**Good-Bye from Edward Jaselskis,
Professor-in-Charge
(through May 15, 2011)**

Where have twenty-two and a half years gone!? I started at Iowa State University as a young assistant professor in January 1989 not knowing a lot about how special the ConE program is but feeling that I could make a difference—and not knowing how long I would be here. During my tenure at ISU, I taught and advised many of you and conducted innovative research to help improve the productivity of our industry. I have gotten to know many of you—some better than others. I also got married to Michelle (an ISU Alum) and have a beautiful nine year old daughter, Sophie. Celebrating the program's 50th year anniversary last fall was truly a memorable highlight of my time at Iowa State. My family and I have had a wonderful time living in Ames and participating in several Cyclone events. Recently, I was offered an opportunity to become a faculty member at North Carolina State University—it was an opportunity that was too good to pass up. My family and I look forward to the new opportunities Raleigh will bring in the future. It has been wonderful getting to know many of you as an instructor, advisor, or alumnus. I will miss you all and wish you all the best in the future. I hope to keep in touch with you. My contact information at NC State is as follows:

Edward J. Jaselskis
Jimmy D. Clark Distinguished Professor
Department of Civil, Construction, and
Environmental Engineering
North Carolina State University
Raleigh, NC 27695-7908
Email: ejjasels@ncsu.edu
Phone: (919) 515-1158

Dr. Chuck Jahren will be taking over the Construction Engineering program beginning June 1. I wish Chuck all the best for a successful transition.

**Greetings from Chuck Jahren
Division Leader
(beginning June 1, 2011-)**

Universities are interesting places. Things happen in them that seldom happen elsewhere—like getting a second chance at leading a program after having three years off and thoroughly enjoying the time off as a regular faculty member. (Terry Branstad, our current governor in Iowa is a notable exception; the former four term Iowa governor is back after three terms off.) In the three years since my last program leadership role, I have had a chance to help our top juniors and seniors teach classes of over 100 students in our learning community, start an online master's degree, edit the premier archival journal for construction engineering, and get reacquainted with my research and my family. I enjoyed Ed's leadership and especially admire his success in facilitating our 50th anniversary celebration. Best wishes to Ed at NC State University and Kelly Strong who is moving to Colorado State University. We are looking forward to staying in touch with them and collaborating where we can.

It is an honor and humbling to assume leadership of the largest (by far) construction program in the US – for the second time. Our program is blessed with great colleagues and wonderful students; it is different than it was three years ago with new faculty members (Doug Gransberg and Beth Hartmann), new students (wired, connected and more involved in student organization and service projects), new budgets (less money), and new technology (social media, computer collaboration, online learning and the next generation of computers). So this is really like having a whole new job, rather than getting back the old one... and I am approaching it in that way.

The College of Engineering put a high priority on our need to replace our two colleagues who have recently departed. The recently graduated PhDs that I have met at conferences are mostly high energy people who are ready to start their first job and make a difference. In my former role of Editor-in-Chief at the ASCE Journal of Construction Engineering and Management our editorial board made a concerted effort to recruit early career faculty members to our group and we were always pleased at the enthusiasm and cooperation that they exuded. I am looking

forward to recruiting from that pool for our faculty members. In addition, Iowa State Construction Engineering is attractive professionally, so there is also a possibility that we encourage an experienced person to join us who likes four seasons and gracious small city living.

The *Erector Set* for this year reveals a dynamic program where students take professionalism and service to others seriously and where the industry and alumni and Iowa State University staff work together to make the program a success. I can't wait to experience the activities that we will report to you in the next edition of the *Erector Set!*

Ames, IA 50011-3232
515-294-2045 (phone) 515-294-3845 (fax)

Baker, Jenny 455 Town Engineering
Lecturer 515-294-6781
 jzbaker@iastate.edu

procedures, intellectual property, products liability, risk analysis. Emphasis on development of critical thinking process, abstract problem analysis and evaluation.

In 2010-2011 Jenny instructed:

ConE 221. Contractor Organization and Management of Construction. Entry level course for construction engineering: integration of significant engineering, economics, and management issues related to efficient construction company operations. Time value of money; methods of evaluating alternative projects; organization; operations; construction company administration; project administration; project management systems; construction contracts; integrated delivery systems (design/build and others); marketing; insurance and bonding; construction safety; labor law; labor relations; productivity; motivation and leadership; contract documents; interpretation and utilization of drawings, specifications, agreements, bidding forms, general conditions, subcontracts, shop drawings and related documents.

ConE 353. Electrical Systems in Buildings. Comprehensive coverage of building electrical systems including power, lighting, fire alarm, security and communications. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

In addition:

Co-Advisor for National Electrical Contractors Association (NECA)

Becker, Timothy 451 Town Engineering
Teaching Assistant 515-294-5403
 tbecker@iastate.edu

In 2010-2011 Tim instructed:

ConE 221. Contractor Organization and Management of Construction.

ConE 380. Engineering Law. Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding

Cormicle, Larry 426 Town Engineering
Senior Lecturer 515-294-8299
 cormicle@iastate.edu

In 2010-2011 Larry instructed:

ConE 121 & 122. Cornerstone Learning Community. Integration of first-year and transfer students into the engineering profession. Career preparation, professional ethics, construction research. Introduction to construction industry professionals including how they interact with engineers in other disciplines. Continued introduction to program, department, college, and university organization. Overview of faculty, staff, policies, procedures and resources.

ConE221. Contractor Organization and Management of Construction.

ConE 441. Construction Planning, Scheduling, and Control. Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer project management applications.

ConE 488. Construction Engineering Design II. Application of team design concepts to a construction engineering project. Project planning. Detailed analysis. Advanced cost and schedule applications. Contract negotiation. Development of a complete project history. Technical presentations (oral and written).

In addition:

Coop/Intern Advisor
Advisor for Associated General Contractors Student Chapter
Coach for Associated Schools of Construction Student Competition Teams
Chair of the ConE Curriculum Committee

Department representative, Scholarships and Awards Committee
Advisor for the National Association of Home Builders Student Chapter

Gransberg, Doug 494 Town Engineering
Professor 515-294-4148
dgran@iastate.edu

In 2011 Doug instructed:

ConE 421. Construction Estimating.

Conceptual estimating. Bid preparation for buildings, highways, heavy, mechanical trades. Estimating costs for material, labor, equipment, overhead, and profit. Quantity surveys, unit costs, production rates, and pricing methods. Subcontract bid analysis and bid procedure. Cost analysis and cost control. Electronic quantity take-off methods.

Hartmann, Beth 450 Town Engineering
Lecturer 515-294-8190
bethlin@iastate.edu

In 2010-2011 Beth instructed:

ConE 121 & 122. Cornerstone Learning Community. Integration of first-year and transfer students into the engineering profession. Career preparation, professional ethics, construction research. Introduction to construction industry professionals including how they interact with engineers in other disciplines. Continued introduction to program, department, college, and university organization. Overview of faculty, staff, policies, procedures and resources.

ConE 487. Construction Engineering Design I. The integrated delivery of project services including preliminary engineering design process, constructability review, interaction with the client, identification of engineering problems, developments of a proposal, identification of design criteria, cost estimating, planning and scheduling, application of codes and standards, development of feasible alternatives, selection of best alternative, and delivery of oral presentations.

CE 306. Project Management for CE. Project management, including work breakdown structures, cost estimating, scheduling, and project control. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Techniques in

interpretation of contract documents and in estimating quantities.

In addition:

National Electrical Contractors Association (NECA) Student Chapter Faculty Advisor
Faculty Leader, Leadership Pillar, E2020 Scholars Program
Co-instructor for Leadership modules for Engr 110X and Engr 210X.

Hunacek, Mark 486 Carver
Lecturer 515-294-8167
mhunacek@iastate.edu

In 2010-2011 Mark instructed:

ConE 380. Engineering Law. Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability, risk analysis. Emphasis on development of critical thinking process, abstract problem analysis and evaluation.

Jahren, Charles 428 Town Engineering
Assoc. Professor 515-294-3829
cjahren@iastate.edu

In 2010-2011 Chuck instructed:

ConE 322. Construction Equipment and Heavy Construction Methods. Selection and acquisition of construction equipment. Application of engineering fundamentals and economics to performance characteristics and production of equipment. Heavy construction methods and economic applications.

ConE 381A. Bidding Construction Projects I. Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialities:
A. Heavy and Highway

CE 505. Design of Construction Systems. Advanced design of concrete formwork and falsework systems. Design for excavation and marine construction including temporary retaining structures and cofferdams. Aggregate production operations, including blasting, crushing, and conveying systems. Rigging system design.

CE594E&F. Special Topics in Construction Engineering and Management. Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics:

E. Project Controls

F. Computer Applications for Project Controls

Jaselskis, Edward 458 Town Engineering
Professor-in-Charge 515-294-0250
ejaselsk@iastate.edu

In 2010 Ed instructed:

ConE 421. Construction Estimating.

Conceptual estimating. Bid preparation for buildings, highways, heavy, mechanical trades. Estimating costs for material, labor, equipment, overhead, and profit. Quantity surveys, unit costs, production rates, and pricing methods. Subcontract bid analysis and bid procedure. Cost analysis and cost control. Electronic quantity take-off methods.

CE501. Preconstruction Project

Engineering/Management. Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Determinants of construction project success, conceptual estimating, design and engineering planning for automated construction techniques, constructability review procedures, planning for safety, value engineering.

In addition:

Construction Industry Institute subcommittee of the Strategic Planning Committee on Emerging Trends Chair.

CCEE Administrative Council

Mauro, Kristin 382B Town Engineering
ConE Academic 515-294-2744
Advisor kmauro@iastate.edu

In 2010-2011 Kristin instructed:

ConE 121 and ConE 122. Cornerstone Learning Community.

Greetings,

It is hard to believe that another year has gone by. This past year has been extremely busy as well as rewarding for me. In the past year I have taken on a larger role within the Learning Community,

established a hiring process for peer mentors and have played a more active role in mentoring the peer mentors. I continue to participate in committees at the college and university level as well as have become more active in leadership roles within my professional organizations. Through these experiences, I continue to learn how important the Con E learning community is and the impact this sense of community has upon our undergraduates. It is this sense of community that I hope to continue fostering in the years to come. One way I am continuing to foster community is through our peer mentoring program. In the past several semesters we have begun meeting with peer mentors one on one to discuss any concerns they are having as well as to get to know them on a personal level. We have also begun reading a leadership book each semester as a way to provide professional development to the peer mentors.

This fall I will begin my fourth year as a PhD candidate in Educational Leadership and Public Policy. As a result, I've continued expanding my research resume. This past spring, I conducted a study with the students in the learning community to answer the question "Does knowing others personality types have a positive impact on group dynamics?" This study functions as a baseline by which I can improve the overall study and hopefully create a more meaningful impact and stronger sense of community among the undergraduates.

Lastly, I have been working on a publication with Drs. Carla Lopez del Puerto, Jennifer Shane, and Kelly Strong as well as Rhonda Wiley-Jones. The manuscript is entitled "Retaining Women Students in a Construction Engineering Undergraduate Program by Balancing Integration and Identity in Student Communities." This article has been accepted for a second review by the International Journal of Construction Education and Research.

In addition:

- Presented at the ISU Learning Community Institute in May 2011.
- Advised approximately 200 students, served as back-up to faculty advisers and held refresher sessions for faculty advisers to prepare for registration.
- Participated as a member of the Con E Curriculum Committee.

ConE502. Construction Project

Engineering/Management. Application of engineering and management control techniques to construction projects. Construction project control techniques, equipment selection and utilization, project administration, construction process simulation, Quality Management, and productivity improvement programs.

In addition:

Member of the ConE Curriculum Committee
Design-Build Institute of America Student
Chapter faculty advisor

Wood, Denise 456 Town Engineering
Secretary 515-294-2045
 dwood@iastate.edu

Supports ConE faculty, staff, students, student organizations and advisory council. Handles employment questions. Co-Editor of the Erector Set.

Greetings! This is the first year for me as Co-Editor of the Erector Set. It has been a great learning experience and very fun to hear how everyone is doing.

Aside from the on-line form “technology” issues, it has been an interesting, new challenge and I’m looking forward to putting everything together for the 2011 edition.

Faculty Research 2010-2011

Dr. Granberg's research included:

(Annual Year 2011)

PI: NCHRP 10-85: "A Guidebook for Construction Manager-at-Risk Contracting for Highway Projects," \$400,000.

Research has found that traditional Design Bid Build (DBB) project delivery creates problems for DOTs when they try to use DBB to accelerate project delivery. While DB has been successful in many states for accelerating project delivery, it is not appropriate for all projects. States are seeking additional project delivery methods to address risk management, improve schedule delivery, and enable collaboration on design decisions. This research was funded to explore the use of Construction Manager-at-Risk (CMR) to address these issues. The objective of this research is to develop a guidebook for initiating and implementing a CMR project delivery system for highway projects at transportation agencies. Dr. Jennifer Shane is the Co-PI for this project.

PI: Oklahoma Transportation Center Project OTCREOS9.1-21: "Quantifying the Costs and Benefits of Pavement Rertexturing as a Pavement Preservation Tool," \$1.0 million.

Dr. Gransberg will complete this project that he started while on the faculty at the University of Oklahoma. It involved the construction of 23 pavement preservation treatment test sections on a 4-lane state highway and monitoring various aspects of their performance for a period of 3 years. The project has been selected for follow-on funding to monitor each section until it has failed based on the criteria developed in the original project. The objective of the project was to quantify the costs of each treatment and to develop deterioration models based on failure due to loss of skid resistance, loss of macrotexture, and other modes such as delamination. The project was selected by AASHTO as one of the ten most valuable state-funded transportation research projects and included in a Report to the US Congress on the value of transportation research. The graduate students on this project were recognized with two national and one state award for their efforts.

PI: San Antonio Water System Project: "Develop Parametric Cost Estimating System," \$40,000

The objective of this project was to develop a parametric cost estimating system that would permit the San Antonio Water System to improve the accuracy of early project programming-level estimates. The research involved a sophisticated statistical analysis of this public utility's historical bid tabulations and the creation of a database and cost models for three different types of water projects that are frequently built by this owner. The project will conclude in the summer 2011 with a training course for water system engineers on how to utilize and implement the new system.

PI: NCHRP Synthesis 42-01: "Practices and Guidelines for the Incorporation and Use of Geotechnical Information in Design-Build Projects," \$35,000.

Use of the design-build project delivery method by state agencies for transportation projects is increasing each year. Significant variability exists in the current practice regarding the allocation of geotechnical risk and the level of geotechnical information provided with bid documents. There is also variability regarding the scope of geotechnical information required after award, the program of geotechnical-related performance testing during construction, and the contract provisions related to geotechnical design and construction. The purpose of this synthesis is to document and summarize current state-of-the-practice related to geotechnical engineering and constructability for design-build highway projects, including bridges, other structures, embankments, and excavations. This report will help state DOTs develop effective procedures for delivering design-build projects and managing geotechnical risks.

Co-PI: NCHRP 10-83: "Alternative Quality Management Systems for Highway Construction," \$500,000.

Alternative project delivery methods that are applied to highway construction involved selecting the contractor before the design is complete and therefore, involving the contractor in

the design process. This leads to an application of alternative quality control systems that emphasize contractor quality control and assurance. These new systems allow owners to have confidence through a verification of contractor quality system process. The objectives of this research are to (1) identify and understand alternative quality management systems and (2) develop guidelines for their use in highway construction projects. The research that is being led by Dr. Keith Molenaar of the University of Colorado is using a case study approach to identifying successful of alternative quality management systems for both design and construction.

Co-PI: SHRP2 R-10: “Project Management Strategies for Complex Projects,” \$1.25 million

Dr. Jennifer Shane leads this project and Dr. Kelly Strong is also a Co-PI. Dr. Gransberg’s primary focus in this project is research into the construction financing aspects of complex projects. The project has developed a 5-dimensional model for complex project management of which finance is one of the dimensions

Co-PI: Mn/DOT Project 2010-077: “Construction Manager General Contractor Risk Assessment,” \$85,000.

Dr. Jennifer Shane leads also this project whose objective is to develop the necessary information on CMGC contracting from research and the literature to assist the Minnesota Department of Transportation facilitate the legislative process and gain authority to use this form of project delivery.

Co-PI: Ontario Ministry of Transportation Project: “Evaluation of Automated Construction Administration and Field Performance Data Collection Technologies” CDN\$112,000

Dr. Susan Tighe of the University of Waterloo in Ontario, Canada is this project’s principal investigator. Dr. Gransberg’s role is to evaluate automated construction administration technologies that are in use in the US and determine their potential for implementation in Canada. He also will develop a cost model to quantify the marginal costs and benefits of each of the technologies to assist the sponsor in making implementation decisions based on both technical and financial information.

Dr. Jahren’s research included:

Research Project Descriptions Short Jahren 07_01_11

Preventive Maintenance Support

The objectives of the proposed research project of this proposed research project is to increase the level of success as the Iowa DOT embarks on an effort to increase emphasis on preventive maintenance. It is expected this objective will be reached by transmitting lessons learned from past research efforts and assisting with training, project selection and construction start up.

Sponsor: Iowa Department of Transportation

PI: Charles T. Jahren

Date: July 1, 2011-June 2012

Pilot Construction Projects for Granular Shoulder Stabilization TR-634

The objective of the proposed research project is to assist Iowa DOT in cost effectively mitigating edge ruts on granular shoulders by pilot testing the use of DUSTLOCK in a full scale maintenance setting and continuing to explore other alternatives such as developing standard specifications for a class of products that might have similar effectiveness and using other stabilizing strategies or paving short sections of shoulders.

Sponsor: Iowa Department of Transportation

PI: Charles T. Jahren

Co-PI: David White, Iowa State University

Date: April 2008-January 2011

Electronic Construction Collaboration System for Projects under \$10 Million, Phase II

The objectives of the proposed research project is to investigate the feasibility of developing a WPMS within Microsoft SharePoint for projects under \$10 million and completion of implementation study of AEC Sync in the Iowa Falls Arch Bridge.

Sponsor: Iowa Department of Transportation

PI: Charles T. Jahren

Date: July 2011-June 2012

Iowa Mass Concrete for Bridge Foundations Study Phase II

The objective is to develop an effective economical approach to specify the construction of mass concrete structures that minimizes thermal risks to an acceptable level.

Sponsor: Iowa Department of Transportation

PI: Charles T. Jahren

Co-PI Dr. Kejin Wang, Iowa State University

Date: July 2011-June 2012

Use of Automated Machine Guidance (AMG) within the Transportation Industry. NCHRP 10-77.

AMG involves the use of GPS, total stations or lasers to provide positioning so that construction machinery can set itself to grade automatically for fine grading purposes. This project focuses on three outcomes: (1) technical procurement specifications for AMG technology; (2) guidance on the use of such technology in construction projects; and (3) implementation strategies for AMG technology into construction techniques. Key obstacles that need to be addressed are the development and transfer of 3D electronic files, general lack of knowledge in subject matter, overcoming legal barriers, and understanding the impact of AMG technology in terms of benefits and liabilities. Researchers will engage an expert panel and develop guidance documents for use by transportation construction owners.

Sponsor: NCHRP

PI, David White Iowa State University
Co-PIs, Chuck Jahren, Iowa State University and John Hannon, University of Southern Mississippi.
Date: August 2009 – December 2011

Quality Control/Quality Assurance Testing for Joint Density and Segregation of Asphalt Mixtures IHRB-09-06

This project would identify best practices for joint geometry, joint construction, and for minimizing segregation. Field testing of asphalt pavements during construction as well as existing pavement sections exhibiting open longitudinal joints will be investigated. The project will concurrently compare and evaluate destructive and non-destructive testing methods for identifying segregation and quality control/quality assurance of centerline joints. Testing criteria will then be developed for the most suitable method.”

Additionally, a test method that can be used to evaluate the permeability of mixtures during the mix design phase would be beneficial and thus will be included as one of the objectives of the study.

Sponsor: Iowa DOT

PI, Chris Williams Iowa State University
CO-PIs, Chuck Jahren, Iowa State University and David Lee, University of Iowa
Dates: August 1, 2010 thru July 31, 2012

Development of Quality Standards for Inclusion of High Recycled Asphalt Pavement Content in Asphalt Mixtures IHRB-09-07

The objective of this project is to develop quality standards for inclusion of high RAP content in asphalt mixtures. Performance testing and asphalt binder testing will be performed at all temperature regimes to characterize the binder contained in RAP and whether or not results are source dependent. Both laboratory and plant produced mixtures will be examined, which would help answer the question that how much blending occurs between the binder in RAP and virgin binder. In addition, this study will explore the possible role that fractionation may take in increasing RAP usage.

