PO Box O

Lewis, Dennis (Kathy) Design Forum
Marissa (26) 7575 Paragon Rd
Jessica (24) Dayton OH 45459
2010 Kitty Hawk Dr 937-312-8779
Xenia OH 45385 dlewis@designforum.com
937-376-1080
dkmjlewis@woh.rr.com

Kathy and I survived last summer and are settling in as empty nesters. Marissa and Brian got married last June on one of the hotter days of the year - an outdoor wedding, of course. She still teaches, works at the toy store and during the summer is a receptionist

at the insurance agency with Kathy. Jessica moved to Cincinnati in the fall where she is now a technical illustrator for Lockheed Martin.

I returned to Iowa for the first time in over 25 years for a field assessment of the mechanical/electrical systems at Homemakers Furniture in Urbandale. We are designing a renovation/expansion that will increase the floor area by around 150,000 SF. Construction is planned to start later this summer. I should be making several trips for CA services over the next 18 months. Still working on roll-outs, but just started on a Penney's store in Manhattan (NY-not Kansas).

Walter, Jr., John F. (Donna)	Lueder Construction
Jennifer (32)	Company
Andy (30)	9999 J Street
7914 Barbara St	Omaha NE 68127
Omaha NE 68124	402-339-1000
402-393-2564	johnw@lueder.com

Senior Estimator - 5 years from retirement and hoping that I won't be overtaken by technology before then.

My wife and I are happy that our kids are successfully on their own - one has three degrees and the other one degree. One has inherited a scientific detail oriented estimating outlook and work ethic while the other is more go with the flow and artistic. One is married and the other is not. No grandkids. We remember that no matter how old they are, they are still your kids.

Donna and I have been riding a tandem bicycle for the past seven riding seasons (16,000+ miles) and have been dancing for the last three. I golf only once a year at the company superintendent's meeting and that's too much. A famous bicyclist once said that golf is not really a sport.

That "MS" degree of mine is really an MBA which I had hoped after 20 years in construction would get me out of construction and didn't.

BS 1973

Flatland, Ray (Ellen)	Jones Lang LaSalle
Kelsi (17)	One Front St Ste 300
Ryan (15)	San Francisco CA 94111
806 Prowshead Ln	(415) 395-4945
Foster City CA 94404	ray.flatland@am.jll.com
(650) 678-7055	
ray.flatland@am.jll.com	

After 11 years with Jones Lang LaSalle things are still exciting. In addition to developing a new station

for BART in the Bay Area, Ray is heavily involved in consulting with the Army and Air Force on their privatization of family housing. This initiative is reconstructing over 100,000 homes on installations around the country. Our role is to advise the military in their negotiations with private developers and to assist in monitoring project performance.

Gilbert, Dennis (Michele Aspelund Gilbert)
 Seth (37) The Weitz Company
 Britta (33) 5555 E. Van Buren St Ste 155
 Hanna (31) Phoenix AZ 85008
 4901 E Kelton Ln #1081 602-283-0570
 Scottsdale AZ 85254 dennis.gilbert@weitz.com
 480-907-4425

Promoted to Construction Manager last year in the Southwest Business Unit of Weitz (along with Trent Mostaert, Class of 1994). Very busy here in Phoenix, especially in condominium construction. Weitz is constructing three significant condo projects in downtown Phoenix, including a 34 story, 202 unit, \$80 million tower that will be the second tallest building in Arizona when completed in March 2008.

On the personal front, got remarried to a lovely lady last July and we are enjoying life in Scottsdale. With work, new marriage, and of course, getting older, my golf game has suffered but still enjoy playing when I have the opportunity. We continue to get some great young talent from ISU Con E and hope to keep doing so.

Jochimsen, Ron (Carol) The Boldt Company
 N4417 Sandstone Ct Oscar J. Boldt Construction
 Appleton WI 54913 2525 N Roemer Rd
 920-733-0051 Appleton WI 54911
 n4417joc-lgroups@ yahoo.com 920-225-6127
 ron.jochimsen@boldt.com

Ron continues to be Quality Process Manager at Boldt, but has moved from corporate to Boldt northern operations to support management of construction for critical national infrastructure. This new work is challenging and involves application of Ron's Construction Engineering, MBA and other degrees. Construction is a wonderful career in that there is always something new on the horizon.

 Roger@RDC-Inc.com

Another year has passed away, and new things are on the horizon. I felt that when I left corporate design world I would not go back. But over the past three years I have developed a relationship with another Midwest (Illinois) Architect/Contractor/Developer living in Israel and we have establish an International Practice. Lome Repstien Architecture LLC, based on project size, according to David, the firm has now become the 10th largest in Israel. So now we will see what the next year has in store.

BS 1975

Miller, Albert (Lois) Henry H. Lewis
 Bridgette (17) 55 Gwynns Mill Ct
 Katie (16) Owings Mills MD 21107
 19 Patricks Ct 410-356-4200
 Parkton MD 21120 wmliller@hhlewis.com
 410-239-6952
 wmliller@hhlewis.com

Family & business has been fine. Company will have record volume (with profits) this year.

Bridgette has decided to come to ISU to major in

Construction Engineering. Her father is very happy and proud.

Lois continues' working at Buxton Dickinson and has been traveling a lot. The past year Lois and I were on a 2 week cruise in the Mediteranean. Everybodys health is fine. If any ConE is in the Baltimore area, please get in touch!

scott5723@comcast.net

I am still employed by Kaweah Construction Co. (since graduation in 1975) working in California building water and wastewater treatment plants. Our company is part of the Lyles Construction Group consisting of W.M. Lyles Co., Kaweah Construction Co., and American Paving Company all headquartered in Fresno, CA. All three firms hire interns and graduates in Con E, Civil, and CM and I would encourage any students interested in employment to contact me.