Sponsor: Iowa DOT

PI, David Lee, University of Iowa
CO-PIs, Chris Williams and Chuck Jahren, Iowa State University

Dates: August 1, 2010 thru July 31, 2012

Dr. Jaselskis' research included:

National Science Foundation, Co-PI, “Engineering Legacy of the Great Inka Road”

This research involves developing an intrinsic understanding of the Inka's basic knowledge of the laws of nature that govern how man constructs his structures to withstand the forces of nature. The ancient engineers succeeded in building roads and other structures on the steep and unstable mountains of the Andes. The research provides a better fundamental understanding of how natural forces act on structures can be discerned and applied to modern engineering practice. This project is in collaboration with the Smithsonian Institute.

Construction Industry Institute, PI, “Managing Indirect Construction Costs”

Inconsistent management of indirect construction costs is perhaps one of the primary causes for contractors' inability to realize a profit or even to sustain the business. Innovative management of indirect costs offers an opportunity for competitive differentiation for those firms able to strategically allocate and carefully control indirect costs. For owners and contractors to productively discuss indirect construction costs, a common vocabulary and generally accepted terminology is required – such a durable framework does not presently exist. The primary purpose of this research project is to

research, document, and test the best and/or innovative practices for managing indirect construction costs to the mutual and shared benefit of both owners and contractors.

The specific objectives of this research project are:

1. Understand industry practices for estimating and managing indirect construction costs
2. Identify the key indirect functions that affect construction performance
3. Investigate and validate strategies and methods to best allocate expenditures on indirect construction costs
4. Develop practical tools for owners and contractors to improve their planning, estimating, and management of indirect construction costs
5. Document best practice findings and recommended innovations

Dr. Shane's research included:

Transportation Research Board of the National Academies, SHRP 2: R10 Project Management Strategies for Complex Projects (PI: Jennifer S. Shane, Co-PI: Kelly Strong and Doug Gransberg) Contract: Sept. 2009-Feb. 2012, Project total: \$1,250,000

The shift in U.S. infrastructure needs has largely been from building new infrastructure to replacing, expanding, or renewing existing infrastructure. The project management issues involved with infrastructure renewal are markedly different than the issues for new construction, furthering the need for a change in project management approaches to the nation's infrastructure. Not only are infrastructure renewal projects more complicated by their nature, the situation has been exacerbated by years of under-funded maintenance and replacement. In other words, what would have been a complex process under ideal circumstances has been made even more challenging because of the need for rapid renewal to avert infrastructure failures. The objective of this research is to identify and communicate the critical factors involved in successfully managing complex transportation design and construction projects. One of the key underlying research assumptions is that the ability to successfully manage complexity is directly related to the ability to integrate the project team across the entire life cycle. The ultimate goal of the research is to develop a comprehensive training and development program to enable

project partners to work more cooperatively on such projects.

Additional partners include personnel from Northeastern University, Kimley-Horn and Associates, Trauner Consulting Services, PBS&J, University of Canterbury, Colorado State University, University of Waterloo, and Grant-Allan Consulting.

Transportation Research Board of the National Academies: National Cooperative Highway Research Program, 10-48 Nighttime Construction Impacts on Safety, Quality, and Productivity (PI: Jennifer Shane, Co-PI: Amr Kandil (Purdue) Contract: May 2009-October 2011, Project total: \$250,000

Traffic congestion, especially in metropolitan areas, places a significant and serious burden on the public and threatens the economic vitality of the nation. Growth in roadway capacity has not kept pace with the increased demand for travel. Moreover, roadway congestion has significant adverse impacts on businesses, both large and small, and on the general state of the economy. One way to reduce the congestion effects of roadwork activities is to perform such activities during times of reduced traffic demand. Although there are obvious and significant benefits to performing work activities at night there are some activities that could be negatively impacted. This work involves exploring the impact on issues including safety, productivity, illumination, quality, nuisances, and risk. The main objective of this project is to develop comprehensive guidelines for the conduct of nighttime highway construction and maintenance operations.

Additional partners include personnel from Purdue, Arizona State University, Texas A&M, and Thalheimer Associates.

Transportation Research Board of the National Academies: National Cooperative Highway Research Program, 10-85 A Guidebook for Construction Manager-at-Risk Contracting for Highway Projects (PI: Doug Gransberg, Co-PI: Jennifer Shane, James McMinimee, and Stuart Anderson, Ph.D. (Texas A&M)), Contract: April 2011-January 2013, Project total: \$400,000.

The three issues of primary concern to all public transportation agencies in developing projects are:

- Select the appropriate project delivery method,
- Maximize project cost and time certainty, and
- Ensure proactive project quality management.

The increased use of alternative project delivery methods has caused the issues to become increasingly interrelated and created many project management challenges for departments of transportation. Not only do these projects allow for concurrent design and construction, but they also move at a faster pace. In light of this, the research team will first identify, analyze, and understand existing models for successful construction manager at risk project delivery and, secondly, develop guidelines to implement them on highway construction projects. Finally, since the typical department of transportation has the ability to compete design using in-house resources, this project will develop guidelines for construction manager at risk using both in-house and outsourced design.

Midwest Transportation Consortium, *Risk Mitigation Strategies to Improve Safety of Transportation Operations and Maintenance Activities* (PI: Kelly Strong, Co-PI: Jennifer Shane) Contract: February 2011-December 2011, Project total: \$35,284.

The objective of this research is to investigate the application of integrated risk modeling to operation and maintenance (O/M) activities, specifically moving operations such as pavement testing, pavement marking, painting, snow removal, shoulder work, mowing, etc. The ultimate goal is to reduce frequency and intensity of loss events (property damage, personal injury, and fatality) during operations and maintenance activities. Potential risk factors to be explored include issues such as:

- Number of roadway lanes
- Posted speed limit
- Inadequate/improper vehicle lighting and marking
- Insufficient worker training
- Proximity of obstructions (equipment) to traveled roadway
- Limitations of equipment due to the specialized nature of the fleet
- Weather (condition of road surface, visibility, etc.)

- Work under traffic (inadequate separation or lack of detours/lane shifts)

The primary benefits of this research will be reduced risk of injury, fatality, and property damage for O/M employees and the traveling public. The research results can be implemented by the Iowa DOT staff, county engineers, municipal transportation directors, and any other transportation professionals responsible for operations and maintenance activities, including field personnel.

Iowa Highway Research Board, *Risk Mitigation Strategies for Operations and Maintenance Activities* (PI: Kelly Strong, Co-PI: Jennifer Shane) Contract: December 2010-October 2011, Project total: \$79,826.

Previous research on construction work zone safety (Shane, Strong, and Enz, 2009) has found that moving operations represent the highest risk activity when both frequency of occurrence and intensity of loss are considered. The research further determined that using an integrated risk model that assesses risk over the project life cycle could mitigate the risk of moving operations (among others) during the construction phase.

Although designed specifically to examine risk and safety for work zone applications, the research indicated that construction activities that involve moving operations (e.g. painting, guardrail placement) represented the highest risk. This finding suggests that the risk modeling process could be beneficially applied to operations and maintenance (O/M) functions outside of construction work zone applications. The research will examine how an integrated risk modeling approach could be used to reduce frequency and intensity of loss events (property damage, personal injury, fatality) during highway O/M activities.

Dr. Strong's research included:

In the most recent academic year, Dr. Strong has been one of the principal investigators (with Dr. Jennifer Shane and Dr. Doug Gransberg) on the Transportation Research Board Strategic Highway Research Program R-10 project on Successful Strategies for Managing Complex Projects. He also has research underway on risk identification and mitigation strategies for mobile maintenance operations in dynamic work zones for the Iowa Highway Research Board and risk identification and mitigation strategies for internal traffic control

of contractor operations in static construction work zones for the Smart Work Zone Deployment Initiative.

“Farewell” (Kelly Strong)

After 8 ½ years in the Construction Engineering program at Iowa State University, my family and I have decided to pursue new challenges and opportunities at Colorado State University in Fort Collins. I have enjoyed my time in Construction Engineering and appreciate all the hard work from the students, faculty, staff and industry partners that made my time here successful and productive. I have developed many lasting relationships through my association with the Con E program and am grateful for the opportunity to be part of the Con E family since 2003.

All:

What a great celebration of the first 50 years of Construction Engineering at Iowa State. It was truly an honor to participate with the other Professors-in-Charge and the distinguished alumni. The resources that now exist in Town Engineering to develop the current generation of Construction Engineers is so much more impressive than what existed back in the early 1990s.

Amazingly I have now been at Marquette for 3 years, I am really enjoying being a professor again (especially in the summer!!) – lots more golf and not having to travel much is also greatly appreciated.

Sarah has completed her undergraduate degree from Juniata College and will begin law school this fall. Jackson will be a sophomore at Marquette University and allows us to do his laundry rather than wash it himself – he definitely enjoyed MU making the Sweet 16 this past March. Braeden will be a 10th grader and is on a select soccer team and has found girls.

My best to everyone - if you are ever in the Milwaukee area, please give me a call. Finally, I am always looking for folks to come in and guest lecture!

Summer 2011

Greetings from Northwest Arkansas –

If you didn't attend the 50th Con. E. Reunion Celebration last September you really missed a fantastic affair! It was something I will long remember with deep appreciation. The mementos from that event occupy a prominent position in my den and I view them often with great pleasure. Everyone involved did a terrific job and made it an event I will always remember.

Life here in Northwest Arkansas is going along rather smoothly. Had a little problem with a hip last Fall, but that has cleared up and I'm back on the golf course. Seeing so many of the past graduates last September was a special treat. Everyone was looking good and doing well. I've always said "If you don't do better than the faculty, then we've both failed!" I believe we've both succeeded far beyond my expectations! Some of the projects you folks are doing are very impressive, I couldn't ask for a better affirmation of the Con. E. program. You have set high standards for those who follow.

Some of you have reached the time when you're getting ready to retire. I hope you enjoy your retirement as much as I have. If your travels ever take you down my way, the Welcome Mat is always out, just drop on in!

God Bless,
Tom

952-935-9647 (Fax)

Another year gone by and I'm still working. I suspect that some of my students from the early years (early 70's) may be going into retirement mode before me. I still see ConE grads from time to time in my business, but activity is down so there are not many activities.

We are very busy – the busiest we have ever been, and I'm trying hard to work less. Not a good combination. I feel pretty good for going on 68. Have continued to get some on-ice time helping coach hockey at Hamline University the past few years – and with a couple of (five) grand kids playing.

Susan is going strong. She retired from the business three years ago but is very busy with grandkids and volunteering at the art institute.

We have been to an (Iowa State mostly) super bowl party in Fort Myers, Florida the past couple of years and see quite a few old acquaintances from ISU and Ames. We are on and off in Florida now in the winter for a total of about two months each year. Anybody else in the Cape Coral (Ft. Myers) area, give us a call (952-412-5869) and visit.

My former children, now adult, are all doing well. All three are now in the Twin Cities and within 15

minutes. What a blessing to have them and their children close by.

I'm looking for someone to take over my consulting/project management business; so any grads out there that might be interested, give me a call.

Sincerely,

John G. Russo, Ph.D.

Construction Engineering Program 50th Anniversary Celebration is a Success

Our department celebrated the 50th anniversary for the construction engineering (ConE) program September 23-25, 2010. The weekend-long event included an informal dinner, a golf outing, a Reiman Gardens tour, a tailgate and a formal banquet, among other activities.

Celebration guests included CCEE alumni and industry friends. The banquet featured the ConE Hall of Fame unveiling with its first inductees: **Tom Jellinger**, founder of the ConE program and **Ken Lewis** and **W.A. Klinger**, both significant contributors to the program. Another highlight was the dedication of the Tom and Ro Jellinger Laboratory. The anniversary celebration was a great success and showcased the program's many accomplishments. Today, the ConE program has awarded 2,185 bachelors of science, 100 masters, and 11 doctoral degrees.

ConE Faculty Awards:

Jennifer Shane Receives 2010 Distinguished Design-Build Leadership Award

(L-R) Krista Morris, ISU DBIA President; Kelly Strong, ConE Associate Professor; Jennifer Shane, ConE Assistant Professor; Doug Gransberg, ConE Professor; Bo Weber, ISU DBIA Vice President.

CCEE Assistant Professor Jennifer S. Shane, Ph.D, was the recipient of the 2010 Distinguished Design-Build Leadership Award from Design-Build Institute of America (DBIA) in the faculty member category. The award is given to individuals who have demonstrated leadership in the advancement of best design-build practices and delivery.

Dr. Shane is a co-advisor of the Iowa State University (ISU) DBIA student chapter and teaches a graduate design-build course at ISU. She

also recently completed a research project examining the use of design-build in municipal water and wastewater facilities. In 2004, Dr. Shane also won a leadership award in the student category while attending the University of Colorado.

Other individuals at Iowa State University have also received this honor. In 2007, CCEE Associate Professor Kelly Strong was awarded in the faculty member category. Leslie K. Peterson and Brian A. Harry were awarded in 2003 and 2008, respectively, in the student category.

Larry Cormicle honored at student banquet

CCEE Senior Lecturer **Larry Cormicle** was recognized at the 10th annual Engineering Student Leadership banquet on February 8, 2010 for his contributions as an outstanding advisor and his work with the Associated General Contractors Student Chapter. "Larry oversees the entire cabinet and advises the president. He believes in allowing the cabinet to run the club, and he only steps in when necessary or asked...The single greatest thing Larry has done is recruited for our chapter, but more importantly our department... there would not be 400+ construction engineers if it weren't for Larry."

Larry also received the Outstanding Adviser Award as adviser for the Associated General Contractors Student Chapter, Engineering Student Council, February 7, 2011.

Doug Gransberg honored as Greenwood Chair at Medallion Ceremony (new ConE Professor)

Doug Gransberg

President Geoffroy reading the medallion to Donald and Sharon Greenwood

March 02, 2011 11:39 AM
Category: CCEE News

On Friday, Feb. 18, President Gregory L. Geoffrey presented a medallion to Douglas Gransberg, new ConE faculty member, as the inaugural holder of

the Donald F. and Sharon A. Greenwood Chair in Construction Engineering.

The Greenwoods, who graduated in the mid-'70s from Iowa State, established the endowed faculty chair to preserve and promote the excellence of the faculty in the construction engineering program. The Greenwood gift helped to recruit Gransberg, world-class faculty member and researcher, to Iowa State.

“I made a decision to focus the remainder of my career on mentoring the next generation of construction educators and researchers,” says Gransberg in his speech. He shared his efforts of mentoring untenured faculty members and promoting the development of junior faculty as engineering educators, as well as creating high-impact networking research opportunities. The Transportation Research Board of the National Academies is among the sponsors of his work and has helped to facilitate his role as an influential and effective mentor to faculty, researchers, practitioners, and students.

Gransberg continues, “I would not be speaking to you today if it were not from the strong foundation of support built by my colleagues, my students, and my family. My mother passed away last May and my father fell ill Monday and was unable to attend this event. Both would have been so proud to be here today.” He says, “They molded my character, gave me their values, and demanded that I not let reality get in the way of achieving my dreams. I adopted the motto: Virtute non Verbis – Latin for Deeds not Words. I got that from my parents.”

Gransberg also gave credit to his wife of 37 years as the “the real secret” to his success. She agreed for the 14th time to relocate their family to Ames, when “Jim Alleman and Jonathon Wickert showed me that they were truly and deeply proud of the ISU ConE program,” Gransberg continues, “It was the positive energy that I sensed emanating in Ames that sealed the deal. I hope to contribute that same energy in my own way. I thank the Greenwoods and the ISU community for this high honor and I humbly pledge to deliver a positive return on this investment.

Cornerstone Learning Community

Job Site Tours

By Daniel Dammann

As part of the ConE 122 Cornerstone Learning Community, we were given the opportunity to visit a Russell Construction job site in downtown Des Moines. Our industry mentor, Josh Miltenberger, showed us around the construction site of the new YMCA Men's Supportive Housing center. It was a great chance to see first-hand what an exciting, and sometimes challenging, industry us students will be entering into soon. We always appreciate being able to spend time with a Construction Engineering graduate. Josh provided us with insight on how to "get ahead of the game" and make it through the program with the skills necessary to succeed in our upcoming careers. Job site tours are a great opportunity for students to see what is currently going on in the construction industry, help get us excited about our futures, and to give us a chance to converse with industry professionals.

Giving Back: Students Carry Out Service Learning Projects

By Kathleen Miller

Here are pictures of my learning community small group volunteering for Bowling with Buddies at Perfect Games. The assignment was to do something for the community and we chose this program through the ARC of Story County. Bowling with Buddies provides disabled community members an opportunity to get out and have fun in a safe environment.

The ARC also provides a discount for the players. While there, we greeted the players and kept track of their names on a list. They also paid for us to rent shoes and bowl with the group. We were encouraged to mingle with everyone, which is what we are doing in the pictures. It was a lot of fun to see their excitement in knocking pins down and to see how good some of them are despite being disabled.

By Austin Maginnis

The members of my Learning Community small group attended a job site tour of the Veterans Memorial Remodel Project in downtown Des Moines put on by Ben Bunge of The Weitz Company. In this photo, Ben is explaining the concept of reinforcing the footings and size of the columns in the foundation of the Veterans Memorial. The Weitz Company is still in the process of converting the building from its previous use as the site of the Iowa High School Basketball State Tournament to its new use as an entertainment venue for the greater Des Moines area.

It just goes to show that even with having a disadvantage in life. People can achieve anything if they set their mind to it.

Job Site Tour: Iowa State Veterinary Medical Center
By Austin Gehm

For our jobsite tour assignment, my group visited the renovation project at the Iowa State Veterinary Medical Center with JE Dunn Construction. This was a very rewarding opportunity for us as we were able to see first-hand the ins and outs of an operating construction site.

We were shown the kinds of things that we will be doing in the future and learned about daily obstacles we will encounter. My favorite piece of information I took from this experience is the knowledge that everyday provides a new challenge. It excites me to know that each day will bring something different.

Special Points of Interest:

- Number of Freshmen: 48
- Number of Transfer Students: 57

Learning Community Coordinators:

Fall 2010: Beth Hartmann
Kristin Mauro

Spring 2011: Larry Cormicle
Kristin Mauro

Fall 2010 Peer Mentors:

Dan Blake	Trevor Bown
Maria Hannasch	Trevor Otto
Renee Pike	Terese Ragaller
Phill Shaw	Kyle Vansice
David Warning	Lee Yocum

Spring 2011 Peer Mentors:

Dan Blake	Trevor Brown
Maria Hannasch	Andy Hodge
Jared Neiers	Trevor Otto
Hannah Pechmann	Grant Reimers
Bryce Satterly	Justin Wenger

Thank you Beth!

Beth Hartmann, lecturer for the CCEE Department and co-coordinator of the learning community the past couple semesters, will not be back in learning community in the spring. The College of Engineering has asked her to help develop a leadership program so she will be focusing her time on that endeavor. Larry Cormicle, senior lecturer, will take over her position as co-coordinator. Beth has invested a lot in her short duration as co-coordinator and we will all miss her leadership and enthusiasm. Thank you, Beth, for all you have contributed to making learning community a success!

ConE Learning Community receives Outstanding Innovations Award

The [Construction Engineering Cornerstone Learning Community](#) was selected to receive the 2010 Learning Communities Outstanding Innovations award. This award honors members of the Iowa State community who have made new and creative contributions to learning communities.

Congratulations to CCEE construction engineering advisor **Kristin Mauro** (*pictured*) and CCEE lecturer **Beth Hartmann** for their hard work. Beth said, "I couldn't be more proud of everyone for their excellent ideas, work, and continuous improvement to make the Cornerstone Learning Community one of the best on campus. I also want to thank **Trevor Otto** and **Jordan Hutchens** for their student letters, which were part of our nomination package."

Kristin, Beth and the peer mentors at the end of the semester get together.

Ali Bitar (BS ConE '80)

Ali Bitar at Runway 1C-19C Rehabilitation contract with the main terminal at Dulles and the old Control Tower behind.

Ali started his career as a Project Manager for a local company in Riyadh, Saudi Arabia and worked in the Kingdom for seven years. He moved back to USA working for the The Lane Construction Corporation for seven years and started his own franchise. After five years, he returned to the field to become the General Manager for Quality Control for a DOD JOCK contractor (Beneco Enterprises out of Salt Lake Utah, after Beneco was bought out by IT Group.)

In 2001, He joined Delon Hampton and Associates, which is part of the joint venture Parsons Management Company, as a Resident Engineer at Dulles International Airport, where he has been since promoted to Senior Resident Engineer. The program management contract was re-bid and, as a result, Ali stayed at the same position but changed companies in joining Belstar Inc., which is a minority contractor for the PMC (Like all Federal contracts, it requires 25% minority participation). PMC is the Program Manager for Washington Metropolitan Airport Authority for the two airports Washington Dulles and Ronald Reagan National Airport.

One of the contract highlights he has worked on is the North Area Roadway's 220 million dollar Road Improvement of the Dulles Access Highway, and his latest contract is the Rehabilitation of Runway 1C -19C contract with 15 Million dollars of stimulus money and 6 million FAA funding.

ConE Internship Program

The internship/coop program by construction engineering students for the summer of 2011 has one hundred-eleven (111) students participating. This is an increase of 58% from the summer of 2010 enrollment.

Many of you have been hiring our construction engineering students for years as summer interns, with great success in hiring new graduates a year or two later. My personal thanks to all alumni and their employers for your continued support of the intern/coop program. For those of you that have yet to recruit our students for intern assignments, consider adding our program to your hiring goals and begin recruiting this fall for next summer's interns. With our undergrad enrollment at almost 400 students, you will find almost every student looking for that intern position.

The internship and coop program for construction engineering students is a great way for employers to begin recruiting our future grads. Many of our recent graduates accepted their first job with an employer that they worked for at least one term as an intern.

Many employers prefer to hire students as interns for either a summer, or for an eight month period covering either the spring and summer semesters, or the summer and fall semesters. Whether a three month summer only, or an eight month two semester term, employers are increasingly finding this intern or coop arrangement the best way to find future new graduates.

The intern/coop program is administered by Engineering Career Services within the College of Engineering. Check out the web site below for more information for employers:

<http://www.engineering.iastate.edu/ecs/employers.html>

The intern/coop program is provided at no cost to either the student or the employer. The reporting is

simplified and is paperless using a web-based reporting system. Students and employers will find the reporting process quick and easy at the end of the student's intern/coop work period.

We are asking all students that have a summer intern position to formally sign up for the internship program. Many students that work the three summer months as an intern have elected to not sign up for the formal program. In the ever tightening budget situation at ISU, the more we can document the summer intern experience, the more successful we will be in obtaining the financial resources for our program. As employers we ask that you strongly encourage your intern employees to participate in the formal intern/coop program. Their involvement begins with a short meeting with me as the faculty advisor of the intern/coop program. Your support would be greatly appreciated.

Just as a side note, for the entire college of engineering there are 457 summer intern/coop engineering students enrolled for the summer of 2011. The construction engineering total of 111 comprises 24 percent of the entire college of engineering summer intern students. Yet the ConE undergraduate enrollment of 385 last spring semester is only 7 percent of the total undergraduate enrollment in the College of Engineering.

Larry W. Cormicle
Faculty Advisor for Intern/Coop Program
Construction Engineering

ConE Women

Article by Jennifer Shane

The ConE Ladies had another busy year, kicked off by a picnic at a local park on September 12. Kiewit continued to sponsor the student's membership and participation in the National Association of Women in Construction. In November the ladies visited Hubbell in Des Moines and toured several job sites including houses and apartments under construction. In December five ladies graduated. In January, Dr. Shane hosted the ladies at her house to kick off another semester. The spring company/job site visit took the ladies to Minneapolis to visit Mortenson. On this trip we had the unique experience of visiting the Minnesota Zoo and the Lakewood Mausoleum. Finally, the spring saw eight ladies graduate from ConE. For both graduations the program continued the new tradition of presenting a gift to the graduating seniors, pink hard hats.

This year the ladies of civil engineering paid an enormous compliment to the ConE Ladies by starting their own Civil Ladies group. The two groups participated in a snow tubing event together in January.

Additionally, one of the ladies that graduated in December, Claire Bassett, continued to make waves with a group of Girl Scouts that she became involved with in the 2009-2010 academic year. This year the Flying Monkeys, led in part by Claire, participated in the FIRST Lego League competition and developed a prosthetic device to help a little girl born with a congenital hand deformity grip pencil or crayon to color and write. Claire and the Flying Monkeys appeared in the Iowa State Daily, the Ames Tribune, and on the Des Moines news several times. The team also won the Global Innovation Award which will provide the team with \$20,000 towards patenting and prototyping their invention.

Figure 1 Hubbell visit

Figure 2 Mortenson visit

Figure 3 Graduating and returning ConE ladies

MCA Student Chapter

It has been a year of continued traditions and new activities for the ISU Mechanical Contractors Association Student Chapter.

For a few, this year actually began in June with a new fundraiser. With great support from the MCA of Iowa, our first sporting clays event was held at the Highland Hideaway Hunting Club in Riverside, Iowa. A group of contractors, designer, suppliers, and students braved a stormy day and enjoyed a great day of shooting.

The fall semester began with many new faces around the student chapter and high expectations for the year to come. We kicked off the year with a pizza and game night at Perfect Games here in Ames. There was a great turnout for the event and students were able to enjoy food, bowling and laser tag, as well as get acquainted with the student chapter.

We had two other major events in the fall semester. First, four students attended the MCAA Student Summit in Chicago, Illinois. Along with attending presentations by a number of mechanical contractors and designers, the group also participated in a mini team competition and shared our chapter's activities with the other schools. We also toured ITT's Bell & Gossett manufacturing facility and the Ann and Robert H. Lurie Children's Hospital jobsite. To cap of the event, MCAA arranged an architectural boat tour of the city.

The second major event was the annual golf outing hosted by the Harvester Golf Club in Rhodes, Iowa. Similar to the sporting clays event, it was another blustery day. We were still pleased with the turnout and everyone enjoyed a round of golf.

Besides these events, the student chapter had its regular monthly meetings and submitted a proposal for the MCAA Student Chapter Competition. We didn't place as well as hoped, but the competition was a great learning experience for all who helped out.

The spring semester hasn't been quite as packed as far as major events go. We did, however, send two students to the MCAA Annual Convention. It was

held in Wailea, Maui, Hawaii. They had the opportunity to hear speakers present on the most current happenings as well as the future of our industry. They were also able to meet numerous contractors from central Iowa and others from across the country. In mid-March a small group of students made a day trip to the SPX Cooling research and development facility in Kansas City. Their labs are completely underground in large caves, making this a unique site to visit.

Still to come this semester are tours of an active jobsite and of an existing building's mechanical system. We're expecting great turnouts for both tours and are excited to get more real world experience in our industry.

This has been a great year for the MCA Student Chapter. Many students have had the chance to share fun and educational experiences and have advanced their futures in our industry through the chapter. Many thanks go out to the CCEE Department, our faculty adviser Brad Perkins, and the MCA of Iowa for making this year possible. We're looking forward to continuing similar events and traditions in the years to come.

NECA Student Chapter

As a student-run organization NECA focuses on helping our members succeed in both school and industry. Our goals are to integrate students and young professionals into the Electrical Construction Industry. We do this by promoting interaction between construction engineering and electrical engineering students and professionals of electrical construction. We also help said students in pursuit of internships, co-ops, and future employment. The Green Energy Challenge plays a large part in achieving these goals. It is a nationwide competition in which groups create a proposal for improving the energy efficiency and carbon footprint of a local building.

This year NECA has held three general meetings. We had speakers from Baker Electric, Nelson Electric, and the Iowa State faculty. Also, we have put together a team for competing in the 2011 Green Energy Challenge, which will focus on improving the efficiency of the Hellser dorm on campus.

National Construction Association Awards Student Groups in California, Iowa, and Kansas With Outstanding Chapter Award

Three College Organizations Receive Top Awards for Building a Better Quality of Life in their Community

California State Chico, Iowa State and Kansas State Universities are home to the nation's top collegiate construction associations this year according to an analysis of award applications conducted by the Associated General Contractors of America. As a result, the three student groups will each receive the association's Outstanding Student Chapter award.

"These chapters not only learned new skills while contributing to a good cause but also built relationships with many different organizations in the community," said Ted Aadland, the association's president and president of Portland, Ore.-based Aadland Evans Constructors. "It's clear that these students are the future of our industry and we look forward to what they will bring to the world of construction."

Aadland noted that the California State University, Chico AGC Student Chapter was selected as the top student group, largely for its work building new transitional housing for victims of domestic violence. The project consisted of 266 students who built two 840 square foot houses in nine days. The effort totaled roughly 15,000 man-hours, including planning and developing and post-project work. In addition to the transitional housing project, the students renovated a local emergency homeless shelter, Torres Shelter, by adding on additional sleeping rooms and offices. The University chapter was also named one of the best chapters last year. Thanks to their accomplishments, the student chapter will receive \$1,500 to help finance their operations.

Iowa State University Associated General Contractors was selected as the second-best student group thanks to its work building new handicap accessible ramps along the Skunk River Water Trail in Ames, Iowa. The group brought together many local organizations to invest nearly 300 man-hours building these ramps. As a result, it will receive \$750 from the association.

Kansas State University's AGC Student Chapter was named the nation's third-best student construction group for its continued efforts in rebuilding the Hurricane-devastated city of New Orleans. A group of 25 volunteers invested over 900 hours to help renovate the homes of three Katrina victims, which involved a wide range of residential construction tasks and also a roofing job. Kansas State was also a recipient of one the awards last year. The association will provide the chapter with \$400.

A panel of six judges representing a cross-section of the construction industry evaluated the applications for this year's Student Chapter Awards contest. School groups were rated based on their accomplishments during the 2009-2010 school year. There are approximately 200 University-level student construction groups nationwide.

Spring Break 2011

ISU AGC Student Chapter volunteers their labor and construction skills.

The Iowa State University Associated General Contractors of America, Student Chapter (AGC) spent Spring Break helping people in need. Since the flooding of Iowa in 2008, the AGC focused their attention away from the damage left by Hurricane Katrina in the Gulf and towards their neighbors in Eastern Iowa. This year, the AGC helped the people of Cedar Rapids, Palo, and Iowa City.

Private contractors supported the service trip. Their donations made it possible to mobilize the organization, feed the volunteers, and perform the much-needed work.

The AGC coordinated with Hope Community Development Association in Cedar Rapids, the City of Palo, and the Iowa City Habitat for Humanity. The communities in those areas still feel the sting of the 2008 floods. The area is in a state of transition – demolition of flood-ravished homes is finishing while the people await the construction of over 280 new homes. However,

funding slated for post-flood reconstruction is slow-coming and becoming scarce, and the residents are running out of steam.

The AGC mobilized on Friday, March 11 and worked throughout the weekend and following week. The AGC members are primarily students of construction engineering (ConE), and many are skilled in construction trades. These members managed the crews and construction on the ground. Project types were varied and included foundation construction, floor and wall framing; drywall, insulation and siding installation, cabinetry, fencing, and playground and dugout construction.

Project highlights include:

Palo

- Playground
- Backstop
- Dugout Roofs
- Depot Foundation
- Garage Siding for Military Family
- Finish Trim
- Paint

Cedar Rapids

- Addition to Home.
- Insulation and Drywall (2400 SF)
- Floor Framing for 2-Family Home

Over two years had gone by and this home still had no drywall or insulation installed. The floor joists were incorrectly fixed and the second floor was sagging three inches. We went in and trued up their floor by installing new joists and girders. From there we furred out the walls, insulated, and dry walled the remaining parts that we could. This home was occupied by two families with a combined 5 children. The father was an iron worker that had been laid off for over a year. This home truly gave everyone the feeling that they were here for a purpose.

Iowa City

- Finish work in Habitat Re-store
- Garage roof and roofing
- Stoop
- Fence for Veteran's dog

The residents of Eastern Iowa were extremely thankful for our work. This was the third year we had made an appearance in Palo. When we contacted them to let the town know that we were

interested in coming, they lined up enough work to keep everyone in town because they had seen what we capable of. The city employees were very grateful for the students because the town seemed to be exhausted and was running low on ambition to get all of these projects completed. Going back and talking to the homes owners that we had helped rehabilitate in 2009 was one of the most rewarding parts of this trip. They knew all the returning students by name and asked if everyone could stay a couple of hours to talk. This commitment to service has touched more than communities and towns. Homeowners once again have a renewed desire to work on their houses and turn them into their homes.

The members of the AGC were equally affected by the nature of the service trip. Many who had not been on this trip before took away a lot more than they thought they would. With all the tragedy that struck in 2008, many people thought everything was put back together. That's not the case and every student realizes that now after spending a week helping families out. The weather on the trip was a little on the brisk side. With 10 degrees and 20 mph wind the dugouts were built with many breaks in order not to get too cold.

The AGC's mission is to help those who cannot help themselves. That said, the organization found time for rest and recreation. The AGC toured the Federal Courthouse which was still under construction in Cedar Rapids and the Palo Town Hall. A Friday-night fish fry hosted by the AGC and the JCs of Palo was a member-favorite event. Over 450 people gathered that night to enjoy a delicious meal and exchange stories.

In short, the trip was poetry-inspiring. An AGC alum writes:

*"...Here are the ConE's, piling out of the vans
With saws, levels and drills in all of their hands
...
Each morning they left their beds, long before the
sun woke
And did not quit working until their bodies felt
broke
...
From what had been just lumber, new homes had
arose
Because they weren't just builders, those ConEs
were heroes"*

Four Iowa State University Teams Place First and Sweep the Associated Schools of Construction Region IV Student Competition (2009)

Four teams of ISU Construction Engineering students won first place at the 17th annual Associated Schools of Construction Region IV Competition that was held in Nebraska City, Nebraska on October 28-31, 2009. The commercial, design-build, heavy/civil and residential teams all placed first. In the seventeen year history of the Associate Schools of Construction Region IV Student Competition, this is the first ever sweep of all four divisions championships by one university. Over the past eight years ISU construction engineering teams have placed first seventeen times.

The commercial team responded to a mock request for proposals for a \$5.7 million project for the AKSARBEN VILLAGE – Office Building 5 Core & Shell. The 37,011 SF building is the future home office for the DLR Group in Omaha, Nebraska, who is also the design architect for the project. The project will have LEED gold certification. The winning commercial team members are: Matt Karns (team captain), Austin Davis, Nate Stevenson, Luke Daugherty, Tyler Kumm and Kathryn Kern. In recent years the commercial team placed first in 2003, 2004, 2006, 2007 and 2009.

The design-build team responded to a mock request for the Armed Forces Reserve Training Facility and Field Equipment Shop in Colorado Springs, CO with a Guaranteed Maximum Price of \$ 65,243,231. The project consists of approximately 120,000 gross square feet of classrooms, administrative areas, assembly hall, kitchen, simulator rooms, weapon vaults, and medical suites designed to support the training of the four Colorado Armed Forces Reserve branches; Army National Guard, US Army Reserve, US Navy Reserve, and US Marine Corps Reserve. This project also consists of a 50,000 gross square foot Field Equipment Shop with offices and maintenance work bays for military vehicles. The facility and site must be compliant with AF/FP requirements, and achieve a LEED Silver rating. The winning design/build team members are: Angela Rohde (team captain), Peter

Kataras, Jimmy Hilton, Rob Cotan, Anthony Brown and Beau Artist (architecture). This is the eleventh out of the last twelve years that the design-build team has won this first place award.

The heavy/civil team responded to a mock request for proposals for the \$11.1 million Sandy River Conduit Relocation in Portland, Oregon. The project involved the excavation of a tunnel 105 feet below ground level, beneath the Sandy River, for two six foot in diameter conduits which carry 80% of Portland's water supply. The project also involved a 30 foot and two nine foot in diameter vertical shafts for access. Heavy/civil team members are: Tanner Wilks (team captain), Nick Roberts, Scott Hoskins, Andrew Tribble, Cole Van Ryswyk and Ryan Noteboom. In recent years the heavy/civil team placed first in 2004, 2005 and 2009. They also have placed second or third in five prior competitions.

The residential team responded to a mock request for the Ridgemoor Estates residential development located in western Omaha, Nebraska. They submitted a development proposal to a lending institution to request financing to develop 315 single family homes on 78 acres of land. The proposal included a market analysis, marketing plan, site plan, schedule, construction estimates and financial proforma. The winning residential team members are: Mike Pokorney (team captain), Blake Pratt, Dave Warning, Branton Smith, Wes Hazelett and Rachel Rottinghaus. In seven years that ISU has competed in the residential division, this is their third first-place finish.

All teams were allowed only eighteen hours in a hotel room with six computers and four printers to develop a unlimited page proposal including full schedule, estimate, and company qualifications, with the design-build team also producing ten architectural design computer drawings and building a computer generated three-dimensional model of the project. Thirty-five hours later, all teams made a twenty minute presentation in support of their proposal to a group of industry judges who were involved in construction of the actual project followed by ten minutes of questions and answers.

ISU faculty member Larry Cormicle, (ISU ConE '78), coached all four teams prior and during the competition. Twenty-nine teams from thirteen

universities competed representing the states of North Dakota, South Dakota, Minnesota, Iowa, Nebraska, Missouri and Kansas.

Three Iowa State teams place first, another places second in construction engineering competition (2010)

Three teams of construction engineering students from Iowa State University placed first in the 18th Annual Associated Schools of Construction (ASC) Region IV Student Competition held October 27-30, 2010 in Nebraska City, Nebraska. The commercial, design-build and residential teams placed first. The heavy/highway team placed second. This was the third time that Iowa State teams have placed first in three out of the four divisions. Twenty-seven teams (six students per team) representing 13 universities from Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota competed. Over the past 9 years, Iowa State teams have placed first 20 times.

Each team had 18 hours and the use of 6 computers and 3 printers to develop a comprehensive proposal in response to a mock request for proposals. In addition the design-build team produced eight architectural design computer drawings and built a computer generated three-dimensional model of the project. Upon completion of their proposals, each team gave 20-minute presentations in support of their proposal to a group of industry judges who were involved in construction of the actual projects. Ten minutes of questions and answers followed each presentation.

The commercial team responded to a mock request for proposals for a \$20.3 million project for the Columbia Orthopaedic Group Institute. The 70,500 square foot three-story office building is located in Columbia, Missouri. The medical building contains four operating rooms and a MRI suite on the first floor, plus administrative offices and medical exam offices on the second and third levels. The winning commercial team members are seniors Kathryn Kern (team captain), Erica Kabat, and Bailey Marlow; junior Tyler Kumm; and sophomores Justin Wenger and Hannah Pechmann. The commercial team has won the first place award 6 out of the past 9 years.

The design-build team responded to a mock request for the San Martin Elementary School for the California Unified School Board, with a guaranteed maximum price of \$24,993,000. The project consisted of classrooms, administrative areas, a gymnasium, and common areas for 840 students, faculty and staff. The design placed emphasis on environmental responsiveness through solar design, ventilation, and sustainable building. Additionally, the design was grounded in research into early child development to enhance the success and well-being of the students. The facility and site had to qualify for a LEED Gold rating. The winning design/build team members are seniors Zach Dennis and Jacob Conkin; juniors Rob Cotan (team captain), and Lauren Caswell; sophomore Trevor Otto; and architecture senior Andrew Dickman. The design-build team has won the first place award 12 out of the last 13 years.

The heavy/highway team responded to a mock request for proposals for the \$9.4 million I-430/I-630 Interchange Modifications (Phase II) located in Little Rock, Arkansas. The project consisted of demolishing and replacing the I-430 overpasses. Since the interchange was so busy, road closures were not allowed and lane closures were restricted to nights only. The project was further limited by a 365 working day maximum. Heavy/highway team members are seniors Scott Hoskins (team captain), Ryan Noteboom and Lauren Wiest; junior Cole Van Ryswyk; and sophomores Grant Reimers and Jordan Einck. The heavy/highway team has won the first place award 3 out of the last 6 years, and placed second 2 out of the last 6 years.

The residential team responded to a mock request for a residential development located in Papillion, Nebraska. They submitted a development proposal to a lending institution to request financing to develop 93 single-family homes on 17 acres of land. The proposal included a market analysis, marketing plan, site plan, schedule, construction estimates, and financial proforma. Considerations were made regarding water runoff for the site plan as well as reducing energy consumption on each of the houses. The winning residential team members are seniors David Warning (team captain), Logan Brinkman and Wesley Hinnah; juniors Wes Hazelett and Rachel Rottinghaus; and sophomore Jace Christensen. The residential team

has won the first place award 3 out of the past 4 years.

Larry Cormicle, a 1978 B.S. and 2010 M.S. construction engineering alum and faculty member in construction engineering, coached all four teams prior to and during the competition. Mr. Cormicle has coached all four teams over the past nine years.

Iowa State University Receives Second Place in AGC Outstanding Student Chapter Contest

October 29, 2010 02:32 PM

Category: CCEE News

Iowa State University Associated General Contractors (AGC) Student Chapter was awarded second place in the 2010 AGC Outstanding Student Chapter Contest for its work building new handicap accessible ramps along the Skunk River Water Trail in Ames, Iowa. The group brought together numerous local organizations to invest nearly 300 man-hours building these ramps to benefit their community.

"Community service is the cornerstone of our student chapter," says Scott Hoskins, senior in Construction Engineering and current AGC Student Chapter President. "We do it first and foremost to give back to our community, but we also use it as a way for members with construction experience to teach other inexperienced members skills they would not learn otherwise. Our advisor Larry Cormicle has told us for many years: It is not enough to simply make money—you are not a successful contractor until you give back to the community that you work in. We have taken this attitude to heart when it comes to organizing activities for our student chapter." Hoskins was the community service representative last year that organized the boat ramp project.