Singelstad, Jon (Pearl) Monona County
1310 Jasper St 610 Iowa Ave.
Onawa, IA 51040 Onawa, IA 51040
712-433-1443 712-433-2284
mocoeng @longlines.com

I am the Monona County Engineer. This past year I was privileged to again work with Cedar Valley Corp., (ConE grads Steve Jackson, Willie Calderwood, and Matt Proctor) on Monona County E54. This 5.3 mile 8" PCC paving project was rated as the "Best" County PCC Paving project in Iowa during 2006.

Thompson, Don (Marla) US Steel Corp -Keetac Mine
Adam (27) Keetac Mine Box 217
Marc (22) Keewatin MN 55753
215 11th St S 218-778-8697
Virginia MN dhthompson@uss.com
218-749-3719
don.marla@mchsi.com

I am currently Area Manager, Mine Operations. Our operation has about 400 employees. We currently drill and blast about 25 million tons of crude ore and rock and move about 50 million tons annually. We supply about 6 million tons of iron ore pellets for

blast furnace feed to US Steel mills near Detroit and St. Louis. We have also shipped some product to Mexico, Eastern Europe and China. Our greatest accomplishment was receiving 2005 MAHA Sentinels of Safety Certificate of Achievement for working 294,662 hours without a lost time injury: Three years without a MSHA lost time accident; one and one half years without a MSHA recordable accident.

My wife Marla works for the local news paper as a graphics artist. Our oldest son, Adam, is a Civil Engineer for Amec Engineering in Eveleth, Minnesota. Our youngest son Marc is a senior Studying Chemical Engineering at the University of Minnesota, Duluth Campus.

I am planning on retiring in December.

BS 1976

Flannery, Nick (Betty) U.S. Army
704 Grosvenor Dr 8000 Cp Robinson Rd
Sherwood AR 72120 N Little Rock AR 72118
501-834-0863 501-771-7952
nidafl@aol.com Nick.Flannery@us.army.mil

Nick works for the Army as a Dept. of Army Civilian. He works for a Command that covers 5 states and over 200 Reserve centers. His position as General Engineer keeps him busy with BRAC, Military Construction and maintenance/repair projects.

Nick and Betty have just begun construction on a new energy star house in Hot Springs AR expected completion is Dec. Retiring for the second time is getting close.

Graeve, Wayne (Janet) USDA

3433 Scenic Valley Dr 515-663-7216
West Des Moines IA 50265
515-225-3801 wayne.j.graeve@aphis.usda.gov
w.graeve@mchsi.com

What would happen if everybody in the class of '76 responded to the Erector Set appeal. We would hear from Ike, Jeff, Steve, Martin, etc. It would be great.

I continue to serve as the Chief Engineer of the National Centers for Animal Health in Ames. The government turned over a one-of-a-kind building to our facility group this month. It is a \$70M high containment animal barn. Dedication is on July 3 with lots of interest. Lots of problems to solve for my group.

Janet is recovering from a hand infection and has

been away from work for a few months with no end in sight. I like having her at home after all these years of working. She continues to be the voice of Dr. Graeve on the radio on Tuesday mornings, STAR 102.5.

Caroline will make us grandparents later this year. She just finished her first year teaching science at Southeast Polk HS. Go Rams! Husband Ryan is working on his PhD at ISU at reading about babies.

Jimmy has come into his own as a college student. Getting great grades as a Spanish major at Central College. He will spend the fall semester in Granada, Spain. We will miss him but are excited for him. Fiancee Andi is studying business at UI. She has red hair like Janet, so I liked her right away. They will get married after both graduate honoring their parents wishes. It's great to have kids and family.

As Vice President and General Manager at Mortenson, my responsibilities include leadership and management of Mortenson's Minneapolis Office. It's been a busy year as we began construction of both the new Minnesota Twins Ballpark and the U of Minnesota RF Banc football stadium this summer.

Sue and I begin the empty nester period of our lives this summer as our youngest one, Blake, graduated from Eden Prairie High School this spring and is headed to U of Wisconsin (Madison) to play football.

I look forward to sharing my thoughts with the

ConE department as a newly appointed member of the ConE Industry Advisory Council.

My fifth year as a ConE faculty member was better than ever. Our students are great to work with and I find them some of the brightest young professionals that are entering into our industry. I will again be teaching three courses per semester and advising the AGC Student Chapter and acting as the coach for our four ASC Student Competition teams. The highlight

of the year and of my teaching career was being the recipient of the AGC of America 2007 Outstanding Educator Award. If any of you travel to Ames for personal or recruiting reasons, stop by and say "Hi".

On a personal note, I am beginning my fourth year as the chairman of the building committee at my church as we have planned an addition and extensive remodeling. The project is now under construction with a scheduled completion of March 2008. The project manager and project engineer are both ISU ConE alumni and work for Story Construction.

For the last few years, I have been contracted to CPMI, a construction management and contracting firm with offices in Des Moines, Iowa and Minneapolis, Minnesota. I am presently in the close-out stage of a \$370 million private-public development in Kansas City, Missouri. We are contracted as consultants to the General Services Administration for a consolidation of facilities for the Internal Revenue Service that was a Design-Build, Guaranteed Maximum Price, privately financed and publicly leased project. Under budget and ahead of schedule are both credits to a very cooperative project team. I am in the process of heading back to the Des Moines office for projects yet to be determined.

Rita is involved with the Community Education and Early Childhood programs for the Johnston Community School District.

Breehan is involved with public relations for the Ames Lab at Iowa State University and is getting married in August.

Logan has graduated from ISU with a degree in Finance and is starting work with the Principal Financial Group in Des Moines.

pgrablin@yahoo.com

My ConE background and experience has come in handy this last year. I haven't supervised a project since 1985, until now! In March of 2006 we demolished our waterfront home and built a new home that should be hurricane "resistant". Having been an eye-witness to hurricane Andrew in 1992, I am very hesitant to say that anything can be hurricane proof!

We started construction of the new home in April of 2006 with the placement of 53-40ft long augered piles. The piles were capped with 2.5ft thick reinforced concrete pile caps and tied together with 16" square reinforced concrete grade beams. The multiple columns were poured from the pile caps to the level of the beam soffits of the first elevated floor. Then came the slab on grade. (An aside! It is hard to describe the BS that Manatee County, FL can do to screw up a good project. They do not even have a real engineer in their building department. I had to restrain myself from speaking my mind in order to facilitate the continuance of the project.)

The house is all reinforced concrete with two elevated cast-in-place reinforced concrete slabs and concrete block construction. All the windows and doors are PGT hurricane glass. The weak part of the house, in my opinion, is the wood trusses. I helped to reinforce those with structural spray foam insulation, which is also very energy efficient. My heat load had to be recalculated after the increase in R value from the foam. For aesthetics and durability, we chose a metal roof, but one that has the appearance of barrel tile. It also has a rating to withstand winds in excess of 230mph. I hope that it is never tested to that!

My neighbors have all said that they want to come to my house if a hurricane hits! We also have an emergency generator to provide power for the hurricane party! The house, thanks to the delays of the county, should probably be complete for us to move into by the time this is published. For those of you who know me, please come by to visit. We'll have plenty of room if you have the time to stay for awhile!

Karin and Max are doing well. Max is a lot of fun and teaching mom and dad new stuff almost daily. Thanks to him, I have an improved knowledge of the solar system. Karin is helping millionaires to invest wisely for retirement planning. She has two partners that she enjoys working with so enjoys going to work. Unfortunately, she continues to work when she comes home. I haven't figured out her "off" switch, but I suppose she can say the same about me.

Monique continues to work on the Elm Road Generating Station (ERGS) project near Milwaukee, Wisconsin. The project is a \$2 billion (lump sum), two unit 1230 MW pulverized coal power plant. There are two other ISU graduates working on this project, the site manager, Jim Betts, civil engineering and Rick Flathers (ConE '81).

Below is a picture of Elm Road Power Block, by Lake Michigan, where unit 1 boiler structure (257 ft height) is on right side, and starting to build unit 2 on the left side. Stack (550 ft height) is in the background.

Paul completed his assignment on the Tacoma Narrows suspension bridge in Gig Harbor, Washington. Grand opening is scheduled for July 15, 2007. He is now working on the Elm Road Project.

Things have finally settled down here in Florida, after several years of repairing hurricane damages and the building boom. Building codes have gotten more stringent, through this period and the engineering of our products has changed. To meet this demand we've started an engineering company to do structural design.

We still spend lots of time on the beach and on the golf course. All is well but looking forward to the next building cycle!

Martens, George (Linda) Iowa Department of

 rpssanman@aol.com

It will be 26 years this August since my graduation from Iowa State University. A couple of months after graduation I began working for Peter Kiewit Sons', and now as the V.P. and District Manager for Peter Kiewit Sons' Denver District, I'm amazed at how much time has passed! I have a very rewarding career, but my life outside of my work is definitely the most rewarding.

My wife Teresa who is now retired and loves the game of golf like I do works hard to keep me plugged in to a good life/work balance. When I'm not traveling on business, we like to spend quality time with each other and our kids.

We have a 22 yr. old daughter Jessica who is married and lives in Phoenix, AZ, and a 20 yr. old son Matthew who attends Montana State University, and is currently working for Kiewit as a summer intern while on break.

I cannot end this without mentioning my proudest life event of this year, which is the birth of my first grandchild. Michaela Rose made her way into the world on April 20th and if I say so myself, she is the most beautiful baby I've ever seen! Needless to say, at just 2 months old she already has her 'ole gramps "wrapped". Thankfully, life has been good for this ISU Alumni.

 arktkiaia@sbcglobal.net

It's been a busy year, and the months ahead look to be even crazier. We're in the midst of design for two community centers here in Saint Louis that will be LEED certified, and there are more coming after that. I've even been selected to do a presentation about LEED in sports and recreation facilities at the Athletic Business Conference in December. Please keep the heckling to a minimum.

On the home front, we have begun making campus visits; Jonathan will be a junior this fall. Andrew just likes going along for the fun. And we're filling our lungs with fresh country air in July: the family is going to ride RAGBRAI. It's been a few years since I last did it.

We have a number of summer interns this year, alas, none from ISU. Each year, we hire construction, mechanical, civil, electrical, structural, and architectural students, so it would be nice to see some applications.

Parsons, Mike (VaLinda) Iowa State University
 Meredith (18) Facilities Planning and Management
 530 River Oak Dr Ames IA 50011
 Ames IA 50010 515-290-6025
 515-663-9129 mparsons@iastate.edu

As we graduated from ISU in 1982...a new television company called Home Box Office (HBO) is born in March; E.T. tops the box office with \$310 million in ticket sales; Late Night with David Letterman premieres in February; Yale University announces it will offer a 14-week course on mastering the Rubik's cube; first issue of USA Today hits the newsstands; Tylenol scare kills seven people, spawning childproof bottles and John Belushi found dead from drug overdose. Now as Meredith begins studying at the University of Iowa this fall, we think about how college freshmen view the world: TOP TEN 10. The Soviet Union has ever existed and therefore is about as scary as the student union. 9. They have known only two presidents. 8. Formost of their lives, major U.S. airlines have been bankrupt. 7. Thanks to pervasive head phones in the back seat, parents have always been able to speak freely in the front. 6. They have grown up getting lost in "big boxes". 5. Acura, Lexus, and Infiniti have

always been luxury cars of choice. 4. They have rarely mailed anything using a stamp. 3. They are wireless, yet always connected and text messaging is their email. 2. A coffee has always taken longer to make than a milkshake. 1. "Google" has always been a verb. (see <http://www.insidehighered.com/news/2006/08/23/frosh> for complete list).

Shuba, Mike (Judy) M.J. Electric, Inc
Matt (22) 1200 Roosevelt Rd
Megan (21) Glen Ellyn IL 60137
1450 Farington Ct 630-613-3304
Naperville IL 60563 mshuba@mjelectric.com
mshuba@mjelectric.com

Mike is a Vice President with M.J. Electric, a subsidiary of Infrasource that specializes in high voltage electric construction and maintenance. 2006 was a very busy year and 2007 looks to be the same. This is an exciting time to be in the electrical construction business; new opportunities seem to occur daily.