Each year, AGC recognizes the top three student chapters for their dedication to community and public service projects. First prize went to California State University, Chico and third to Kansas State University.

Sigma Lambda Chi

Sigma Lambda Chi (SLC) is an international honor society for Construction. The Construction Engineering program at ISU is home to the Rho chapter of SLC. The fundamental purpose of SLC is to provide recognition to outstanding students in the construction curricula. Sigma Lambda Chi is open to students in the top 20% of the junior and senior ConE class. Upon initiation, new inductees are lifetime members. The 2010-2011 academic year welcomed the initiation of 15 new members.

As an honor society SLC provides services to the community, university, and department. This year we hosted ten Hotel Lego events. These events are for grades K-12 and introduce students to ConE and ISU. SLC enjoys hosting these events to encourage future ISU students to consider engineering and the construction program as a possible major.

This past fall SLC helped with the celebration of the 50th Anniversary of the ConE program by helping with and attending the 50th Anniversary banquet. At that event, SLC sold ConE polo and special 50th Anniversary polo's and jackets to students, faculty and guests.

This next year SLC plans to continue with our initiations, service and social events.

Spring 2011 Initiates

Fall 2010 Initiates

NAHB Student Chapter

National Association of Home Builders

The goals of the ISU National Association of Home Builders (NAHB) Student Chapter are to develop and support an interest in residential construction and development. The key objectives used to accomplish this goal shall be to:

- Promote communication and networking between the industry and student members.
- Familiarize the students, faculty and administration with the professional charter and economic impact of the residential industry.
- To promote and emphasize professional and social aspects of the student organization.
- To acquaint the students with the new trends and ideas in the residential construction industry so that he/she may be better prepared for his/her future work.

Approaching the fifth year as a Construction Engineering student organization, our membership base has expanded tremendously over the past couple of years. Student involvement has been a large part of our success. This past year we introduced the successes and failures of land development, the new home design process, lath and plaster methods, and green building techniques. We also brought in a large Midwest home builder to talk about production home building, giving students another perspective on building homes. Each year we end with our last meeting introducing the housing market and what it takes to buy a house. This is targeted to students interested in purchasing a home in the next couple of years and focuses on realtor relationships and financing options.

We are closely involved with the local Home Builders Association helping with various community outreach projects. Our students have the opportunity to attend Ames Home Builders Association meetings to learn about current

housing issues and interact with industry members.

In January, six of our members competed for the fourth consecutive year in the NAHB Residential Construction Management Competition in Orlando, FL. The project was a model home complex with administrative sales offices for an on your lot custom building in the North Carolina region. The team put together a full development proposal complete with construction estimate, schedule, project management, marketing, and green initiatives packages. The proposal was then presented to a panel of judges acting as investors with the intent to convince them the development would be a profitable project. We finished 15th in the field of 35 teams from across the country.

Our attendance at our monthly meetings, community service and social events show the great potential our chapter has in continuing to be one of the strong organizations in the Construction Engineering Program at Iowa State University.

The DBIA Student Chapter at Iowa State University is a student-run organization devoted to promoting knowledge of design-build and related topics. It is open to any student interested in the integration of both

design and construction into a single-source entity.

With nearly thirty active members, students are striving to become more involved with the chapter. The year started with a kick-off meeting in September featuring Dean McCormick as presenter. Mr. McCormick spoke to the students about the current construction projects occurring at Iowa State, the effects of this summer's flooding events on campus, and what to expect in future years. After a successful start, twelve students volunteered to help at the DBIA-Iowa Chapter annual golf tournament just a few days later. Although it rained, students determined that it was still a success and enjoyed the experience of interacting with industry personnel.

In October, the US Army Corps of Engineers Rock Island District presented on current projects they have at Saylorville Lake, Iowa. The Chapter concluded the month by sending two students to the DBIA National Convention in Las Vegas. They were fortunate to be there, along with Chapter Advisor Dr. Kelly Strong, to witness Chapter Advisor Dr. Jennifer Shane receive a national leadership award. The chapter hopes to send more students to next year's National Convention in Orlando, Florida. In November, Woodruff Companies out of Ames, IA presented at the chapter's general meeting. The semester ended with a Sunday "Funday" event of snacks and games, right before Dead Week, to give students a break from studying for finals.

The start of the Spring Semester brought a lot of changes to the club's traditional monthly meetings. Students enjoyed a tour of Iowa State's Sukup Basketball Facility hosted by Chris Jorgenson and the athletic department. The

attendance for this event was high, and Paul Koester, DBIA-Iowa Chapter President, attended the event as well. For the chapter's general meeting in March, Nathan Hagberg from Wolin & Associates, Inc. spoke to students about the progress of design-build legislation in Iowa. Oretta Smith of the DBIA Mid-America Region came in April to talk about national design-build awards.

The Chapter sent eight students to the Design-Build in Transportation Conference in Kansas City in late March. A lot of networking took place among students and industry professionals. The conference was available to students at a reduced cost thanks to a sponsorship given by HNTB (Howard, Needles, Tammen & Bergendoff). As a

Figure 4. 2010-2011 Student Chapter Cabinet Members: Treasurer Trevor Otto, President Krista Morris, Secretary Colin Judd, VP Bo Weber, Webmaster Tim Van Hiel

thank you for their support, students were able to visit HNTB's headquarters in Kansas City and learn about current projects they are working on.

Sponsoring the student chapter this year is DBIA-Mid America Region, Interstate Systems of Sioux City, and HNTB. If you would like to help sponsor the student chapter please send us an e-mail at dbia@iastate.edu. Thank you to all of this year's sponsors! For more information please visit our website at <http://www.isudbia.org>.

The Jellinger Lecture Series welcomes its first speaker Tudor Van Hampton

Chuck Jahren and Tudor Van Hampton
March 02, 2011 02:13 PM
Category: CCEE Events

On February 24, the Jellinger Lecture Series welcomed its first speaker **Tudor Van Hampton** for his lecture entitled, “Operator Training and Certification Requirements”.

During his visit to CCEE, Van Hampton gave a lunchtime lecture, which was open to the public, as well as a lecture to the ConE 322 class. He gave a short presentation to the ConE Learning Community. He also discussed writing at a graduate student meeting and enjoyed dinner with faculty, graduate students and peer mentors.

Tudor Van Hampton is Engineering News-Record’s (ENR) Midwest Bureau Chief and has a

writing background spanning more than a decade in science and technology. Van Hampton has reported from all around the world, including Europe, the Middle East and China. He is a regular contributor to The New York Times for the automotive sector and provides on-the-air business analysis for national television and radio news stations.

Van Hampton holds bachelor degrees in English and Theatre & Film from the University of Kansas and is a Certified Crane Operator.

On March 30, the Jellinger Lecture Series welcomed its second speaker **Susan L. Tighe** for her lecture entitled, “Sustainable Pavement Engineering: How to Incorporate into Design, Construction and Maintenance”.

Susan L. Tighe is the Canada Research Chair (CRC) in Sustainable Pavement and Infrastructure Management and Director of the Centre for Pavement and Transportation Technology, Dr. Tighe’s key research areas include:

- Sustainable pavement engineering and management
- Evaluation of climate change on roads
- Long life infrastructure
- Application of asset management to highway and airport operations
- Designing and building safer roads and airfields
- Life cycle economic analysis for infrastructure management and evaluating materials
- Development and evaluation of infrastructure management system components
- Solar technology in roads and pavement infrastructure - Researchers at the University of Waterloo, within the faculty

of engineering are collaborating to develop a solar technology that could be used in a solar road.

On April 21, **Cliff Schexnayder**, Ph.D., PE, Eminent Scholar Emeritus, Arizona State University, presented the third Jellinger Distinguished Lecture.

Cliff's presentation titled "Bridge and Road Performance-Maule Earthquake Chile 2010" was about the design and construction of bridges in Chile and the impacts of the 2010 magnitude 8.8 earthquake. Cliff discussed the use of diaphragms, shear keys, and other bridge components and their success or failure during the earthquake. Cliff also talked about the aftermath and rebuilding the structures, including the lessons learned. Cliff concluded talking about the obligations of engineers to design and build economical and safe structures and the need to use care when making judgments.

CE.ConE junior Krista Morris selected for US Navy's collegiate program

December 20, 2010 04:01 PM
Category: CCEE News

Krista Morris, a junior in Civil Engineering and the President of the Iowa State Design-Build Institute of America student chapter, was one of 11 students selected in the Nation to become part of the United States Navy's Civil Engineer Corps (CEC) Collegiate Program.

On December 10, 2010, Krista raised her hand and took an oath to serve her country in the U.S. Navy at the Memorial Union at Iowa State

University. Krista's father, Vilas Morris, a former Marine, delivered the oath. Beth Hartmann, lecturer in the CCEE Department and Retired U.S. Navy CEC Officer, served as the Witnessing Officer. Krista is now serving as an E3 in the Navy. She is receiving full pay and benefits to finish her degree. Upon graduation, Krista will attend Officer Candidate School and receive her Commission as an Ensign in the U.S. Navy's CEC.

News from Paul Giroux Paul Giroux (BS ConE '79)

Paul Giroux delivered the closing presentation "Building Hoover Dam" in October 2010 at the American Society of Civil Engineering's (ASCE) Hoover Dam 75th Anniversary Symposium in Las Vegas.

Hoover Dam was unprecedented in its challenges, size, and scope. Requiring 3.25 million cubic yards of concrete, building Hoover Dam required the convergence of extraordinary men, machines, and methods in order to meet the challenge. Utilizing a combination of historic photographs and dynamic animation techniques, Paul Giroux brings the construction of the dam to life, providing a unique learning opportunity.

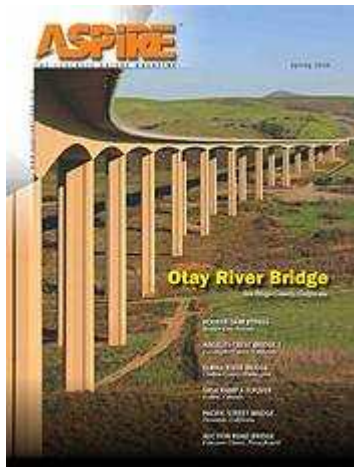

In May of 2008, Giroux was the ASCE Chairman for the Brooklyn Bridge 125th anniversary celebration and delivered the featured presentation for the three day event. He is currently serving as

the ASCE Chairman for the Golden Gate Bridge 75th anniversary.

Paul Giroux

Cover of Spring 2010 issue of ASPIRE

Paul Giroux (BS ConE '79) was featured in the Spring 2010 issue of *ASPIRE: The Concrete Bridge Magazine* for his work with sustainable bridges. The article features Paul's work with the T-Rex Project. Denver's T-Rex Project resulted from the Colorado Department of Transportation and the Regional Transportation District teaming to deliver the nation's first multimodal project to use the design-build delivery method. Seventy-five bridges and tunnels were built as part of the project, which has enhanced national, regional, and local mobility along the I-25 and I-225 corridors.

Iowa State graduate student receives national recognition

Iowa State University graduate student Timothy Becker has received national recognition from the Society of Professional Engineers. Becker, who graduated from Iowa State in 1994 with a BS in construction

engineering and returned 15 years later to pursue a PhD in civil, construction, and environmental engineering, was awarded the 2011 Professional Engineers in Construction George B. Hightower, P.E. Fellowship.

He had a humbled, but excited, response to the fellowship. "I am very honored to be selected for this nationally competitive award," he said. Becker added that in addition to acknowledging his work, the fellowship helps offset the expenses of his education.

The fellowship was established to honor George B. Hightower's contributions to the engineering profession. Each year it is awarded to an outstanding engineering graduate student on the basis of GPA, recommendations, honors, professional experience, and an essay about career goals. The recipient is awarded \$3,000 to apply toward his or her graduate education in engineering.

Becker's professional talents and abilities demonstrate why he was selected for this award. After graduating from Iowa State, he moved to Arizona and received an MBA degree from Arizona State University while working full-time in commercial construction and real estate development. He also took on many leadership roles during his career, including vice president of Nelson Development and Construction Services.

After a successful 15 years in Arizona, Becker's thirst for more knowledge led him back to Iowa State in 2009 to pursue his PhD. "I decided to come back because of a desire to contribute to research and higher education in the field of construction," Becker said.

After completing his second year in the graduate program at Iowa State, his ambitions and leadership remain great. Along with his academic and research studies, Becker teaches courses in engineering economics and engineering law. He was also recently elected to the Iowa State University Alumni Association Board of Directors where he will serve a five-year term. As a board member, he assists staff and volunteers in carrying out the goals of learning, scholarship, and engagement as established by the university and other affiliations.

Becker expects to graduate in 2013. He explained that after completing his PhD he has his mind set on a specific career path: "I plan to pursue a tenure track faculty position within a leading school of construction."

Former student gets global engineering perspective

Anna Claussen traveled more during college than many people do in their entire lives. Claussen, who graduated in 2010 with a degree in civil, construction, and environmental engineering and Spanish, took on things she had never imagined she would—surfing, daunting hikes, and spending two months traveling through a new country alone—and she is using these experiences to gain an international outlook on engineering.

ISU Engineering Student Field Day

On March 31, 2011, Scott Ellingson along with help from Masons Mike Ellingson & Wayne Blessing, helped organize the first ever Masonry Institute of Iowa ISU Engineering Student Field Day. Approximately 40 students participated in the hands-on experience of actually building a masonry structure in the parking lot by the Town Engineering Building. Additionally, the students went on a tour of the new ISU REC Center Building that is currently under construction.

Brad Perkins, P.E., Lecturer, ISU, stated “we discussed the Field Day in class, and the students were overwhelmingly positive. They thought that it was a good learning experience, both the tour and especially building the brick/block structure.” With the success of the first event, the hope is to have this become an annual promotion. Our thanks to all who contributed their time, labor and materials to make this day a success! Those include Mike Ellingson, Wayne Blessing, United Brick, Marquart Concrete Products, TCC Materials and the Masonry Institute of Iowa.

Death of ConE Alum:

David Allan Burke
July 22, 1966 - April 13, 2011

Burke, David A. age 44, of Minneapolis passed away April 13, 2011 after a courageous battle with cancer. David will be remembered as a devoted and loving husband, father, and friend whose ready smile and kind spirit touched so many. David graduated with a BS degree in Construction Engineering from Iowa State University in 1989 and enjoyed a career as an Engineer and Project Manager for Mortenson Company in Minneapolis. David was an avid runner and mountain biker and a lover of good wine and food. He will be deeply missed.

BS 1963

Gethmann, Jack (Joan M.) Gethmann Constr., Inc.
(student son of Mr. Tom Jellinger) P.O. Box 160
P.O. Box 160 Marshalltown, IA 50158-0160
Marshalltown, IA 50158-0160
641-751-7372 (cell)
jackgethmann@gmail.com

Old man retirement has finally caught up with me. We split our year between Iowa, Mesa, AZ, and travels. Daughter Jill has operated Gethmann Construction as a third generation firm for 4 ½ years very successfully – which allowed her to purchase my stock. Jill/GCI applied for and received WEB certification. Her organization has been operating at 110% to 125% of standard capacity – people power in the field is the main problem. We have gotten deeply into heavy equipment – especially cranes! GCI has added a misc. and structural steel fabrication division. Areas of major involvement are pile driving, excavation/earthwork/concrete. The floods of 2011 got GCI into building earthen berms/dams – the first one was three miles long and constructed in one week @ 24/7. If you are in the Phoenix, AZ area, call – we are in the phone books.

BS 1964

Neal, Paul (Tony) III (Gwen M. Neal)
Sarah O'Neill (39)
Jeff Neal (36)
Siri Neal (32)
P.O. Box 3368
Homer, AK 99603
907-299-2351
vostokis@ptlalaska.net

We wrapped up our public works and defense general contracting, sold our equipment, after 30 years.

Gwen went to law school and is now a busy criminal defense and family law lawyer with her own practice. Gwen is also a commercial fisher with me in the summer. I am working our commercial fishing business for most of the year. Fishing salmon and halibut in the Bering Sea.

BS 1966

Greenlee, Rich (Carm) Engineering Partners
9012 Meadow Place 9001 E. Bloomington Fwy.
Savage, MN 55378 Bloomington, MN 55420
952-831-2471
rc@rcgreenlee.com

In January of 2011 I transferred ownership of my consulting firm, Engineering Partners, to the young guys. I still get to impart my wisdom on a more “part time” basis. The ConE 50th was truly a memorable experience. So great to see Prof. Jellinger and other friends and classmates especially Cork Peterson, Glen DeStigter and Pat Klein.

Larson, Norman
Kyle A. Larson, 5 (6 in July)
3440 Tripp Ave.
Amarillo, TX 79121
806-316-8577
normlarson@hotmail.com

Retired from Atmos Energy Corp. in '88 when they wanted me to move to the new company headquarters in Dallas.

My son and I just got back from CO visiting my mother (age 93) and my sister and her family. Kyle had a great time learning how to fish, hiking the mountains, operating a skid loader, playing with his many cousins, and petting any dog he found. He was afraid of coming in contact with a bear or a mountain lion but none appeared. Since I don't own a car anymore (I bicycle around town), we went by bus.

My latest projects are improving the insulation in my home and reinforcing my home against tornadoes.

Peterson, Cork (Becky) Peterson Contractors, Inc.
P.O. Box A 104 Blackhawk
Reinbeck, IA 50669 Reinbeck, IA 50669
319-345-2383 319-345-2713 *204
cork@petersoncontractors.com

Cork is still working at PCI. Enjoyed being part of 50th ConE Reunion. Great to see Tom Jellinger and many friends.

BS 1967

Raufaste, Noel J. (Lynn) Knowledge Assess &
Noel Services International
Colleen 202 Captain Robinson Dr.
202 Captain Robinson Dr. Avondale, PA 19311
Avondale, PA 19311 301-467-4747
484-720-8217 nraufaste@erols.com
nraufaste@erols.com

President, Knowledge Access and Services International (KASI). Retired from the National Institute of Standards and Technology (NIST) in 1999 and have been serving as NIST Emeritus and NIST Guest Researcher. After 23 years managing the US-Japan bilateral program on Wind and Seismic Effects I have turned it over to a younger researcher. In April 2011 I completed my two year presidency of NIST's Alumni Association. Remain active in consulting through KASI and as a volunteer in activities such as: Longwood Gardens (tours and writing histories of the du Pont families) and Nemours Mansion (tours and histories). Completed restoration of our French house last October that is located in the foothills of the Pyrenees Mountains, SW France. Always interested in hearing from anyone wanting to take the time to send a note.

BS 1968

Sullivan, Harold P. (Paula)
Jon (30) Anchor Engineering, Inc.
7254 So. Fillmore Circle 3611 Blake St.
Centennial, CO 80122 Denver, CO 80205
303-688-2329 303-783-4797
hpsullivan63@comcast.net sully@anchoreng.com

The commercial construction market in Denver is starting to recover, so my workload is back to normal (in other words, I'm behind). I'm still working as a structural engineering consultant, mostly specializing in post-tensioned concrete structures. For the last 2 years most of my work has been involved with solar energy – reviewing the structural capacity of roofs prior to solar installations and designing racking systems for solar installations. That niche of design work is still alive but has been slowed down due to a cut in the solar rebates.

Paula and I are doing fine. Thoughts of retirement keep creeping into our heads, but unless we win Powerball we'll probably keep working a few more years.

I keep running into young Iowa State graduates due to my work with construction firms. They are usually hard working and well-trained – they always make me proud of Iowa State – keep up the good work!

BS 1970

Guinn, Jack (Jolene)
5319 N 52nd St
Omaha, NE 68104
402-451-0395
jhguinn2@cox.net
Retired

Enjoying retirement with my wife, kids & grandkids.

Hanson, Stanley (Anne)
7526 Vane Street
Omaha, NE 68122-1782
stanley_1_hanson@msn.com
Retired U.S. Army Corps of Engineers

BS 1971

Gordon, Joseph (Sally) RETIRED
8133 Pheasant Run
Fogelsville, PA 18051
610-398-7989
gordoni22@aol.com

Still enjoying retirement, 5 grandchildren, golf, travel, and good health! Sally and Joe say Hi to Tom Jellinger, our hero!!

Powell, Doug (Peg) The Weitz Company
Andrea, mother of Abby, Jacob, and Jenna
Leigh, mother of Grace and Jack
Kristi, mother of Micah and Ellie
1407 McKinley Drive 5901 Thornton, Ave.
Ames, IA 50010 Des Moines, IA 50321
powell3684@gmail.com doug.powell@weitz.com

Currently working part time at The Weitz Company as a VDC modeler on various Iowa-based projects. Building virtually is a good way for the company to

get a return on my experience (ROX) ... and to keep me out of trouble. Peg retired from the Ames Community School District at the end of the 2010-2011 academic year.