Mike and Judy have just seen their oldest child (Matt) graduate from college and get commissioned as a Second Lieutenant in the US Army. Their youngest (Megan) is attending college in California.

Welker, Sherman (Rochelle (Roe))
Kendall (21) Welker Construction Company, Inc.

Christopher (11)
1329 Skyline Dr bschwab@buildingvaluepartners.com
Winona MN 55987
507-452-3637
bschwab@hbci.com

On the work front, the last year has been very exciting. In the fall of 2006 I left Schwab Company and started a firm focusing on Building Information Models. We build models for designers and builders, we host and manage models on our website, we do custom implementation plans and custom training, and soon will be adding parametric object creation for manufacturers. It is always slow starting a new business, but I think we are gaining momentum and prospects look good.

On the home front, things are steady and busy. My wife and I celebrated 22 great years together in June. We also count all of our kids as blessings from the Lord. Our family is changing this year, though, as we are sending our oldest son off to college in the fall. We will all miss him, but we expect our other three kids at home to keep us busy. All in all, following

Jesus these 24 years since graduating from ISU has been very good.

I am still at Rockwell Collins in Cedar Rapids. My current position is Sr Engineering Manager and I work in the Government Systems business area. We build cockpit systems for our customers, primarily the US DoD and foreign military.

This past year I went back to ISU twice for career fairs and recruiting. It was great to be back on campus. My family keeps me busy these days. I spend a lot of time attending their sporting and school events.

Paul continues working at Ryan Companies as Director of Project Development, primarily chasing new work and coordinating pre-construction activities on Mission Critical, Health Care and Corporate projects.

Spare time is spent coaching the kids' sports teams and volunteering as Chairman of our church and the kid's school.

Carol spends most of her time carting the kids around to their activities and volunteering at their school (her latest official position is Head Librarian).

Marc (24 yrs) is graduated and gainfully employed with a local accounting and business coaching firm. He is also helping his fiancé, Ann prepare for their upcoming wedding in September. Dan (13 yrs) lives for sports (basketball is his main passion, but he also enjoys soccer and cross country). Nate (11 yrs) also enjoys sports (basketball, football and baseball), but still loves to help dad with projects around the house and cabin.

The number of ISU inters and alumni continue to grow at Ryan Companies as it is a great place to work!

Greetings from Marshalltown! Can you believe the class of '87 has been out for twenty years now? John recently took a job with Hay Construction Services (Steve Hay, ConE '77) located in Marshalltown this past Spring. He is currently working on a new Technology Development Center for Fisher Controls. What a great addition for Marshalltown.

Connie is working for the Marshalltown Community School District which allows her to mesh nicely with the kids vacation and school schedules. The kids enjoy the sports scene - volleyball, basketball, swimming, softball, golf, and baseball. Have a Great Year!

Rod Hoffman is a Senior Vice President for HDR, an employee-owned, A/E consulting firm with 6,200 employees located in 160 offices throughout the United States. He serves as the firm's National Director of Strategic Planning and Acquisitions. Rod is a registered Professional Engineer in Colorado and holds a Master's degree in Geotechnical Engineering from Iowa State University. Rod has over 22 years of experience (all with HDR) with a broad base of expertise ranging from designing small municipal improvement projects to managing large international airport design and construction work. His career has varied from engineering, design, and management to business development, training, strategic planning, to mergers and acquisitions. Rod has served on the ACEC National Executive Committee as Senior Vice Chairman, is an ACEC Fellow, and is the current Chair of ACEC's Institute for Business Management committee. ACEC is the organization that represents the business interests of private consulting firms throughout the United States.

Family life continues to be very busy. Amanda is starting high school this fall. She is in competitive marching band and has started playing tennis. Stephanie is joining the swim team and continues to play soccer with a traveling team (Morton Blaze). Kaitlyn is involved in tumbling and more recently has developed a strong interest in riding horses. Angela is busy working for PTAC and between the two of us we manage to shuttle the kids to where they need to go. I have decided to finally make time for myself by taking up golf.

My career at River City continues to be a fulfilling one. Last year I was promoted to the first ever Director of Pre-Construction Services.

With the home building industry sales at a very slow pace (flat in areas of So Cal) I am, as a Director

of Operations in our Metro Communities (high-density/podium urban-infill condos), still weathering the storm, surviving mass 2006 layoffs, recent 2007 cutbacks, wearing many hats, spinning many plates, reporting to 2 or 3 different bosses, and just started my 21st year out here in California since ISU ConE. Not much changes hugely in this roller-coaster construction industry. Sometimes I am looking to deviate from the above for the next 20 years! Yours truly, Rock

It's been a few years since my last update and a lot has happened. The big items to mention right now are: 1. The kids are growing up really fast - I know that happens to everyone, but it's amazing to me - Marcus will be in High School this fall, Caitlin in middle school and Anna is running out of elementary years soon. 2. Last fall Level3 Communications acquired my former company (Looking Glass Networks) and I've recently been promoted to Sr. Vice President in charge of our Network Development department. We'll be moving to the Denver area this fall. 3. Our golf course (Lake Ridge GC in Beaver Lake, NE) is doing better every year. We're co-owners of the course and Rose manages the clubhouse several days of the week. It keeps both of us busy and we're breaking ground on the new clubhouse in July.

I hope all is well for everyone out there and would love to hear from you. It's probably easiest to track me down via the work email address if you get a chance. Take care and keep smiling, Dan

I am on year 6...building a Kaiser Hospital in Santa Clara, CA. But I see light at the end of the tunnel

becuase I am taking six weeks off starting Sept 1st. I am going to spend a month traveling with friends through Europe. And then another two weeks in Chicago to take a long over due break to recharge!

Employeeed by in house construction department of the Walt Disney Company performing construction on new projects associated with theme park, resort, and water park operations.

I have now been on vacation leave for a little over 4 years and love it. I do get to keep in the construction loop listening to Andy and all of his work stories - which most of the time make me happy to be at home. The girls and their activities keep me sufficiently busy. I also spend my time volunteering at school. I jumped off the deep end this year and volunteered to be Brownie Troop leader for the coming school year. How old do the girls have to be before taking them on a jobsite tour?!? Hi to all my ConE alum friends!

After ten years of being onsite as a PM, I have made the move to the office. As a Preconstruction Manager I continue to work on mountain resort projects, as well as a variety of other types. It has been a good transition and we continue to love living in Colorado. Liz and I stay pretty busy keeping up with the girls. They have a lot of fun swimming, skiing and camping. GE Johnson has been growing quickly and I have enjoyed heading up our recruiting at ISU. We continue to be impressed with the caliber of students we see in the ConE program.

 Ellsworth WI 50411 612-209-2925
 715-273-3354 RMK_KCS@hotmail.com and
 rosemarie747@hotmail.com vanza001@umn.edu

It's been another fun and busy year... Wyatt turned 2 in April. I find him to be very amazing. He grows and learns every day. At 2 he's clearly his own person. He loves boats and trains, and trucks and bridges. He helps with house chores and plays on his computer while Mommy works on hers. I didn't really live until Wyatt came along.

Husband, Tony is well; working for an asphalt company in cities, enjoying yard work on the weekends. His favorite work benefit is bringing heavy equipment home for projects: I thought the home and 10-acres we purchased 3.5 years ago was in finished move-in condition – evidently not!

My work is going well. I'm teaching construction management classes at the University of Minnesota. I love teaching – helping others learn, sharing project experiences, learning new methods and technologies, and opening doors of opportunity. I realized this past year after my 88 year-old Grandfather passed away, and all the knowledge and wisdom he earned passed as well, that what we learn is nothing if it is not given to others.

I'm also consulting – on a limited basis (can't allow work to interfere with Wyatt's trips to the zoo, and the playground, and the beach and such!). I currently have three ventures going. First, I'm providing input on a public use facility plagued by water infiltration and subsequent toxic mold. (I like the forensic aspect, but not the politics!) Second, I'm providing photography services for construction projects. And third, I've accepted a position as vice-chair and secretary of the board of directors of the Frederick Theodore Strunk Foundation for Health and Life, and am Chief Operating Officer of its facility, the Spirits Alive Healing Care Center in Lake City MN. We are in financing and land acquisition phases (currently accepting donations!). Our mission is to provide a broad range of natural healing, individual and community educational opportunities for health and living, and a natural location for retreat and recuperation.

Would love to hear from ConE grads, wish you all a wonderful year!

 tcmccullough@cox.net

Laura and I are still enjoying life in Council Bluffs, IA. The project I have been working on for the last 4 years began commercial operation on June 1, 2007, on time and within budget. It has been a very successful project for MidAmerican Energy, a \$1.2 billion, 790 MW, advanced supercritical pulverized coal plant. The plant is the first advanced supercritical coal plant in the US. The project has had its fair share of challenges, but it is very rewarding to see it come online and produce commercial energy, just in time for summer. My next project with MidAmerican is a \$220 million environmental upgrade scheduled for completion in May 2009.

Our kids are growing up so fast. We finished up our second year of home schooling. It is quite challenging, but very rewarding. It has been fun to see the girls blossom and really enjoy reading chapter books. They also enjoy swimming, riding bikes, butterflies, and playing together. Laura is a great wife and mother and has her hands full during the day. She does a great job with home schooling. We continue to be involved in our church which is less than a mile from where we live. It is nice to be so close. My brother, Tim (ISU ME '02) and his wife live across the river in Omaha and are expecting their first (a girl) child in September.

dmpack@mchsi.com

In January 2007 I decided to go back to work full-time. We decided to leave Spirit Lake and come back to the "metro". I am currently working for Howard R. Green Company in the Transportation Group in the Des Moines Office. I just completed the plans for the Grand Avenue Extension Project in Ames, an area I was very familiar with since I worked for the Iowa DOT for so many years. Even though the project was only 4 blocks long, the plan set consisted on 180 pages. We have many challenging projects awaiting. I have primarily done municipal design in the past, but I may get the chance to design my first interchange this year.

Darin decide to leave the "factory" (production supervisor) and get back into design. He is now working for John Deere in the Cotton Picker Group in Ankeny. He's had a bit of a switch going from plastics to metals, but he loves the challenge. He's leaving on his first international trip to Turkey, yes Turkey, in a few weeks. We are enjoying living in Ankeny. We have been able to get together with many of our college friends, high school friends, and my old co-workers.

2201 C St NW Rm 1252 duddingCL@State.gov
Washington DC 20520
703-598-9300
duddingc@hotmail.com

I have just returned from two years in Kabul, Afghanistan working on the New Embassy Compound for the US Department of State, Office of Overseas Buildings Operations, Construction and Commissioning Division. I have been a Foreign Service Construction Engineer since 2004.

An answer to a question I get a lot is, Yes, it was dangerous. After two months of leave to decompress I am headed off to a 'reward' post in Brussels, Belgium, for a life safety upgrade of the embassy building there, assuming my esteemed colleagues in Planning and Contracting divisions get their act together and get a contract awarded.

Yes the government is as screwed up as you've heard about. But every once in awhile some greater good comes out of it. I applied to the State Department in 2001 when I saw a Taliban mob try to tear down the Great Seal of the United States from the empty embassy building in Kabul and it has been the tremendous privilege of a lifetime to be assigned to renovate that same building, bullet holes, battle scars, and all. The building is now a world class embassy facility with state-of-the-art security and life safety features for over 200 foreign service officers and locally engaged staff.

Having spent the time being surrounded by many nameless government agencies and members of the

US armed forces, I can state unequivocally that the War on Terror is worth fighting. Only our defeats are made public, while most of our victories will be secret for many years and decades to come. Sort of like watching a football game when only your defense is on the field. Regards and best wishes to all class of 1999-2001 ConE's, Chris Dudding

edsalltl@bv.com

Over this past year our lives have had many changes. As I am writing this we are packing to move from Dublin, Ireland to Perth, Australia. A year ago B&V asked me to transfer from the Energy Division to the Water Division in order to work as a Project Controls Manager on upgrading a large Waste Water Treatment Plant in Dublin. This spring I decided to take another overseas position as a Project Controls Manager on performing upgrades to three Waste Water Treatment Plants located in western Australia.