BS 1972

Dvorak, David (Jan)
Brett Cedar Rapids Comm. School Distr.
Andrea 319-558-1093
Donnie ddvorak@cr.k12.ia.us

Dave has been the Manager of Buildings and Grounds for the Cedar Rapids Community School District since 1984. In this one position he has experienced a large variety of projects from flood recovery for multiple building sights which included designing and building a 44 million dollar school district administration and support building to creating and designing the department's web site. Probably his most difficult projects were the replacement of HVAC systems in high, middle, and elementary schools while the schools were in operation. He is quoted as saying "It is a heck of a lot easier to build a building than it is to remodel it."

His next career will start in 2012 when he retires and gets to travel, ride his bicycle, and play with his grandkids.

We enjoyed catching up with a few classmates at the Construction Engineering 50th anniversary event last fall. I am blessed to have a job with a great company as we all go through this challenging economy. Laurie and I are empty nesting and find a great job spending time with family and friends, in church activities, gardening, and doing some traveling. We are looking forward to celebrating Chris and Ellen's wedding this summer in San Diego.

White, Larry (Deb) Grand Projects, Inc.
PO Box 29
Northfield, MN 55057
507-744-4582
lwhite@grandprojectsinc.com

The “recovery” for commercial real estate and construction cannot come quickly enough. Projects in the private sector remain elusive for smaller commercial design/build firms such as ours. On a brighter note we have more prospects this year than we have seen since 2007. My heart says it is not time for retirement and my nest egg is in full agreement!

Deb works with “seniors” at the local senior center pool helping them with water exercise, therapy, post-surgical recovery and even teaching a forward thinking 96-year-old how to swim!

Oldest son Brad and wife Angie in the Madison, WI area have blessed us with two grandsons, ages 1 and 4, who are a delight. Brett (still looking for Ms. Right) is enjoying increased responsibilities with an international drilling firm making frequent trips to corporate offices in Utah, traveling to mining sites throughout the US and even to China for global sales training. By year end he is also scheduled to visit Chile, Mexico, and Australia.

Let’s hope the construction market has turned the corner and is heading toward better times ahead.

Marion, IA 52302
cuzhome@hotmail.com

Due to the economic situation, I was laid off from the Weitz Company in December 2009 and landed a job with Frew Nations Group in July 2010 starting to work on the new Cedar Rapids Convention Complex. Currently serving in the role as Senior Project Manager for the Convention Complex and Convention Complex Hotel. These are City of Cedar Rapids projects of which the hotel was added to the mix when the hotel was purchased by the city. The green light to proceed on the hotel renovation design was given April 12, 2011. The entire project revolves around renovating the existing U.S. Cellular Center arena and hotel, both originally built in the late 1970’s, and the addition of an approx.. 129,000 square foot convention center adjacent to the arena. Total project to be completed March 2013.

Very busy working with the design team to complete the design for each portion of the Convention Complex and to get bid packages out. Site demolition, hazardous material abatement, and primary structural steel have been awarded on the Convention Complex with other prime bid packages to be out for bids July 2011. In addition, working with the design team to also complete the hotel design and issue multiple bid packages now that a hotel franchise flag has been selected by the city.

Gilbert, AZ 85234 480-293-3323
480-497-2110 trleinen@sundt.com
trleinen@cox.net

After 26 years T. R. Leinen, LLC closed up shop and I took a full time position with Sundt Construction two years ago. After the economy tanked, the consulting business became especially lean, particularly if I wanted to remain in the Phoenix area. It was a bit of a shock at first but I am adjusted by now and having fun participating in some complex projects. Sundt hired me to teach

scheduling but they realize I need to be involved in doing as well as teaching.

Miller, Albert (Lois) Lewis Contractors

I was on campus last fall for a football game, so took a tour through Town Engineering Hall. I can honestly say I hadn't been inside for almost 25 years, and I think some of the ceiling tile is still the same. I can also say while I remember a good bit of it, some other parts looked a little foreign, like the classrooms. Can't remember as much technology being there back in the early 70's, and someone changed the blackboards out to white! It was fun being back, and brought back a lot of memories for all the hours we spent in there.

As always, if anyone is coming through Dallas and wants to stop for a cold beer, just let me know. I remember that part of college.

Richards, Scott (Susan) Lyles Services Co.
Garth 1250 W. Olive Ave.
Debra Fresno, CA 93728
Deanna 559-441-1900
srichards@lylessc.com

I am approaching a semi-retirement mode by currently working 3 days per week from the Fresno office. I will go to 2 days a week (every other week at the Fresno office) beginning October 1 with the other two days per week working from a home office in San Juan Bautista. I have been with the Lyles Construction Group of companies since graduation from ISU in 1975. The majority of my career (33 years) was with Kaweah Construction Co. as project engineer, project manager, division manager, operations manager, and president. The last 3 years I have been with the parent company, Lyles Services Co., in a Chief-of-Staff position. I am looking forward to full retirement in a couple more years, but am enjoying remaining active with the company on a part-time basis now.

Our family members have all had transitions into new phases of our lives. After 30 years as a CPA, Paula went back to graduate school and earned a Master's Degree in Education in Counseling from

Drake University. She now has her own practice as a Licensed Mental Health Counselor in Adel, Iowa. Clint is now a second year Fellow in Pediatric Oncology at Vanderbilt Medical Center in Nashville, Tennessee doing research on the reparative processes of DNA. Clay graduated from Harvard University's Graduate School of Design with a Masters of Architecture Degree and works for Toshiko Mori Associates, an architectural firm in New York City. I made a career change in January taking an appointment from Governor Branstad as the Director of the Department of Administrative Services for the State of Iowa. After spending 35 years in the commercial and industrial construction industry, the change to administrative services in government has been one of the most challenging and interesting things I have ever done. My education in engineering from Iowa State has always served me well and continues to do so in this new, interesting, and challenging phase of my life.

I have also been afforded the opportunity to serve on the College of Engineering's Industrial Advisory Council. I am very honored and pleased to have the opportunity to contribute back to the engineering program. It is always good to hear from friends.

Like most in Construction, still working through the ups (few) and downs of the economy. We have a number of projects in the planning stages, and some

even further into the design process, but they have been in that condition for several years. Since most of our projects are related to professional sport, it often takes a bit of ego to get these out of design and into fruition.

Vice President and Partner with Hammes Company – I continue to work exclusively in healthcare developing inpatient and outpatient facilities for a variety of clients across the US. I work mostly in facility delivery – that is assisting hospital owners in the complete development (design, construction and occupancy) of inpatient and outpatient healthcare facilities.

I have been riding RAGBRAI for the past 15 years to keep in touch with my Iowa roots. I really enjoy interaction with the hardworking, honest and well-grounded people of Iowa!

Corinne has semi-retired and is enjoying our grand-boys – Hunter (6) and Cody (terrible 2). My oldest son, Rich Jr. graduated from Florida, works with Progress Energy and lives in nearby Deltona, FL. My youngest son, Nick, graduated from Univ. of Central Florida in civil engineering with an emphasis on building construction and lives in nearby Sanford, FL. They were both born in Ames while we were attending Iowa State. We are indeed fortunate to be close to our sons and grandsons!

I look forward to catching up via the Erector Set on all my classmates from 1978. Please keep up the good work.

My ninth year as a ConE faculty member was the best year. Our students are great to work with and I find them some of the brightest young professionals that are entering into our industry. I will again be teaching three courses per semester and advising the AGC Student Chapter, advising the NAHB Student Chapter and acting as the coach for our four ASC Student Competition teams. I finally completed my Master's Degree in Construction Engineering and Management during the summer of 2010. The five plus year journey is finally completed. I have completed six years as the ConE curriculum committee chair and am looking forward to again making improvements to our degree program.

Our son Lucas and his wife Dette in Denver has our first grandson that is now almost three years old. Talking to him using Skype is a very funny experience. Our youngest son Doug and his wife Molly are expecting their first child in early June this year. Mary Beth and I are enjoying our first grandchild and we are looking forward to the second who lives just west of Des Moines. If any of you travel to Ames for personal or recruiting reasons, stop by and say "Hi".

chris_dummermuth@merck.com

I am now working on a Pharmaceutical Project in Hangzhou, China. I am now an Associate Director for projects in the Asia/Pacific region for Merck & Co. It has been a rewarding experience doing construction in China. The buildings we are working on are all cast in place concrete, so a lot of formwork and shoring. Most of the buildings in China are concrete structures since labor costs are low, and the cost of concrete is cheap. Structural steel buildings have high material costs, which is why they are not used as much. The technical side of Clean Rooms construction for sterile products is continuing to evolve too. It is interesting to be a part of the business that has continuous improvement as part of its vision.

Along with the work experiences, I have also enjoyed learning the Chinese culture and working with the people. Do not let people tell you different, the food in China is fantastic!

Currently in my 4th year of being self-employed and things are going great. Working on a gas turbine facility manufacturing relocation from Hamilton, Ontario to Charlotte, NC and on a computer data

center in Denver, CO. However, these projects end in March & November respectively...need to get more in the pipeline.

My son, Brian, graduated from NC State University on May 14th with degrees in Physics & Aerospace Engineering. He started working for B/A Aerospace on June 20th and gets married to his high school sweetheart on July 16th. Nothing like getting them all taken care of at once.

My daughter will be a Junior at NC State this fall, majoring in Animal Science with minors in Zoology and Genetics. Of course...she wants to go to Vet School.

My wife and I recently celebrated our 25th wedding anniversary.

847-741-2505 947-214-7364
pdawson@elgin.edu pdawson@elgin.edu

Paul is in his 17th year at the college. He is the managing director of construction projects. It has been a very eventful year. The first project of our \$178 million referendum finished a month ahead of schedule. The \$18.6 million Multi-Purpose Classroom Building was started in January and was completed in November 2010. It was over 20% under budget. We have three more major projects going on concurrently. The \$55 million Health and Life Sciences Building, the \$26 million Library, and finally a \$24 million renovation of our largest building on campus – Student Resource Center. The Library and Health Building were several million dollars underbudget and are currently slated to complete in time for Spring 2012 classes, six months early! The college will have nearly \$15 million worth of renovations starting soon and a \$15 million Public Safety and Sustainability Center starting next year.

Still practicing construction law in Columbus, Ohio where I have been now since 1982. My practice is more of a national practice representing some of the largest design and construction firms in the country on various litigation and transactional matters. I am finding myself becoming less of an advocate and working more on resolving matters as a mediator or as an arbitrator. It is amazing what a little gray hair does for people's perception of your level of expertise! I still look back at my years at ISU as being very valuable in terms of what I do as a lawyer. We were well prepared for the industry.

On an aside, I am taking a golf trip with nineteen of my closest golfing buddies to Ireland in July. Can't wait and hope my game is up for it.

It was nice getting back to ISU last September for the ConE 50th. It was great seeing Tom Jellinger and many others. It is clear ConE is continuing to excel.

I just completed my second year in Lesotho Africa overseeing the dam component of the Metolong Dam Water Supply Programme. The Advance Infrastructure construction is nearly complete, the Water Treatment Plant construction recently started and we hope to have the Dam construction contract awarded in July. The Roller Compacted Concrete placements for the 83 m tall RCC dam should begin in about a year (Jun – Jul 2012) and we hope to start impounding the reservoir late 2012 – an aggressive schedule.

There is a huge need for water projects in Africa. There are many water projects under construction and even more planned. I expect I may do more work in Africa after my current assignment.

I am the Utility Division Manager at Mario Sinacola & Sons Excavating, Inc. We do Heavy/Highway, Public, Private and Commercial projects. We're managing to stay busy and thankful we're in one of the best economic climates in the country. Sinacola

keeps getting more Iowa Staters to come to Texas to join us, and once again this summer have a Cyclone Intern working with us.

Emily graduated from ISU in Architecture last May and is pursuing a career here in the Dallas area.

Phillips, Bradley (Jean)
Jessica Beck International de Mexico
3180 Mathieson Dr NE Vasco de Quiroga 3900,
Unit 1106 Suite 501-A
Atlanta, GA 30305 Colonia Lomas de Santa Fe
404-702-0342 Mexico DF, 05300
bradphillips@beckgroup.com 404-702-0342

Jean and I will be relocating to Mexico City, Mexico as I will be assuming the role of President and CEO of our Beck International de Mexico operations. This is a big challenge and opportunity for Jean and me. First let me assure you that it is safe. Beck has been operating in Mexico for 15 years without incident. Most of the violence you are hearing about is in the border towns. That is not to say that Mexico City does not have it's troubles like Atlanta does. Anyway, that has been the reaction from family and friends and I wanted to reassure you that we will be fine.

I will be relocating immediately and Jean will be joining me once she works out her employment situation. We are excited at the opportunity to live in Mexico City and our offices are located in Santa Fe just west of what is downtown Mexico City or District Federal. This area is very much like the Buckhead area that we live in now. Another comment has been, well, you will be hot. Mexico City is in a mountain range and is at 7,500 ft elevation making it cool. The summer highs are 72-79, much less than Atlanta.

Yo no hablo español pero estoy aprendiendo. I do not speak Spanish but I am learning. Same with Jean, however all our employees are bilingual and most business is conducted in English. Jeannie has actually lived in multiple foreign countries and is looking forward to it and the close proximity to some other cool destinations.

Please keep Jeannie and I in your thoughts and prayers as we embark on this international journey.

Wallace, Craig (Jackie) Cherne Contracting Corp.
Jim (28) PO Box 975
Ben (26) Minneapolis, MN 55440
195 First Street 606-584-3221
Lake View, IA 51450 craig.wallace@cherne.com
craig.wallace@cherne.com

Craig has been with Cherne for 29 years this summer. It is still fun and interesting to build in the industrial market. Cherne continues to work as a general contractor on power and refinery projects self-performing 90% of the work with our own direct hire labor forces. The contracting method has turned from reimbursable to lump sum very quickly in this tougher economy. Despite the current conditions the new project outlook for us is quite good right now. Cherne went through a change of ownership last year as we sold the company to Kiewit Corporation and are now a stand-alone district of Kiewit. We will still operate as Cherne pretty much pursuing the same markets but now we will also do internal joint ventures with other Kiewit districts.

Jackie and I celebrated our 30th wedding anniversary in March. WOW! As always she manages and runs everything. Both the boys have been through ISU and Ben went on to NC State for his masters. Now they have both returned to Lake View where Jim works for a swine management company looking for farmers to raise antibiotic free pork. Ben is the NW Iowa fisheries biologist for the Department of Natural Resources. We are pretty lucky to have both boys living and working near home. We still have chocolate labs and we all love to hunt ducks and pheasants. Planning on our annual salmon fishing trip to Lake Michigan in July. Life and work is good but I am looking forward to more hunting and fishing and less building.

It has been almost 5 years since making the move to Ohio to join Tri-C Construction. As we all know, it has been an interesting 5 years in our industry and we continue to look at better ways to serve existing clients as well as introduce ourselves to new opportunities.

Sue's private practice as a dietitian consultant has done well. Daughter (Christine) follows her mother's passion in the industry in Philly. Son Dan is in his 2nd half of a 27 month commitment in the Peace Corp in El Salvador. Mike just graduated from ISU in Business and is in Chicago to make his mark. (All five of us are now proud Cyclone Alums).

If your travels ever bring you to the NE Ohio area, drop me a note.

susanhyler@charter.net

We are still hanging out in Asheville and loving living here. I think what we enjoy most is being able to walk to the downtown, have dinner and go to the theater. After years of traffic, we love being able to get to most places within 10-15 minutes. It also helps that Asheville is a tourist destination, so the restaurant and entertainment choices are good.

We are still plugging along with our company. We are starting to see some signs of life in the mountain construction industry. Hoping for a better year for our business. If any of you should need scheduling assistance, please give me a call.

Our daughter, Georgia, turned 18 this year. I don't know – it kind of made me feel a wee bit older or at least a thought that we have been at this parenting gig for a while.

lhurley8100@comcast.net

President and CEO of Webber LLC the largest transportation contractor in Texas. We are busy in spite of the down economy; diversifying into other markets such as ports and marine and aviation along with CM @ Risk, Design-Build and PPP's. It's interesting that in such a down market its times like

these that force you to go back to the basics, re-look at how things are done and why and at times re-invent your firm in terms of new strategic planning, etc. You tend to ask yourself why did we do things that way in the first place, just wished I had more time to get things done. We have an outstanding group of young engineers and about 1600 craft within the state. If you ever get to Houston way, give me a call. It's always exciting when I run into ex-ConE's, there are a lot of us out here!

Was great seeing everybody at the ConE 50th Anniversary celebration in September!

It has been another busy year at Iowa State. Completed work on the Biorenewables Research Laboratory Building and Hach Hall Chemistry Building this year along with many more remodeling projects, including the Jellinger Lab in the Town Engineering Building. We are currently

working to complete the College of Veterinary Medicine - Small Animal Hospital Renovation and Addition for opening this summer and the West Campus Recreation Facility for opening this fall. Work is scheduled to begin on a new auditorium building, Troxel Hall, and the Football Training Facility this fall. Reconstruction and recovery efforts from the flooding in August 2010 were a major effort for us this past year as well. It is great to see the participation by so many ConE's in our projects as gc's, sgubs, professional consultants, etc. Thanks for being a part of our successes!

The New Mexico economy still continues to crawl out of economic hole the whole country is in. Our workload improved last year and should improve

again this year, but it is hard to see what the future holds. Has it really been 30 years since we graduated from ISU? On the home front, one boy has graduated from college and we are one year from being empty nesters. Deb continues to make me jealous with her retirement adventures.

I completed another 6 month tour in Afghanistan from May through November of 2010. I continued the work that I had previously done with contract management based out of Kabul. We were working with many Afghan companies that were building police facilities, army training facilities, hospitals, and schools. I am now getting ready to be deployed to North Dakota for floor duty which will involve building up and repairing levees along the Missouri River and its tributaries.

Kevin just finished his first year of law school at Drake University and is currently in Nantes, France for a 5 week course of study on International Law. (Kevin is able to spend a little time traveling in Europe while he is there.) In August, he will marry Kristin, a lovely young lady from Palmer, Alaska. They met in St. Louis while Kevin was working for

the National Beta Sigma Psi office and Kristin was waiting to receive a heart transplant. (She received her transplant on Kevin's 26th birthday!)

Debbie is enjoying a quasi-retirement from teaching, caring for her 93 yr. old father who lives with us. She also fills in as the substitute office manager at our church whenever the need arises.

Last year we started the transition of ownership, I am currently a Vice President and one of 4 owners. Work has become better balanced with family as we move into the next chapter of life, that being grandparents. We have kids and grandkids on both coasts and a daughter in Colorado so domestic travel has become regular and we wouldn't have it any other way.

Parsons, Mike (VaLinda) Iowa State University
Meredith (21) Facilities Planning and Mgmt.
530 River Oak Dr. 200 General Services Bldg.
Ames, IA 50010 Ames, IA 50011
mparsons@iastate.edu

Mike is enjoying another year with the Facilities group at ISU. Moving back to old stomping grounds of Central Iowa was a good decision 12 years ago. The slogan "Iowa, a place to grow (old)" seems to fit. Projects have even included installing a fire sprinkler system in the Helser residence hall. Talk about Déjà vu.

Daughter Meredith graduated from the University of Iowa and has sights on a career of some sort in medicine.

Thoroughly enjoyed a trip with VaLinda to Costa Rica. Would recommend that adventure to all. Zip lining in the jungle tree tops is a thrill. Thanks to the Bosshart brothers at the 50th ConE Banquet for tips on what to do (and not do) while in Central America.

Have enjoyed reconnecting with ConE friends Todd (Sue) Mattison and Kevin Osgerby recently.

Now that we have the 'Empty Nest', we decided to
build a new house. Forgot to tell the kids we
moved, ha ha. Moving, packing, unpacking, etc. is a
real pain. Still working to get things organized,
stuff planted, and work for a living.

Work has been steady in the Design/Construct
sector. Always busy either doing work or trying to
get work – no rest, no matter what.

If you're in the Quad Cities or passing through,
swing past and say 'Hi'.