My wife and daughter have enjoyed the opportunity to see the world for my work. Our second child is due in October and he will be born an Aussie. Hopefully, next year, when I send in my write-up we will not be moving to the other side of the world. Cheers!

 rschaefer@cahill-sf.com

Working in the San Francisco area continues to be a great experience. Mary and I live in a hilly, small town about 30 miles out of the city, and I commute to the office in San Francisco by ferry. Of all the ways to get to work, commuting by ferry is hard to beat. I've worked on everything from data centers at the Pixar campus to mid-rise senior housing to super-exclusive condo projects and love the variety that construction offers. Cahill is a medium-sized, family-run company, but we've been growing and expanding lately, so it's been interesting. My years at ISU did a great job of preparing me for a career in construction.

It has been a busy year for our family. Nate was born September 9, 2006. He has been the joy of our lives. Craig and I cannot imagine our lives without him.

Work has stayed steady with my retail projects with Target. In 2006 I was the PM for a Target Remodel/Expansion in Fort Dodge, IA. I also have continued working with Target's Special Projects team completing Rightsizings, Photo Finish Retrofits, Restroom Retrofits, etc. I am also currently studying for the LEED AP exam.

We now try to take things day by day and enjoy more of our family life. Nate has been a very welcomed, but definite change in our home.

After six years in St Louis, my family moved back to Iowa in June, 2006. I took a job with Miron Construction's Iowa Office. Miron is based out of Wisconsin. The Iowa office is in Cedar Rapids. We built a new house north of Iowa City.

My wife, Brenda, teaches in the Cleark Creek Amana School District. Ally is 4 and Drew is 2 1/2. They are non-stop fun. We miss St Louis, but are definitely getting settled back into eastern Iowa.

Well, it has been another whirl-wind year. Finished the laboratory project for the USDA in Ames and have now moved back to the Omaha area to work on a remodel and new addition project for the same hospital I worked at previously.

During the hunt for new housing in Omaha, I felt it was time to take the next step in my life and proposed on one of the trips to the area to my now (as of this printing) wife Paula. We have been together over two years now and hopefully if you know me you have had the opportunity to meet her. If not, give us a call or stop by sometime. Hope everyone is safe and well. Have another GREAT year! Kevin

The past year has gone well at work. Finished up my first public CM project earlier this year. Currently working on a church addition in Brooklyn Park, a retail strip and an office building in Coon Rapids, MN.

On the home front, we purchased a condemned duplex this past winter. Moved into one side in April and the other is a work in progress. Somewhere in the mix we ended up with a dog named Zoey. Just hoping by next years posting I can say the house is done and Zoey is house broke. We'll see what happens.

The 1997 Doctoral graduate

Faramarz (Fred) Rahbar

The 1998 Bachelors graduates

Karmyn Babcock, Dan Baxter, Jennifer Bleigh, Nicole Buscher, Adrienne Cline, Josh Coppes, Clayton Cubbage, Aaron DeCamp, Jason DeStigter, Dale Drent, Dale Even, Aaron Gordon, Jeff Hammer, Matthew Harrington, Charlie Harris, Tyler Harris, Rodney Hintz, Marc Hughes, Matt Jepsen, Dan Keagle, Ryan Kipp, Ryan Krogstad, Chris Krumwiede, Ann Larson, Chad Layland, Mario Leuzzi, Kevin McClain, Greg Mitchem, Ryan Moore, Shawn Moser, Luke Naughton, Brent Nielsen, Corey Nook, Cole Philips, Casey Port, Dan Pottratz, Jason Rechkemmer, Brandon Reynolds, Jamie Rich, Jennifer Rusk, Matt Ryan, Frank Sarno, Alisha Schmitz, Jonathan Schiefer, Brian Shattuck, Eric Sill, Stacy Slater, Chris Smith, Matt Smith, Chris Stewart, Mark Stoller, Holly Streeter-Schaefer, Khim-Leong Tan, Craig Tobin, Chad VanRheenen, Steve Watson,

George White, Darrin Wirt, Kirk Wischmeyer, Jon Wolff,
Han-Meng Woo, Siew-Chin Yeong

The 1998 Masters graduates

Ahmed Al-Hammadi, Serhan Celik, Brian Ellsworth, Chris
Nelson, Steve Pigneri, Khim-Liong (Lawrence) Tan

The 1999 Bachelors graduates

Jeff Andrews, Ken Bronson, Greg Burda, Cheryl Carlson,
Kevin Charlson, Brandon Christiansen, Rich Clark,
Jeremy Cortesio, Brian David, Andrew Earhart, Steve
Edwards, Aron Frakes, Brian Gaul, Azmi Ghazi, Tara
Gleason, Cortney Graber, Matt Gumm, John Halloran, Matt
Hamilton, Mike Harryman, Tara Henson, Steve Heyne,
Corey Higgins, Shawn Holmes, Aaron Homan, Todd
Kamp, Travis Kock, Travis Kuehner, Scott Kutchen, A.J.
Loss, Ben Lovin, Chris McNamara, Aaron Miller, Matt
Miller, Rich Montague, Sam Nanfity, Vijay Narayanan,
Michael Nelson, Ryan Nelson, Garrett Nordyke, Katie
Pacholski, Jeff Penning, Tracy Petricka, Quentin, Platt,
Jason Schuster, Dustin Schwake, Aimee Seivert, Dave
Smith, Jenny Spence, Darin Stevenson, Ted Teegarden,
Brian Teeters, Jamella Tolbert, Tim Tometich, Jason
Vorwald, Wing-Kei Wong, Alicia Worden