In the Summer of 2009 I left my 25 year career and
I have started a residential development and
construction business in Des Moines; developing
and building for my own account and general
contracting for other residential customers. While I
have gotten some crazy looks from people when I
tell them what I am doing in one of the worst
residential markets on record, I have been fortunate
to be able to take advantage of some opportunities in
the Des Moines metro marketplace and grow my
company slowly and position the company to
ultimately grow market-share as the residential
market rebounds. I have sold out of inventory in the
first building I developed and built and am currently
beginning my second building, an 8-plex. As a
company of 1, the hours can be long but have so far
been a lot of fun. There is always something to do
and the home office is always calling for you. There
is an abundance of new things to learn, and you

don't have the luxury of a staff or a whole department to take care of things for you (not all bad if you have ever managed a large staff). However, I am no longer traveling and really don't miss it; I have a very flexible schedule to be home with my family and attend kid's activities; I learn something new every day whether it is solving something in Quickbooks or building a relationship with a new trim carpenter; and I am extremely close to the building process again. Life is Good!

jonamy@kmtel.com

Our family is still in Minnesota and I'm still working for Harris Companies (20 years). Unfortunately, the MN construction market has been extremely depressed, as some of you know, so I have spent the last year overseeing a 52 story high-rise office building in Oklahoma City for our company, Superior Air Handling, out of Utah. Traveling brought back old memories, not always good ones for Amy who stayed home in MN. But I am now looking forward to some time in MN and hopefully picking up some much needed work.

We just married off our daughter Anna to a great guy Nate Miller so we now have another son. Anna will be student teaching this fall in Houghton, MI where her husband will be completing his masters in electrical engineering at Michigan Tech, and then she will receive her elementary education degree from Northern Michigan University in December (sorry ISU). We hope our middle son James will be attending college this fall working towards some type of degree in order to go into youth ministry. Our youngest son Jacob will be a senior in high school this fall. Our house is always open if you are in the Rochester, MN area.

816-781-4038 816-600-3671
hkoenigs09@gmail.com harry.koenigs@kiewit.com

Emily and Robin stay very active all year long with softball. Em will be a junior in high school this year and when she is not playing for the high school, her little league team is playing tournaments somewhere. Their first tournament this year was in February, at the Chiefs indoor practice facility. Robin is team mother and provides a great deal of emotional support to the team.

For five years now Robin and I have been sponsoring golf outings/fund raisers in support of Curesearch, a pediatric cancer research program. Our outings began in New Jersey during our Kiewit Eastern District golf outing but have expanded to Chicago and recently, Kansas City. They are all a great time and good excuse to take a Saturday off work. We call the events Jakefest, in memory of our son who was afflicted with rhabdomyosarcoma, a relatively rare cancer that mostly affects children. Since his passing in 2006, vendors and Kiewit employees have contributed well over \$500,000 to fund research for rabdo. Each year is bigger than the last we feel very fortunate for the support.

We moved back to the Midwest in August of 09 to work on a design/build bridge project for the Missouri DOT. The project calls for the complete replacement of 554 rural bridges across the state. It's a one of a kind project and so far has been very challenging but a lot of fun. If things go as planned, there will be about 100 left for 2012.

bcain@burnsmcd.com

For those who may remember me, Sonja and I are still in Overland Park, Kansas. With our three girls, Allyce-14, Agatha-13, Andia-11, we are happy to be here after several opportunities for me on construction sites around the country. I have spent some time in San Antonio, Texas, Milford, Connecticut, Ponca City, Oklahoma, Borger, Texas, Somerset, Kentucky, and Mosel, Mississippi. If you don't recognize the name of most of those towns, it is most likely because there is an electrical power plant or an oil refinery located somewhere very close! My career growth has been fueled by both industries.

The company I now work for, Burns & McDonnell is comparable to none! It is a dream job to work as a "true" employee owner. We have a great group of people in our Construction Design Build (CDB) group, and I feel right at home here taking on the fantastic opportunities provided. Now that I have a

bit of grey hair, (you really can't see it because I still keep the military style haircut), I get to spend much of my time mentoring the new guys on the block. It is awesome fun to take on some of the new company expansion opportunities and at the same time, use it as a training ground for the new talent. And I do mean talent! I continue to be amazed by the new tool-boxes brought to work by our latest hires from the engineering and construction programs around the Midwest. And I look forward to a future that is very bright for both of my families – Sonja and the girls, and my Burns and Mac family.

phil.stearney@rbic.com

On the professional front – I have now been with Ragnar Benson for 11 years and have truly enjoyed my time to date here. All is well except for the economy which is certainly a game changer for many firms and their people. Interestingly enough, today's economy seems similar to what was in front of us in the late 1980's and early 1990's. We are all looking at the 'new economy' which is simply a similar economy from 20 years ago or so...just another cycle. I am sympathetic to the great graduates out of Iowa State (and many other universities) in these difficult economic times, but stay optimistic...we will get through this and the job market and the profitability of companies will rebound soon – it may just take another year or two...

On the personal front, Karen and I have four kids, now 9 years old to 17 years old. All is well for us all and thankfully the economy has not affected us much except for the gas prices in Chicago. As much as I would have never seen this coming when I graduated, I can't think of a more enjoyable part of my life than my family and can't imagine it any other way.

Thankfully, my oldest daughter (Elaine) is seriously considering Iowa State as an option for her college

experience. My second daughter (Emily) was also very 'taken' by our campus tour a few weeks ago. Similar to Karen and I, they both fell in love with the campus and I hope they all end up going to ISU for their education and especially their 'experience'...I hope all four of them go to Iowa State – In a sneaky way, we chose a very sunny and warm day to visit Iowa State, and we chose NOT to bring them both there in February.

We also chose a very rainy & dreary day to visit University of Iowa...

Do keep in touch – Professionally I am on LinkedIn. Personally I am on Facebook – but never really check it...So email is, by far, the best way to keep in touch.

Take care and I hope all is well (and stays well) with you and your families.

This past year was a transition year for the Francois family as our oldest started college at the University of Kentucky. She had a great experience there and is studying Elementary Education (following her mother's footsteps); her year was topped off with a trip to the Final Four in April to root for the Wildcats. I told her how lucky she was to experience that in her first year of college! Our second one, Alex, will be a senior in high school and has his college choices narrowed down to Iowa State, Purdue and University of Cincinnati. He wants to study Civil or Construction Engineering, so Dad is trying to remain impartial on his decision, but it is difficult. Our third, Emma, just finished her freshman year in high school, and Will, our baby, will be in 7th grade next year. We are thankful for our good health and terrific friends and family that we see as often as we can. Teresa and I thoroughly enjoyed getting to reconnect with several ConE alums at the 50th anniversary celebration last fall – it was a great event! Hope everyone is doing well. If

you are ever in the area, please stop in. Go Cyclones!

With big construction slow, I started up my own contracting business called Black Diamond Services focusing on servicing my former clients with property management, maintenance, remodel, and special services as they ask. Word of mouth kept me fairly busy with no advertising, just referrals and repeat business. I found a unique opening at Lone Star Security this winter to be a site security and emergency response officer at a large mine that was doing \$700 million in construction of infrastructure and new mill facilities – I have quickly worked this part time job into a full time supervisory career venture. I am also representing my employer as I travel in July 2011 to Honduras to help build a school with Schools for the Children of the World. Wow how life throws curves – or am I the one throwing them! Would love to hear from any of my classmates or take visitors if you are in the mountains of Colorado.

I have lived in the Denver Metro area for over 10 years now. I work under a Contract “Quality Management Consultant” for the Regional Transportation District (RTD) in Denver, Colorado. The RTD is building out a Transit program in and around Denver with 120 miles Light Rail/Commuter Rail and 18 miles Bus Rapid Transit. The Program FasTracks, consists of 10 individual projects all uniquely funded and contracted. Our group works with the Program and Project Managers to define work processes from planning through construction.

Mike is the President of Nelson Construction Services and Nelson Development located in West Des Moines, Iowa. He has developed a diverse portfolio of properties over the last 11 years in business. Properties have ranged from high rise, mixed-use building to a manufacturing facility. Most recently he has developed historic renovations on two distinctive downtown Des Moines buildings. One is home to the first Hyatt Place Hotel in the state of Iowa.

His dedication to overseeing the entire development and construction process has proven to be an efficient way to create quality and timely projects.

Mike lives in West Des Moines with his wife Jill and their three children, Benjamin, Emily and

Megan. They are a very active family who enjoy a full range of indoor and outdoor activities.

I'm about half-way through the Ph.D. program working under Dr. Edward Jaselskis. I'm working on a Construction Industry Institute funded research project regarding spending optimization on indirect construction costs. My primary research interest relates to lean construction, so I'm working on the application of lean construction ideas to indirect construction costs. In addition to research, I am teaching engineering economics and engineering law. I have really enjoyed my time in the classroom with our ConE students.

Elizabeth, Lillian and Madeline enjoy living in Ames. Elizabeth is working as an urgent care physician's assistant for Iowa Health in Des Moines. Lillian and Madeline will be in 4th and 3rd grade at Fellow Elementary.

One of the greatest benefits of my work is getting to interact with many ISU ConE alumni. Thank you for those who have helped me by participating in classes or providing input for research.

I will be serving on the ISU Alumni Association Board of Directors for 5 years, starting August 2011. Please contact me if I can help you in this role.

My best to all of you!

I am still President of Engineering & Construction Innovations, Inc. (ECI) which Robb Johnson (CE '95) and I started in 1999. ECI has sustained growth through this difficult market focusing primarily on infrastructure rehabilitation projects primarily in the areas of tunnel and shaft repair, dam repair, storm-water and sanitary system repair, and geotechnical projects. In September of 2010 ECI merged with ASI Constructors, Inc. of Pueblo, Colorado. ASI specializes in Roller Compacted Concrete dam construction as well as large dam rehabilitation projects. ASI and ECI complement each other in many ways and I look forward to further growth and opportunity with our partners at ASI.

I hope all is well with the ISU ConE community. If you are ever in St. Paul, please stop by.

This last year has been quite challenging for my family and me. In last August of 2010 I fell over a retaining wall at my home. I suffered a T12 burst fracture in my spine and bruising of my spinal cord. At the time of this writing, I cannot move or feel anything below mid-thigh. The prognosis is to remain paralyzed. I returned to a modified work schedule about March of this year. Thank you to all who wrote or called with well wishes.

Since my last write-up I have changed career paths a bit from working for a consultant to becoming a county engineer for both Mitchell and Worth counties in north central Iowa. In addition to that, my wife and I have somehow managed to add another mouth to feed. Jenni continues to teach high school math at St. Ansgar High School and the kids do not seem to quit growing.

The career change is teaching me a few things so far. One thing I am learning is that I traded one set of headaches for another, instead of having one or two bosses, I have a couple thousand bosses (well really six, three supervisors per county). While working for the public it would be nice to please everyone, I have learned I can't...and some are not afraid to let me know.

May marked our 6th year in the Des Moines area, and the boys are very busy with soccer and baseball. We can't believe our youngest will be in kindergarten this year! Andrea is very active in the PTO and stays busy with all of the extracurricular activities. Our fall is also busy with ISU football games.

This year marks my 15th with JE Dunn. I am currently staying busy with healthcare projects in Iowa City and Ames. It is good to get back to Ames

on a regular basis. Brings back all of the great memories of our time at ISU. Go Cyclones!

Still teaching Construction Management at the U of M... Debuted first fully online class this spring – my doubts dissolved as my students succeeded! The class went so well I've already started work to launch a second online course.

Consulting work is VERY slow (okay; almost non-existent...). Construction should wrap up this summer on my first residential design. It's a walk-out overlooking Lake Pepin on the Mississippi River. The owner is EXTREMELY involved in the project and has provided an abundance of project and management examples (of how not to do things) for my classes.

Wyatt and I moved to Prescott, Wisconsin almost 2 years ago. The pull of the river was too strong to resist. This winter we bought a Rinker 236 sport and launched it in early April. Yes, it was a little early in the season; we actually got snowed on one day – but we couldn't wait! I learned to back up a trailer and now can put it right under the boat for easy loading. If you are in the area – wave us over and we'll take you out for a ride. You can't miss us...the boat is yellow and white and has a 454 Chevy engine; full throttle produces 60 mph and noise for miles!

Wyatt completed Kindergarten this year. He's enjoying a summer of baseball, boating, camping, fishing, and Cub Scout outings. (Me, too!) The pack asked me to be their treasurer next year. I don't mind that work is slow – there's lots of volunteering to do!

BS 1997

Chipman, Tim (Kelley) Constructivity
Cody (11) 3934 Mathews Rd.
Ames, IA 50014

I think this is my first Erector Set write-up since graduating, so here goes... After college, I worked for industrial automation software companies in Chicago and Boston, then moved back to Ames in 1998 to start Premise Systems with a few other ISU alumni, specializing in building automation systems. We grew to about 20 people, then merged with Lantronix out of Irvine, CA. I moved to Irvine around 2002, then our division was bought by Motorola in 2005 and I moved to Seattle. I left Motorola in 2008 and worked at Microsoft for a few years.

In the last year, I returned to Ames and started a construction software company, Constructivity, where I'm now leveraging everything I learned in ConE, from structural, mechanical, electrical, scheduling, estimating... glad I saved some of those books! We introduced several Windows desktop applications earlier this year and are now just releasing the first mobile Android application that can view and edit IFC-based building information models. Our main customers are government agencies, though we're starting to get interest from smaller contractors. I also spend time as the deputy director of the group that publishes the IFC standard at BuildingSmart International.

I now live in the Squaw Valley area in north Ames with my wife Kelley and son Cody who is 11. If anyone is in town, it would be great to reconnect!

jclay@auigc.com jclay@auigc.com

For the past 5 years, I have been a Commercial Project Manager for AUI Contractors, building everything from a TXDOT Tourist and Visitor Center to a Municipal Airport to office buildings and am now working on projects for the Dallas Federal Reserve Bank. Ricky and I will be married 5 years in September and have a 4 year old son who keeps us very busy, but I love being a mom! I am also active in NAWIC (National Association of Women in Construction) and have been elected to serve as the Fort Worth Chapter #1 Vice President

this next year. Life in Texas is hot and busy, but we try to get back to Iowa at least once a year to see my family. My husband has returned to college to pursue a degree in history/earth sciences and plans to teach when he is done with school. Our son attends a private daycare with an amazing staff who are more like family. I can't believe he will be entering Pre-K this fall! Where has the time gone? In the little spare time I have, I like to read, garden, and, of course, play with our son.

Hello again, I am still with PCI in Reinbeck. Work is going good and Cork always seems to keep us busy. We continue to pursue all types of work, but the last couple of years my workload has changed somewhat from mainly private type owners to more municipal type contracts.

Home life is good too. Holly continues to teach the 3rd grade in Reinbeck and keeps our kids under control and heading in the right direction; they are already involved in all kinds of activities. Emma is 7 going on 17 except she still doesn't like boys. I am glad about the no boys thing. She is more worried about outfits and nails and stuff like that. Cole is all boy at 4 and keeps his mother on her toes. He is my little helper on the farm and already wants to ride a mule by himself just like Dad. He doesn't like being led around, he wants to run the reigns. He loves riding in the tractor with me as well, and the other night he tried to show Emma how to start the 4 wheeler without an adult around. I guess I will have to start removing keys from equipment.

I hope all is well with you and yours and look forward to reading updates.

After spending 4 years as an Engineer with Hensel Phelps Construction Co. in Austin, TX and 5 years as an Estimator with Story Construction Co. in Ames, IA, I have made the move to being a sub/supplier instead of a general contractor. I am currently the Commercial Estimator at Moehl Millwork, Inc. in Ankeny, IA. It has been nice to gain more specialized knowledge of building components. The people and the environment here at Moehl are very open and friendly which makes it a great place to work.

My husband and I are kept busy by our two daughters when we aren't at work. There isn't an activity or class that they don't want to join. We all enjoy sports, camping and anything else that involves being outdoors.

Like a number of my fellow ISU grads, I found 2009 to be a turbulent year in the construction business, and left Cahill Contractors in SF after 8 years. In early 2010 I lucked into a job as a PM in the Facilities department of Lawrence Berkeley National Laboratory in Berkeley, CA. My first project was managing a \$35M lab and office building. I am now managing various construction projects around the Lab, as we have 90 buildings and always new science programs with new requirements – clean rooms, chem labs, laser facilities, industrial scale cooling plants. It's technical work and always unique projects, and I feel fortunate to have had my earlier bad luck and later great luck. The Lab is embarking on a project to build a second full campus, so that will keep us busy building and renovating for many years to come.

Mary and I live in Benicia, CA, a lovely little town on the San Francisco Bay.

I'm a PM at the Minnesota Zoo... and I think I have quite possibly one of the coolest jobs ever. We are

finishing up the new penguin exhibit – it's pretty awesome looking. And I am designing and building a black bear exhibit now.

The fun part? When you're having "one of those days" you can go for a stroll, watch the people and check out the animals. They are both entertaining and educational.

Have been working at Greiner Construction for almost 3 years in Minneapolis and have enjoyed the change. Continue to grow and pursue new product types in the market. Most recently we have had continued success in the multi-family/senior living market as that continues to rebound.

I have had the opportunity to work with other ISU alumni and be involved with the student organizations through my professional organizations and am proud of the level of education and quality of students that the ConE program is producing.

Amber and I are expecting our first child in September and look forward to that next chapter in our life. We already have ISU bibs, outfits and blankets waiting for the baby!

I have been with Russell Construction five years this summer and recently completed the YMCA Supportive Housing project in Des Moines (140-unit housing unit on the south edge of downtown Des Moines). I have been a Project Manager for a couple years now and have worked in design/build, CMc, and hard bid contract formats.

Jen and I bought a home in Long Grove after relocating from Des Moines in Fall 2009. We've been able to get involved in the local community and I was recently appointed to the City of Long Grove Planning and Zoning Commission. I've also had the opportunity to serve on the Construction Engineering Industry Advisory Council since the Spring of 2010; it was great to be a part of the 50th celebration.

My wife Karissa and I finally tied the knot last November after meeting six years ago at Iowa State. Currently working as Project Manager for Adjustable Forms Inc. Things have been pretty challenging over the past year, but starting to slowly turn around. We're fortunate enough to be working on a 34 story retirement project on the north side of Chicago called Admiral at the Lake, as well as a 16 story Ronald McDonald House Charities. A few large apartment projects look pretty promising out ahead, as well as some higher education work. Currently working on transitioning our current preconstruction/project management/detailing into full BIM environment. I plan on taking the PE exam sometime in the spring of 2012.

After working in construction management in Austin, TX for the 18 months succeeding graduation from the ConE program, I took a leap of faith and made the move to self-employment in residential real estate sales. My main focus is in luxury and waterfront properties in the Austin area. I feel my degree in construction engineering and my short experience in commercial construction have thus far been very beneficial to my real estate career, both with credibility as well as helping clients through a "different" point of view. All is well in Austin and I think everyone should move here!

Bell, Nicole (Bryan Schmidt) Turner Constr. Co.
9736 Larsen Street 2345 Grand Blvd., Suite 1000
Overland Park, KS 66214 Kansas City, MO 64108
816-256-6199 816-886-4542
nicole.m.bell@gmail.com nbell@tcco.com

I am currently a Project Engineer working in the Special Projects Division for Turner Construction. I serve on the USGBC Central Plains chapter as their Outreach/Events Chairperson and am in charge of the LEED training and materials for Turner's KC office. When I'm not at work, I enjoy spending time with my fiancé, Bryan, planning our wedding for September 2011, playing with our dog, Ryder, working out, going to sporting events, hanging out with friends, and traveling.

Daniels, Chris The Weitz Company
563-212-1642 5904 Thornton Ave.

elliott.scott.a@gmail.com saelliott@heery.com

I just recently finished up construction on the new Ankeny High School at Prairie Trail in Ankeny, Iowa in the spring '11 with Construction Services Inc. out of West Des Moines, Iowa. I have since been hired by Heery International out of Cleveland, Ohio as Construction Manager on the new Iowa Department of Corrections facility upgrade at ICIW in Mitchellville, Iowa. The project entails new

construction of a full-service hospital, food service building, administrative building, and a minimum/medium general population building. In addition, there will be an electrical distribution upgrade to service all old/new buildings onsite.

Olson, Nick EFCO Forms
1425 W Grand Ave. 250 S. Northwest Hwy.

319-415-4239 847-825-3177
olsonnickm@gmail.com nick.olson@efcoforms.com

Working out of the EFCO Chicago district office, consulting and distributing concrete formwork and shoring throughout the greater Chicago area, Wisconsin, and the upper peninsula of Michigan. Enjoy living in Chicago, trying new things, attending the various events, and watching the White Sox lose to the Twins when they're in town. It's been great watching fellow ConE grads as they being their careers, including our Chicago district engineer Joben Grimmus (ConE 2008). EFCO has a strong relationship with Iowa State and the construction engineering program and since graduating, I have had the opportunity to participate in student visits to our facilities in Des Moines, guest lecturing on campus, and recruiting at the career fair. It's always great to get back on campus, looking forward to football games in the fall.

peter.cade@vikingsprinkler.us

It's been almost exactly a year since we graduated and I am starting to miss it! I didn't think I would ever say that. Currently I am working at Viking Automatic Sprinkler as a designer and project manager. I couldn't have asked to fall into a better career path. It has been a tough learning curve but I know it will pay off down the road. I never would have guessed I would have been given so much responsibility after only 9 months of being employed. It's a great feeling.

Working for an Industrial Contractor.