The 1999 Masters graduates

Matt Fagen, Branden Stephan, Siew-Chin Yeong

The 2000 Bachelors graduates

Derik Aido, Jon Altes, Chad Bassman, Travis Benson,
Jamie Beyer, Vanessa Brandt, Mike Callahan, Adam
Cameron, Chris Dudding, Hudsadin Eamsherangkul, Todd
Edsall, Judith Ehmer, Todd Friemel, Melony Gibbs, Steve
Golumbeck, Brian Hedgren, Ryan Heier, Matt Hillis,
Robert Hostetler, Brandon Jones, Eric Kaufman, Nathan
Kirstein, Jeff Knepper, Emily Kunz, Hoon-Hong Lee, Mark
Leusink, Andy Lundy, Todd Majeres, John Maranowicz,
Jeffrey Martin, Mike McCoy, Matt McKinney, Jon
Merk, Ben Merta, Valarie (Bullard) Meyer, Katie Minter,
Stephanie Morrison, Adam Papesch, Ryan Peterson, Pat
Prediger, Matt Proctor, Dominic Punelli, Nate Purdy, Chad
Rafoth, Matt Ralston, Lindsay Sauer, Ross Schaefer, Ron
Stafford, Dave Swies, Bruce Timmons, Paul Tremmel,
Brandon Valdez, Jay Wavering, Eric White, Jason Willis,
Nick Wolf, Hannah Woledge

The 2000 Masters graduates

Karmyn Babcock, Judith Ehmer, D.H. Gabriel Lau, Chun
Li, Iwan Pribadi, Hernando Quintero, Jeff Stewart

The 2001 Bachelors graduates

Heather Adams, Ben Bruns, Heather Burns, Chris Clausen,

Scott DeYoung, Charles Dyxin, Dave Flemmer, Chad
Goddard, Ben Golding, Kasey Harken, Corey Harms,
David Herrema, Travis Hodapp, Kevin Hodgson, Megan
Hurd, Brian Irlbeck, Jaquelyn Junginger, Lee Kaiser, Nic
Kaminski, Angela Kelly, Jeff Knutsen, Adam Kouri, Chris
Krieg, Scott Kueter, Matthew Larson, Celeste Lewis, James
Lutter, Andrew Manatt, Ryan May, Ibrahime M'Bbapanza,,
Jason Miner, Rik Myhre, Steve Nelson, Brian Overbaugh,
Dave Peterson, Ross Piper, Brian Pittman, Kyle Rahe,
Jon Richardson, Nic Riesenber, Meaghan Ryan, Rodney
Sanders, Jeff Scandrett, Dale Schwager, Andy Smith, Loren
Snyder, Shamus Stephens, Justin Strahan, Craig Streit,
Barry Sullivan, Aaron Toney, Elizabeth Valdez, Jonathan
Vandekrol, Matt Vander Pol, Matt Vanheiden, Krista Viet,
Tim Vogel, Kevin Walker, Jason White, Rory Wiebel,
Elizabeth Wood

The 2001 Masters graduates

Ozdemir Cetin, Tarek Elmisalami, Zhili Gao, Dongying
(Judy) Jiang, Cynthia Patterson, Syuin-Chet Tee

The 2001 Doctoral graduate

Tarek Elmisalami

The 2002 Bachelors graduates

Casey Ackermann, Nicholas Aldrich, Jeffrey Austin,
Adam Boelman, Kyle Bolejack, Alex Bonzer, Timothy
Bouska, Douglas Bristol, Timothy Callahan, Luke
Czerwinski, Russell Dodson, Josh Dooley, Christopher
Doyle, Alan Elder, Jason Engel, Phillip Engler, Darwis
Fensury, Nicholas Ford, Brandon Frideres, Gretchen
Frietsche, Aaron Garner, Jonathan Hand, Michael Hazel,
Edward Heggen, Kelly Henderson, Joshua Hermsen, Peter
Huey, Matthew Jesson, Erik Johansen, Kevin Kain, Issa
Karadsheh, Kathleen Kies, Bradley Klinkefus, Christopher
Kreftmeyer, Melissa Leek, Nicholas Leimer, Terry Leonard,
Bradley Linman, David McLatchie, Theodore Meiners,
Paul Meyer, Elizabeth Monaghan, Wesley Murdoch,
Michael O'Connor, Adam Pfab, Adam Petersen, Brian
Pollock, Yiendra Porayouw, Aaron Ripple, William
Roozenboom, Michael Schaefer, Rolando Schrupp-Rivero,
Brandon Schulte, Shadrach Spora, Jamie Stanley, Diane
Strawn, Joseph Strub, Bradley Sullivan, Don Swanson,
Matthew Thompson, Cynthia Twedt, Brian Van Arendonk,
Jaron Vos, Jason Wells, Jason Wiener, Matthew Wiener,
Tim Williams, Adam Wood

The 2002 Masters graduates

Jamie Beyer, Dong Chen, Aldona Jelinek, Melissa Leek,
Jingxi (Cece) Li, Lifeng Li, Michael McArtor

The 2003 Bachelors graduates

Zachary Allen, D Bradley Barickman, Joseph Beumer,
Nathan Blomme, Adam Boeckmann, Matthew Bosman,

Tylor Bottorff, Phillip Burgmeier, Brant Carr, Nicholas Carter, Ryan Cheeseman, Justin Clausen, Chad Coalbank, Edward Cox, Barry Determan, Isaac Drew, Eric Farley, Jodel Fesenmaier, Brian Fliehler, Nathan Franje, Tony Fucinaro, Cory Gapstur, Nathaniel Hagberg, James Hapke, Nathan Harty, Michelle Heikens, Derek Hemphill, Joshua Herman, Perry Hines, Sarah Homan, Benjamin Hott, Hilary Jensen, Quincy Jones, Brian Kacmarynski, Nicholas Kopp, Brad Kunz, Justin Lechtenberg, Ryan Llewellyn, Alan Manyin, Julie Martin, Jennifer McMinemee, Walter Nashert IV, Cheri Nordstrom, Nicholas Obbink, Ananto Prasetyo, Joseph Prosek, Tyler Raun, Phillip Ross, John Ryan, Scott Schifftlett, Joel Schimmer, Kyle Schott, Korey Schroeder, Grant Sjostrom, Adam Smith, Eric Soenksen, Joshua Staudt, Nathan Summers, Cody Tacke, Joseph Tripp-Rieks, Edna Vazquez, Matthew Van Loon, Ryan Weller, Michael Wolfe, Yew-Choong Wong, Christopher Wood, James Young, Jr