BS 2009

At the Senior Banquet(s), graduating seniors were asked to fill out a form that included their future plans and how they would like to be remembered. We have reprinted this information for those who gave us permission. Congratulations to the graduates!

Bowers, Ryan

Hobbies: Motorsports, work and construction related things.

Future plans: Get a job, start a family, pay off bills

How would you like to be remembered?: Hard working student.

Cassidy, Lucas

Hobbies: Fishing

Future plans: Work in Cedar Rapids @ Acme Electric Co. Hope to become a PM and start a family somewhere in Iowa.

How would you like to be remembered?: By the hole in the ceiling of the UDCC. I promise it was an accident.

Corcoran, Tim

Hobbies: Fishing, hunting, golfing

Future plans: Working in Omaha for Remlon, Inc.

How would you like to be remembered?: A good guy to be around who loves Construction Engineering.

Formanek, Brenton

Hobbies: Fishing, hunting, hiking, skiing

Future plans: Estimator at M.A. Mortenson in Chicago

How would you like to be remembered?: Hardworking and fun loving

Harder, Matt

Hobbies: Biking, fishing, snowboarding, frisbee golf

Future plans: I hope to get a job for a large contractor. I am going to get married in 2011 in Iowa. I would like to own my own contracting business in the future.

How would you like to be remembered?: As a hardworking student proud to graduate Iowa State in Construction Engineering.

Jensen, Alex

Hobbies: Sports (watching and playing), fishing, hanging with my posse

Future plans: Find a job soon – go back home and try to start own business, take over dads business.

How would you like to be remembered?: As a good friend and a good partner in class labs and groups.

Knudsen, Greg

Hobbies: Hunting, fishing, riding dirt bikes, sports, golf

Future plans: Looking for a job in the mountains

How would you like to be remembered?: A good person that worked hard and still was very personable and enjoyed having fun.

Loes, Joel

Hobbies: Golf, carpentry/woodworking

Future plans: Move to Albuquerque, NM with my girlfriend to work for Klinger Constructors as a Project Manager.

How would you like to be remembered?: As a hard worker and a good learner that always had a good joke to tell.

Nielsen, James

Hobbies: Basketball, snow skiing, piano, golf, hiking, outdoor activities, traveling.

Future Plans: Get a job, get married, and be extremely happy and successful.

How would you like to be remembered?: As someone who has a promising future because of my hard work. Also, someone who has tremendous pride in Iowa State University.

Norberg, Austin

Hobbies: Hunting, fishing, golfing

Future Plans: Working for Sedorff Masonry, Inc.

How would you like to be remembered?: For using the skills learned from the ConE program in my community.

Peterson, Luke

Hobbies: Playing golf, playing video games, and watching sports.

Future plans: Move to Denver, CO with my girlfriend to find a job.

How would you like to be remembered?: As a fund and hardworking student and a good friend.

Schlag, Megan

Hobbies: Anything outdoors, tennis, being with friends and family.

Future plans: Working for Pepper Construction in Chicago, IL.

How would you like to be remembered?: As a positive, friendly, and hard-working ConE student excited to graduate and start a new phase in my life.

Stickfort, Derek

Hobbies: Hockey, motorcycle riding, golf, video games, coaching.

Future plans: Join the Navy in the area of nuclear propulsion or the Sea Bees.

How would you like to be remembered?: As a good friend and hardworking team member.

Tipp, Terry

Hobbies: Sports and running

Future plans: Going back home and keep searching for jobs.

Weller, Kyle

Hobbies: Football, volleyball, snowboarding, swimming, etc.

Future plans: Either working for Turner Construction in Kansas City or NAVFAC in San Diego.

How would you like to be remembered?: As a hard working student who can work hard and have fun at the same time.

BS 2010

Adams, Casey

Hobbies: Hunting, work on cars, church activities.

Future plans: I start working for MODUS on December 20 as a Mechanical Engineer. My wife and I hope to purchase a home in the next year and begin a family in about 2 years.

Allen, Douglas

Hobbies: Hunting, fishing, exercising.

Future plans: Find full-time job, most likely marry my girlfriend after I have a job. Family I will try and stay close and stay in Mid-West.

How would you like to be remembered?: Person you can talk to, and will help out when needed. Team player, fair and honest.

Basara, Marc

Hobbies: Boating, sports, cooking, competitive shooting, traveling.

Future plans: Project Engineer at Weis Builders in Minneapolis. I will also be attending graduate school at the University of St. Thomas, in the Twin Cities, to pursue a M.S. in real estate and development.

How would you like to be remembered?: By the level of enjoyment I had from learning with my friends, and my enjoyment of the program. Not to mention my overall awesomeness.

Bassett, Claire

Hobbies: Snowboarding, coaching First Lego League, reading, traveling.

Future plans: Get a job and gain real world experience. Also, getting a pilot's license would be cool.

Berg, Michael

Hobbies: Camping, fishing, hunting, and traveling.

Bowden, Clark

Hobbies: Disc golf, cycling, restoring antique tractors.

Future plans: Work for JE Dunn as a superintendent trainer in Kansas City.

How would you like to be remembered?: A leader in the program who cared for his fellow students.

Cade, Peter

Hobbies: Boxing, fishing, working out, and relaxing.

Future plans: Still waiting for a job. I am excited to get settled and start a new life.

Claussen, Anna

Collier, Camron

Hobbies: Hunting, fishing, family.

Future plans: I want to work in Iowa so I can raise my son and any other future children in Iowa.

How would you like to be remembered?: I worked hard during school to keep a cum GPA above 3.0.

Collins, Ryan

Hobbies: Fishing, lifting weights, music.

Future plans: Pursue a career in infrastructure development in the energy market. I have a job with Black & Veatch come January 2011. I have interned with B & V the previous two summers.

How would you like to be remembered?: I like to work hard to get a job/assignment done and work hard to have a good time.

Cutler, Peter

Future plans: Currently I'm building decks and doing small private contracting work. I'm still

looking for work and hope to find something in the upcoming year.

Cutler, Scott

Hobbies: Outdoor adventure sports

Future plans: I'm hoping for a successful career in the industry.

How would you like to be remembered?: I would like to be remembered as a hard worker and a good teammate.

Davis, Austin

Hobbies: Playing and watching sports, golf, disc golf, movies, hanging out with friends.

Future plans: I am moving to St. Louis to work for Alberici Constructors in their General Building/Healthcare market.

How would you like to be remembered?: As a hardworking student who did good things for AGC and the ConE Department. Also as a guy who knew how to have a good time as well.

Davison, Alicia

Future plans: I will be getting married in Feb. 2011 and moving to Peoria, IL.

Fuller, Jake

Hobbies: Bicycling, nature, road trips, music, friends and family.

Future plans: Learning

Gerber, Ted

Hobbies: Basketball, golf, disc golf, tennis

Future plans: I have accepted a Sales Engineering position in Urbandale, IA. I will also be getting married after graduation and am looking forward to starting a family.

Goedken, Nick

Hobbies: Wakeboarding, running, ISU athletics, community service.

Future plans: Work for Walsh Group's National Building Group (federal work) and move around a lot. Would like to become involved in communities that I move to.

How would you like to be remembered?: A ConE concerned with the community who wasn't afraid to go out with friends on a weeknight.

Hafencher, Karl

Hobbies: Playing sports, guitar, small building projects.

Future plans: Acquire a full-time job within the construction industry. Currently looking in larger cities such as Chicago.

How would you like to be remembered?:

Hardworking and easy to get along with.

Hanus, Trevor

Hobbies: Woodworking, outdoors activities, skiing, sailing.

Future plans: Attend graduate school at Northwestern University for Structural Engineering.

Harriman, Benjamin

Hobbies: Fishing, hunting, outdoors

Future plans: I plan to have a career in the electrical estimating field. Eventually work up to project management area.

How would you like to be remembered?: I am a hard working student who has balanced work, school, being a member of the Story City volunteer Fire Dept., and friends and family throughout my career.

Hennessey, Austin

Hobbies: Golfing, fishing, being outdoors, traveling, hockey, spending time with family and friends.

Future plans: Currently going to be moving to Chicago and working for Pepper Construction Company. Live and work in Barrington, IL as an assisted project engineer/MEP coordinator.

Hilton, Jimmy

Hobbies: Golf, fishing, hunting, boating, watching ISU athletics.

Future plans: Working for Kiewit Underground in Omaha, NE. Will be starting by working in the office estimating and other activities for bids. No plans for a family now. I just want to grow my knowledge and career in construction.

How would you like to be remembered?:

Hopefully as a hard working student that liked to play hard also.

Jahnke, Matthew

Hobbies: Hunting, fishing, electrical wiring.

Future plans: Electrical Design Consultant for Bluestone Engineering.

Janechek, Mike

Hobbies: Woodworking, football, fishing, hanging out with friends.

Future plans: I plan to find a job with a Midwest based bridge contractor, being a project engineer or project manager. I also plan to settle down around the Iowa area.

Karns, Matthew

Future plans: I'm currently looking for full time employment.

How would you like to be remembered?: Hard worker, knowledgeable.

Kimsey, Keith

Hobbies: Family, old trucks, barbeque

Future plans: I want a great job with great benefits and I want to build a hot rod.

How would you like to be remembered?: I completed this program without ever living in Ames.

Klein, Jason

Hobbies: Hunting

Future plans: Find a job with a smaller company where I can become an integral part of the company, helping the company grow as I gain experience and responsibility within the organization.

Lane, Chad

Hobbies: Family, friends, construction, football, tailgating cyclones.

Future plans: Work in KC for SE Dunn Const.

Lewton, Matt

Hobbies: Friends

Future plans: unknown

How would you like to be remembered?: Wouldn't

Mathes, Jay

Hobbies: Habitat for Humanity, snowboarding, playing guitar, pool, basketball.

Future plans: Graduate school, Iowa State University, CCEE.

How would you like to be remembered?: Club oriented leader who was extremely competent and hard working. Often soft-spoken but always effortful.

McColloch, Mitch

Hobbies: Paintball, golf, hunting, fishing

Future plans: Work as a MEP design consultant.

Meyer, Brad

Hobbies: Snowboarding, wakeboarding, music

Future plans: Going to law school

Moss, Jacob

Hobbies: Guitar, canoeing, cross country skiing

Future plans: Unsure

Mulloy, Patrick

Future plans: Still looking for a job.

How would you like to be remembered?: Loved to help the younger students with anything and helped recruit people to ConE.

O'Grady, Rowdy

Hobbies: Hunting and fishing, spending time with family and friends, and working on the family farm.

Future plans: I would like to make an impact on the construction industry utilizing the knowledge and skills I have gained in the Construction Engineering program at Iowa State University.

O'Loughlin, Phillip

Hobbies: Wrestling, hunting, football

Future plans: Get a job working in Construction Management.

How would you like to be remembered?: I would like to be remembered as someone who finishes the job.

Olson, Nick

Hobbies: Fishing, snowboarding, motorcycles, volleyball, camping, movies, softball, tailgating for ISU football.

Future plans: Work with Efco Corp. in Chicago, IL.

How would you like to be remembered?: As someone who could always light up the classroom. A friend to each student and faculty member I was in contact with.

Pokorney, Mike

Hobbies: Hunting, fishing, woodworking, snowboarding.

Future plans: Return to MN, working for M.A. Mortenson as a field engineer.

How would you like to be remembered?: Hardworking, helpful, positive attitude.

Potthoff, Rachel

Quid, Ryan

Hobbies: Sports, music, woodworking.

Future plans: Hope to have a job in the near future and start a family once I am comfortable and established in my career.

Quiroga Cruz, Patricio

Hobbies: Reading, play soccer and swimming.

Future plans: Visiting family and then come back to the grad program.

How would you like to be remembered?: The oldest guy attending class at that moment. Everything is possible from different country and language.

Roberts, Ewatt

Hobbies: Reading, working and playing with my family, playing Facebook Scrabble.

Future plans: Currently seeking career employment, while guiding our oldest child through the college admissions process. Also, keeping our two youngest on the academic fast track.

How would you like to be remembered?: I would like to be remembered as a student that overcame his obstacles and completed the program on a high note.

Rosso, Christopher

Future plans: I plan to move back to Illinois to work for Exelon Nuclear in their Project Management Division.

Shabino, Ryan

Hobbies: Soccer Club, golf, biking, disc golf.

Future plans: Work for Kiewit Construction Company – The Underground District, in Portland Oregon as a Field Engineer.

Seibert, John

Hobbies: Hanging with friends, poker, video games, watching sports.

Future plans: Work for a company back home.

Sievers, Ryan

Hobbies: Traveling, athletics, and being outdoors.

Future plans: Structural Engineering at Iowa State University, graduating class of December 2011.

How would you like to be remembered?: Being heavily involved in Learning Community, Habitat for Humanity, DBIA, XLC, and other organizations around ISU.

Smith, Branton

Hobbies: Wood working, college sports, snowboarding.

Future plans: Working for Koester Construction in Des Moines, IA.

How would you like to be remembered?: Hard working and generally awesome.

Steffes, Nathan

Future plans: Building America one project at a time.

How would you like to be remembered?: I'm a great believer in luck and I find the harder I work, the more I have of it.

Taylor, Colton

Hobbies: Snowboarding, wakeboarding, motorcycles.

Future plans: I want to find a job that I love doing. Eventually I'll start a family here in Iowa. I want to be having fun.

How would you like to be remembered?: I would like to be remembered as fun-loving and open to new ideas.

Theulen, Taylor

Hobbies: Foosball, golf, playing bags

Future plans: I plan to find a job in the Construction Engineering field within the next three months. I will be starting a family in the near future with my girlfriend who has just graduated from Grandview University.

How would you like to be remembered?: A very dedicated student who helped others with their studies to better our educations. A person who loved to have a great time and is a true competitor in foosball.

Van Utrecht, Brian

Hobbies: Sports, riding 4-wheelers, skiing.

Future plans: Got married May 29, 2010. Still looking for a full time job, preferably in the Midwest.

Wiitanen, Stephen

Future plans: I will be working in Kansas City, MO with Turner Construction as a Field Engineer.

Wilks, Tanner

Hobbies: Buying tools to add to my personal DeWalt arsenal.

Future plans: Taken job as a Project Engineer OCCI, Inc. – Osage Constructors, Fulton, MO.

How would you like to be remembered?: Hard working, knowledgeable of heavy/civil projects, leadership oriented in the program and

extracurricular activities. Involved w/Peer Mentors program, AGC Cabinet, NAHB Cabinet, ASC Heavy/Civil Team Captain 2009.

Wolfe, Nathan

Hobbies: Frisbee golf, fishing and playing pool.

Future plans: Accepted an offer with Mass Electric Construction Company in Boston Massachusetts. Will begin in August of 2010. Mass Electric is an electrical specialty subcontractor (power plants, waste water plants, light rail).

How would you like to be remembered?: 18 months of Co-op experience with the Iowa DNR while graduating in 5 yrs. sustaining a 3.0 GPA.

Wolff, Nick

Hobbies: Boating, fishing, camping, sports, disc golf.

Future plans: Plan on making a name for myself in the Construction Industry, settling down with a wife and family as well as adding another St. Bernard to the group.

How would you like to be remembered?: Fondly.

Zaletel, Cole

Hobbies: Snowboarding, boating, golfing

Future plans: Searching for a project manager position in the Construction Industry. Someday settle down and start a family.

How would you like to be remembered?: A hardworking college student who gave 110% in everything I did. I lived my college experience to the fullest.

BS 2011

Anderson, Aaron

Hobbies: Hunting, fishing, firearms

Future plans: U.S. Navy Pilot, Officer Candidate School in August and flight school after that. Want a family someday. After Navy, start my own business.

How would you like to be remembered?: Knowledgeable about construction and always having good input. Hard working and good role model.

Bakkum, Ben

Hobbies: Reading, movies, music, sports, spending time with family and friends.

Future plans: Find a job, start a family, get my PE license.

How would you like to be remembered?: As somebody who always had something to complain about, but man was he right about a lot of things.

Catus, Ryan

Hobbies: Basketball, partying

Future plans: Move to Overland Park, KS for work with Black and Veatch. Most likely relocate a few times in the first 5 years then hopefully find someone to start a family with.

How would you like to be remembered?: As a good, honest, and respectful man.

Cleveland, Mitchell

Hobbies: Fishing, baseball, camping

Future plans: Currently took a position with Woodruff Construction. I hope to eventually move my family back to Dewitt in no more than 10 yrs. Currently have two boys – Maddox-3 and Grady-1.

How would you like to be remembered?: Hard working, never giving up.

Conkin, Jake

Hobbies: Sports, cheering on the Cyclones, watching the history channel.

Future plans: Just go where life takes me.

How would you like to be remembered?: To be remembered as a fun-loving guy who worked hard.

Conlon, Aidan

Hobbies: Soccer, snowboarding

Future plans: I plan on working for Kiewit Underground, getting a job, and continue being awesome at life.

Cronin, Scott

Hobbies: Running, biking, water sports, snowboarding

Future plans: I will be working in the construction industry somewhere in the Midwest.

How would you like to be remembered?: As an individual who considers others more important than myself, and is career oriented, practicing integrity and giving back to the community.

Dabrowski, Konrad

Hobbies: Weightlifting, playing pool, jazzercising

Future plans: Get a house, have a family, run the family business after getting full-time experience in the industry.

How would you like to be remembered?: Someone who can always put a smile on your face and make you laugh.

Dennis, Zachary

Hobbies: Outdoor activities, sports

Future plans: Working for Turner Construction after graduation. Getting married after graduation.

How would you like to be remembered?: Helpful, someone who you can count on.

Grewcock, Eric

Hobbies: Hunting, boating, fishing, Nebraska football

Future plans: I plan on working for Kiewit to start a lifelong career. I will be living in Denver, CO.

Horan, Bridget

Hobbies: Swimming, running, music, being outside

Future plans: I will be working for the next 2 years with an international Catholic development organization called Fidesco. My training will start in mid-July in France, and then I will be sent to a yet-to-be-determined country in South America, Africa, or Asia.

Hoskins, Scott

Future plans: Working for Cramer and Associates

How would you like to be remembered?: 2010-2011 AGC President, ASC team captain.

Hudyma, Wally

Hobbies: Outdoor activities, traveling

Future plans: Job in California. Learn the industry and become a valuable asset. Start a family.

How would you like to be remembered?: A person people were glad to know.

Johnson, Jake

Hobbies: Watching sports, music

Future plans: Working in Davenport, IA with Russell Construction.

How would you like to be remembered?: As a good guy.

Kabat, Erica

Hobbies: Running, playing sports, spending time with friends, being outdoors

Future plans: Married in July 2011, beginning a job with Power Construction as a Project Engineer in Chicago, IL. Obtaining my MBA the first few years out of college as a young professional.

How would you like to be remembered?: I would like to be remembered as a leader and role model that inspired younger ConE's to become involved.

Kaehler, Alex

Hobbies: Outdoors, snowboarding, biking

Future plans: Working in Minnesota.

How would you like to be remembered?: Hard working and Innovative Thinking. Very concerned with energy efficiency and buildings embodied energies.

Kataras, Peter

Hobbies: Volleyball, boating, sailing, biking, snowboarding

Future plans: I plan to start working for Black & Veatch starting July 2011 in Kansas City, I will be there for about a year than my goal is to get transferred to England, Portland, or South America. I hope to get married to my girlfriend before I get transferred.

How would you like to be remembered?: I would like to be remembered by my professional etiquette, my contribution to construction companies and my personal characteristics. A friend someone you can easily ask a question and know you are getting an honest answer.

Koloseus-Gagnon, Thomas

Hobbies: Hanging out with family and friends when I have free time.

Future plans: Apply to ISU M.B.A. Graduate program and graduate with a high G.P.A.

How would you like to be remembered?: I would like to be remembered as the student that learned he could accomplish anything that you set your mind on.

Lebler, Mike

Hobbies: Hockey, hunting, fishing, golf

Future plans: Play professional hockey in Austria.

Meyn, Austin

Hobbies: Athletics

Future plans: Project Engineer, JE Dunn Construction.

How would you like to be remembered?: "The Ping-Pong legend of Town Engineering".

Miller, Bridgette

Hobbies: Volleyball, running events, working out, tubing in the summer, messing with people in the Capstone room!

Future plans: Project Engineer with Plano-Coudon in Baltimore, MD.

How would you like to be remembered?: The girl who reminded Scott Hoskins he smelt like booze the entire last week of class! I'm going to miss Konrad,

Austin, Dave, Zach, Erica, Bailey, Lauren, Ryan, Brett, Max, Scott and Angela!!

Noteboom, Ryan

Hobbies: Hunting, fishing, farming, and watching sports.

Future plans: Work for Peterson Contractors, Inc., possibly do some hobby farming a few years down the road.

How would you like to be remembered?: As a fun-loving and dedicated student not hesitant to extend a helping hand to someone in need.