The 2003 Masters graduate

Mauricio Arbelaez, Stephen Frank, Jacob Thorius

The 2004 Bachelors graduates

David Audino, Nurhidayah (Hida) Azmy, Anthony Bernhard, Brian Bishop, Matthew Bockes, Brent Boots, Justin Brown, Nathan Burgod, Rusty Chamberlain, Andrew Cilio, Michael Clayburg, Alexis Coen, Kassi Colman, Melissa Conley, Eric Cowles, Timothy Davis, Ross Dix, Ryan Edwards, Benjamin England, Ariana Wright Gleisberg, Justin Grager, Anthony Grieser, Angela Guggisberg, Ryan Hawkins, David Hayek, Jacob Hotchkiss, Jason Hulsebus, Sarah Hundley, Jared Jones, Ryan Kauffman, Brett Ketelsen, Bradley Kruse, Mark Lee, Louisa Lorensen, Craig Montz, Jordan Muller, Andrew Munsch, Thomas Osier, Joshua Payne, Leslie Peterson, Matthew Madison, Clinton Rhoads, Jason Romero, Anthony Scully, Donovan Smith III, James Smith, Russell Smith, Mark Snyder, Daniel Solem, James Sparks, Hui-Tong Su, Thomas Swinning, Peter Taylor, Richard Tucker, Sara Van Roekel, Shane Weis, Brian Wessels, Alan White, Nicholas Darrell Williams, Nicholas David Williams, Geoffrey Zehnder.

The 2004 Masters graduates

Kiran Ankanahalli-Shivaram, Jin-Wook Chung, Manop (Lim) Kaewmoracharoen, Seonghoon Kim, Deepak Makarla, Tolga Meco, Mary Rukashaza, Diane Strawn

The 2004 Doctoral graduates

Augusto Canales, Zhili Gao

The 2005 Bachelors graduates

Mark Anthony, Brian Blank, Michael Boettcher, Scott Borgerding, Benjamin Bunge, Richard Corcoran, Brian Crow, Jamie Crubaugh, Jeffrey Elkins, Justin Fisher, Gareth Fleischer, Andrew Grubb, Steven Halverson, Julie

Halvorson, Joseph Harris, Matthew Hornibrook, Eric Jestrab, Minas Kavallieros, Brian Klemme, Nicholas Lauters, Kerry Megraw, Tyler Meyerholz, Kent Mickelson, Joshua Miltenberger, Tyrel Murray, Justin Olson, Cliff Plymessenger, Jeffrey Quinn, Michael Richardson, Bryan Sandvig, Clifford Schafer, Kirt Schmidt, Dominique Selgrade, Joshua Thrap, William Treasure, Brett Walker, Chad White, Gary Wickering, Luke Wilgenbusch, David Wilson, Crystal Wojtysiak

The 2005 Masters graduates

James Nelson, Hariharan Pattabhi Seetharaman, Cliff Plymessenger, Nolan Raadt, Edna Vazquez, Nicholas Williams, Zheng Zhong

The 2006 Bachelors graduates

Stephen Ahlers, Anthony Alleman, Robert Amundson, Nicholas Andera, Jerad Andersen, Nicholas Andersen, Nicholas Bement, Jason Bersch, Anastasia Bitker, Jason Brekken, Russell Bollig, James Bowers, Josh Braby, Aaron Brace, Carl Brush, Aaron Bunge, Joseph Butler, Scott Cornelius, Michael Cramer, Kenneth Dittus, Jonathan Doll, Case Doorn, Ryan Drapeaux, Philip Emanuel, Anthony Erickson, Ryan Ferris, Curt Gillum, Glen Gleason, Ryan Haaland, Ryan Hackenmiller, Richard Harris, Scott Hildebrand, Chad Hotovec, Jake Humphreys, Eric Johnson, Derek Juhl, Jamie Knox, Jacob Kress, James Kurth, Benjamin Lehan, Jonathan Lewton, Kevin Lind, Tyler Manker, James Matzinger, Patrick McClain, Ryan McGuire, Jeffrey McKee, Peter Mercuris, Nathan Mittag, Jeffrey Moellers, Craig Montgomery, Adam Nelson, Lincoln Nichols, Dustin Nordell, Matthew Olberding, Nels Overgaard, David Parr, Zachary Peterson, Joshua Pick, Nathan Pilcher, David Rahe, Tyler Ramaekers, Eric Rasmussen, Gina Riesberg, Nicholas Rivera, Chad Schmidt, Bradley Schoch, Daniel Seiler, Jonathan Shepherd, Aaron Smith, Derek Snead, Andrew Stoullil, Luke Strahan, Brett Templeton, Nicholas Tjaden, Justin VanCoughnett, Andrew Wagner, Dustin Waters, Colin Waits, Cole Weaver, Arlo Wiczorek, Michael Woolley

The 2006 Masters graduates

Nathaniel Hagberg, Eric Jestrab, James Tometich

The 2006 PhD graduate

Dong Chen

The 2007 Bachelors graduates

Nicholas Caratelli, Adam Clemons, Brad Corkrean, Adam Douglas, Lee Ebel, Jason Eveland, David Frischmeyer, Samuel Hoffman, Jesse Howe, Ashlynn Hunter, Kelsey Johnson, Aaron Kendall, Jason Knipp, Andrew Kobusch, Jerry Mihovilovich, Kyle Mueller, Jonathan Nack, Kelsey Peverill, Andrew Rotta, Casey Schafbuch, John Seidl, Gabriel Stofferahn, Mark Sullivan, Christopher Thennes, Benjamin Verdon, Andrew Vogel, Lucas Wall, Adam Ward, Matt Weller, Brandon Wollery, Benjamin Wright