Owen, Thomas John

Hobbies: Competitive running, involvement in on- and off-campus clubs and committees, helping others through community service.

Future plans: Use my challenging job to help me become an employee of the management staff at my company; eventually start a family; living somewhere warm.

How would you like to be remembered?: I would like to be remembered as a guy who went against the odds to get where I did.

Prettyman, Jay

Hobbies: Building model airplanes

Future plans: Right after graduation I think I am going to join the family custom home-building business back home in Prior Lake, MN.

How would you like to be remembered?: As a classy guy who enjoyed his college experience.

Rinker, Ian

Hobbies: Sports, woodworking

Future plans: Find a job and start a family.

How would you like to be remembered?: ISU ConE.

Shaw, Jacob

Hobbies: Hunting, fishing, woodworking

Future plans: Graduate school at Iowa State University.

Roderick, Chris

Hobbies: Hanging out with Jake Johnson

Future plans: Work in Cedar Rapids

How would you like to be remembered?: Favorably

Rohde, Angela

Hobbies: Playing sports and spending time with family and friends.

Future plans: After graduation, I will be moving to Kansas City to start working for Turner Construction in June. Then on August 27 I will be getting married in Omaha to my best friend.

Eventually we plan to start up our own business.

How would you like to be remembered?:

Someone you can rely on.

Thevenot, Guy

Hobbies: Hockey, golf, construction, technology

Future plans: Co-owner/General Contractor with Veritas Systems Construction in St. Joseph, Missouri. Volunteer coach with minor hockey in St. Joseph, Missouri. Planning to start a family in the near future.

How would you like to be remembered?: A hard-worker that goes above and beyond; someone that steps up and takes the leadership role; someone who is successful in all he does.

Van Drew, Mike

Future plans: Get a job, start a family

How would you like to be remembered?: Hard working, good teammate, enjoyed college.

Vos, Jaden

Hobbies: Watersports, motorcycling, classic cards, snowmobiling

Future plans: I plan to begin my career at Pella Corporation and continue to farm.

How would you like to be remembered?: As a diligent, respectful, hard worker.

Warning, David

Hobbies: Golfing, woodworking, ping pong

Future plans: I plan to work for M.A. Mortenson Company in Minneapolis, MN, and will be getting married during the summer of 2012.

How would you like to be remembered?: For my leadership throughout the ConE program and someone always willing to help others. I would also like to be remembered for my work in continuing to build the NAHB student chapter.

Class Lists

The 1997 Masters graduates

Bryan Cawley, Todd Sirotiak

The 1997 Doctoral graduate

Famararz (Fred) Rahbar

The 1998 Bachelors graduates

Karmyn Babcock, Dan Baxter, Jennifer Bleigh, Nicole Buscher, Adrienne Cline, Josh Coppes, Clayton Cabbage, Aaron DeCamp, Jason DeStigter, Dale Drent, Dale Even, Aaron Gordon, Jeff Hammer, Matthew Harrington, Charlie Harris, Tyler Harris, Rodney Hintz, Marc Hughes, Matt Jepsen, Dan Keagle, Ryan Kipp, Ryan Krogstad, Chris Krumwiede, Ann Larson, Chad Layland, Mario Leuzzi, Kevin McClain, Greg Mitchem, Ryan Moore, Shawn Moser, Luke Naughton, Brent Nielsen, Corey Nook, Cole Philips, Casey Port, Dan Pottratz, Jason Rechkemmer, Brandon Reynolds, Jamie Rich, Jennifer Rusk, Matt Ryan, Frank Sarno, Alisha Schmitz, Jonathan Schiefer, Brian Shattuck, Eric Sill, Stacy Slater, Chris Smith, Matt Smith, Chris Stewart, Mark Stoller, Holly Streeter-Schaefer, Khim-Leong Tan, Craig Tobin, Chad VanRheenen, Steve Watson, George White, Darrin Wirt, Kirk Wischmeyer, Jon Wolff, Han-Meng Woo, Siew-Chin Yeong

The 1998 Masters graduates

Ahmed Al-Hammadi, Serhan Celik, Brian Ellsworth, Chris Nelson, Steve Pigneri, Khim-Liong (Lawrence) Tan

The 1999 Bachelors graduates

Jeff Andrews, Ken Bronson, Greg Burda, Cheryl Carlson, Kevin Charlson, Brandon Christiansen, Rich Clark, Jeremy Cortesio, Brian David, Andrew Earhart, Steve Edwards, Aron Frakes, Brian Gaul, Azmi Khozi,

Tara Gleason, Cortney Graber, Matt Gumm, John Halloran, Matt Hamilton, Mike Harryman, Tara Henson, Steve Heyne, Corey Higgins, Shawn Holmes, Aaron Homan, Todd Kamp, Travis Kock, Travis Kuehner, Scott Kutchen, A.J. Loss, Ben Lovin, Chris McNamara, Aaron Miller, Matt Miller, Rich Montague, Sam Nanfито, Vijay Narayanan, Michael Nelson, Ryan Nelson, Garrett Nordyke, Katie Pacholski, Jeff Penning, Tracy Petricka, Quentin, Platt, Jason Schuster, Dustin Schwake, Aimee Seivert, Dave Smith, Jenny Spence, Darin Stevenson, Ted Teegarden, Brian Teeters, Jamella Tolbert, Tim Tometich, Jason Vorwald, Wing-Kei Wong, Alicia Worden

The 1999 Masters graduates

Matt Fagen, Branden Stephan, Siew-Chin Yeong

The 2000 Bachelors graduates

Derik Aido, Jon Altes, Chad Bassman, Travis Benson, Jamie Beyer, Vanessa Brandt, Mike Callahan, Adam Cameron, Chris Dudding, Hudsadin Eamsherangkul, Todd Edsall, Judith Ehmer, Todd Friemel, Melony Gibbs, Steve Golumbeck, Brian Hedgren, Ryan Heier, Matt Hillis, Robert Hostetler, Brandon Jones, Eric Kaufman, Nathan Kirstein, Jeff Knepper, Emily Kunz, Hoon-Hong Lee, Mark Leusink, Andy Lundy, Todd Majeres, John Maranowicz, Jeffrey Martin, Mike McCoy, Matt McKinney, Jon Merk, Ben Merta, Valarie (Bullard) Meyer, Katie Minter, Stephanie Morrison, Adam Papesch, Ryan Peterson, Pat Prediger, Matt Proctor, Dominic Punelli, Nate Purdy, Chad Rafoth, Matt Ralston, Lindsay Sauer, Ross Schaefer, Ron Stafford, Dave Swies, Bruce Timmons, Paul Tremmel, Brandon Valdez, Jay Wavering, Eric White, Jason Willis, Nick Wolf, Hannah Woledge

The 2000 Masters graduates

Karmyn Babcock, Judith Ehmer, D.H. Gabriel Lau, Chun Li, Iwan Pribadi, Hernando Quintero, Jeff Stewart

The 2001 Bachelors graduates

Heather Adams, Ben Bruns, Heather Burns, Chris Clausen, Scott DeYoung, Charles Dyxin, Dave Flemmer, Chad Goddard, Ben Golding, Kasey Harken, Corey Harms, David Herrema, Travis Hodapp, Kevin Hodgson, Megan Hurd, Brian Irlbeck, Jaquelyn Junginger, Lee Kaiser, Nic Kaminski, Angela Kelly, Jeff Knutsen, Adam Kouri, Chris Krieg, Scott Kueter, Matthew Larson, Celeste Lewis, James Lutter, Andrew Manatt, Ryan May, Ibrahim M'Bbapanza, Jason Miner, Rik Myhre, Steve Nelson, Brian Overbaugh, Dave Peterson, Ross Piper, Brian Pittman, Kyle Rahe, Jon Richardson, Nic Riesenberg, Meaghan Ryan, Rodney Sanders, Jeff

Scandrett, Dale Schwager, Andy Smith, Loren Snyder, Shamus Stephens, Justin Strahan, Craig Streit, Barry Sullivan, Aaron Toney, Elizabeth Valdez, Jonathan Vandekrol, Matt Vander Pol, Matt Vanheiden, Krista Viet, Tim Vogel, Kevin Walker, Jason White, Rory Wiebel, Elizabeth Wood

The 2001 Masters graduates

Ozdemir Cetin, Tarek Elmisalami, Zhili Gao, Dongying (Judy) Jiang, Cynthia Patterson, Syuin-Chet Tee

The 2001 Doctoral graduate

Tarek Elmisalami

The 2002 Bachelors graduates

Casey Ackermann, Nicholas Aldrich, Jeffrey Austin, Adam Boelman, Kyle Bolejack, Alex Bonzer, Timothy Bouska, Douglas Bristol, Timothy Callahan, Luke Czerwinski, Russell Dodson, Josh Dooley, Christopher Doyle, Alan Elder, Jason Engel, Phillip Engler, Darwis Fensury, Nicholas Ford, Brandon Frideres, Gretchen Frietsche, Aaron Garner, Jonathan Hand, Michael Hazel, Edward Heggen, Kelly Henderson, Joshua Hermsen, Peter Huey, Matthew Jesson, Erik Johansen, Kevin Kain, Issa Karadsheh, Kathleen Kies, Bradley Klinkefus, Christopher Kreftmeyer, Melissa Leek, Nicholas Leimer, Terry Leonard, Bradley Linman, David McLatchie, Theodore Meiners, Paul Meyer, Elizabeth Monaghan, Wesley Murdoch, Michael O'Connor, Adam Pfab, Adam Petersen, Brian Pollock, Yiendra Porayouw, Aaron Ripple, William Roozenboom, Michael Schaefer, Rolando Schrupp-Rivero, Brandon Schulte, Shadrach Spora, Jamie Stanley, Diane Strawn, Joseph Strub, Bradley Sullivan, Don Swanson, Matthew Thompson, Cynthia Twedt, Brian Van Arendonk, Jaron Vos, Jason Wells, Jason Wiener, Matthew Wiener, Tim Williams, Adam Wood

The 2002 Masters graduates

Jamie Beyer, Dong Chen, Aldona Jelinek, Melissa Leek, Jingxi (Cece) Li, Lifeng Li, Michael McArtor

The 2003 Bachelors graduates

Zachary Allen, D Bradley Barickman, Joseph Beumer, Nathan Blomme, Adam Boeckmann, Matthew Bosman, Tylor Bottorff, Phillip Burgmeier, Brant Carr, Nicholas Carter, Ryan Cheeseman, Justin Clausen, Chad Coalbank, Edward Cox, Barry Determan, Isaac Drew, Eric Farley, Jodel Fesenmaier, Brian Fliehler, Nathan Franje, Tony Fucinaro, Cory Gapstur, Nathaniel Hagberg, James Hapke, Nathan Harty, Michelle Heikens, Derek Hemphill, Joshua Herman, Perry Hines, Sarah

Homan, Benjamin Hott, Hilary Jensen, Quincy Jones, Brian Kacmarynski, Nicholas Kopp, Brad Kunz, Justin Lechtenberg, Ryan Llewellyn, Alan Manyin, Julie Martin, Jennifer McMinemee, Walter Nashert IV, Cheri Nordstrom, Nicholas Obbink, Ananto Prasetyo, Joseph Prosek, Tyler Raun, Phillip Ross, John Ryan, Scott Schifftlett, Joel Schimmer, Kyle Schott, Korey Schroeder, Grant Sjostrom, Adam Smith, Eric Soenksen, Joshua Staudt, Nathan Summers, Cody Tacke, Joseph Tripp-Rieks, Edna Vazquez, Matthew Van Loon, Ryan Weller, Michael Wolfe, Yew-Choong Wong, Christopher Wood, James Young, Jr

The 2003 Masters graduate

Mauricio Arbelaez, Stephen Frank, Jacob Thorius

The 2004 Bachelors graduates

David Audino, Nurhidayah (Hida) Azmy, Anthony Bernhard, Brian Bishop, Matthew Bockes, Brent Boots, Justin Brown, Nathan Burgod, Rusty Chamberlain, Andrew Cilio, Michael Clayburg, Alexis Coen, Kassi Colman, Melissa Conley, Eric Cowles, Timothy Davis, Ross Dix, Ryan Edwards, Benjamin England, Ariana Wright Gleisberg, Justin Grager, Anthony Grieser, Angela Guggisberg, Ryan Hawkins, David Hayek, Jacob Hotchkiss, Jason Hulsebus, Sarah Hundley, Jared Jones, Ryan Kauffman, Brett Ketelsen, Bradley Kruse, Mark Lee, Louisa Lorensen, Craig Montz, Jordan Muller, Andrew Munsch, Thomas Osier, Joshua Payne, Leslie Peterson, Matthew Madison, Clinton Rhoads, Jason Romero, Anthony Scully, Donovan Smith III, James Smith, Russell Smith, Mark Snyder, Daniel Solem, James Sparks, Hui-Tong Su, Thomas Swinning, Peter Taylor, Richard Tucker, Sara Van Roekel, Shane Weis, Brian Wessels, Alan White, Nicholas Darrell Williams, Nicholas David Williams, Geoffrey Zehnder.

The 2004 Masters graduates

Kiran Ankanahalli-Shivaram, Jin-Wook Chung, Manop (Lim) Kaewmoracharoen, Seonghoon Kim, Deepak Makarla, Tolga Meco, Mary Rukashaza, Diane Strawn

The 2004 Doctoral graduates

Augusto Canales, Zhili Gao

The 2005 Bachelors graduates

Mark Anthony, Brian Blank, Michael Boettcher, Scott Borgerding, Benjamin Bunge, Richard Corcoran, Brian Crow, Jamie Crubaugh, Jeffrey Elkins, Justin Fisher, Gareth Fleischer, Andrew Grubb, Steven Halverson, Julie Halvorson, Joseph Harris, Matthew Hornibrook, Eric Jestrab, Minas Kavallieros, Brian Klemme, Nicholas

Lauters, Kerry Megraw, Tyler Meyerholz, Kent Mickelson, Joshua Miltenberger, Tyrel Murray, Justin Olson, Cliff Plymesser, Jeffrey Quinn, Michael Richardson, Bryan Sandvig, Clifford Schafer, Kirt Schmidt, Dominique Selgrade, Joshua Thrap, William Treasure, Brett Walker, Chad White, Gary Wickerling, Luke Wilgenbusch, David Wilson, Crystal Wojtysiak

The 2005 Masters graduates

James Nelson, Hariharan Pattabhi Seetharaman, Cliff Plymesser, Nolan Raadt, Edna Vazquez, Nicholas Williams, Zheng Zhong

The 2006 Bachelors graduates

Stephen Ahlers, Anthony Alleman, Robert Amundson, Nicholas Andera, Jerad Andersen, Nicholas Andersen, Nicholas Bement, Jason Bersch, Anastasia Bitker, Jason Brekken, Russell Bollig, James Bowers, Josh Braby, Aaron Brace, Carl Brush, Aaron Bunge, Joseph Butler, Scott Cornelius, Michael Cramer, Kenneth Dittus, Jonathan Doll, Case Doorn, Ryan Drapeaux, Philip Emanuel, Anthony Erickson, Ryan Ferris, Curt Gillum, Glen Gleason, Ryan Haaland, Ryan Hackenmiller, Richard Harris, Scott Hildebrand, Chad Hotovec, Jake Humphreys, Eric Johnson, Derek Juhl, Jamie Knox, Jacob Kress, James Kurth, Benjamin Lehan, Jonathan Lewton, Kevin Lind, Tyler Manker, James Matzinger, Patrick McClain, Ryan McGuire, Jeffrey McKee, Peter Mercuris, Nathan Mittag, Jeffrey Moellers, Craig Montgomery, Adam Nelson, Lincoln Nichols, Dustin Nordell, Matthew Olberding, Nels Overgaard, David Parr, Zachary Peterson, Joshua Pick, Nathan Pilcher, David Rahe, Tyler Ramaekers, Eric Rasmussen, Gina Riesberg, Nicholas Rivera, Chad Schmidt, Bradley Schoch, Daniel Seiler, Jonathan Shepherd, Aaron Smith, Derek Snead, Andrew Stoulil, Luke Strahan, Brett Templeton, Nicholas Tjaden, Justin VanCoughnett, Andrew Wagner, Dustin Waters, Colin Waits, Cole Weaver, Arlo Wiczorek, Michael Woolley

The 2006 Masters graduates

Nathaniel Hagberg, Eric Jestrab, James Tometich

The 2006 PhD graduate

Dong Chen

The 2007 Bachelors graduates

Matthew Barchman, Brian Boekholder, Nicholas Caratelli, Lucas Clausen, Adam Clemons, Brad Corkrean, Adam Dillavou, Adam Douglas, Lee Ebel, Jason Eveland, Christopher Fredericksen, David Frischmeyer, Daniel Frohardt, Joshua Gaube, Wayne Gordon, Rondal Hale, Brandon Halsey, Samuel

Hoffman, Jesse Howe, Ashlynn Hunter, Kakeru Iikubo, Kelsey Johnson, Aaron Kendall, Thomas Kinsinger, Jason Knipp, Andrew Kobusch, Kisten Koch, Klint Kruse, Jessica Kunding, Anthony Latoria, Eric Lindquist, Caleb Lyon, Tyler Mark, Jerry Mihovilovich, Geoffrey Miller, Kyle Mueller, Jonathan Nack, Jacob Nollin, Kelsey Peverill, Eric Poland, Clifton Rhoads, Andrew Rotta, Casey Schafbuch, Christopher Schweers, John Seidl, Tyler Sparks, Zachary Steffen, Gabriel Stofferahn, Mark Sullivan, Christopher Thennes, Richard Trower, Nicholas Veldman, Benjamin Verdon, Andrew Vogel, John Vonnahme, Lucas Wall, Adam Ward, Daniel Ward, Matt Weller, Jesse Werner, Joshua Wiederholt, Brandon Wollery, Douglas Woolever, Benjamin Wright, Carl Zeilger

The 2007 Masters graduate

Mayur Bisani, Cole Landau, Darren McWhirt

The 2008 Bachelors graduates

Randall Andrews, Loren Bouchard, Adam Brainerd, Michael Christy, Shawn Corey, Shawn Culhane, Dustyn Curran, Adam Drake, Scott Ewell, Vincent Fadden, Zachary Finch, Jonathon Gapinski, Robert Greiner, Troy Greve, Michael Hameister, Jacob Harris, Brian Harry, Amanda Hausman, Matthew Haverkamp, Samuel Heinselman, Kevin Heisdorffer, Matthew Hendrickson, Anders Hurd, Justin Jackson, Renoj Jacob, Timothy Jennett, Brian Johnson, Derrick Jungers, Ben Kruse, Grant Lovin, Zachary Loy, Matthew Luck, Lemuel Mamuya, Lee Marbach, Joshua Markel, Aaron Martens, Cory McDermott, Tyler Millard, Jason Moritz, Andrew Norton, Katie Olson, Ryan Paul, Paul Pestel, Andrew Petersen, Bruce Pomerleau, Kelsey Powell, Cole Qualheim, James Rhynas, Drew Roberts, Paul Roggenbuck, Robert Rypma, Bryan Schmidt, Gregg Schmidt, Garrett Schroeder, Scott Schurman, Matthew Schwark, Robert Scott, Andrew Siegrist, Jeffrey Soseman, Edward Sowder, Jesse Spain, Mitchell Stoulil, Brian Streeper, Brian Sullivan, Jeffrey Theis, Robert Tiedeman, Seamus Turnbull, Jon Van Erkel, Cody Weber, Joshua West, Thomas Wetmore, Joshua Wise, Dustin Worthington, Adi Zhuravel, Alexander Zikra

The 2008 Masters graduates

Mohammed Al Qady, Asish Seeboo

The 2008 PhD graduates

Islam El-Adaway, Todd Sirotiak

The 2009 Bachelors graduates

Luke Barnum, Anthony Blasco, Ryan Bolinger, Sean Brummer, Noemi Calderon, Christopher Daniels, Nicholas Dekovic, Hermes Diaz, Jeremy Edmondson, Alex Egeland, Scott Elliott, Michael Grim, Joben Grimmus, Kyle Grunder, Nathan Hamm, Christopher Heemstra, Michael Hopp, Samuel Jennett, Erik Johansen, John Kelly, David Kubik, Matthew Larsen, Luke Miller, Ryan Peterson, Jeffrey Peterson, Eric Peterson, Brian Phipps, Ryan Pigneri, Garrett Plotts, Edward Predl, Derek Rehm, Brian Steffens, Landon Streit, Daniel Stukenholtz, Jerry Van Oort, Frederick Chase Westercamp, Scott Williams.

The 2009 Masters graduates

Aaron Brncich, Cory McDermott

The 2009 PhD graduates

Manop (Lim) Kaewmoracharoen, Tarek Mahfouz

The 2010 Bachelors graduates

Douglas Allen, Marc Basara, Claire Bassett, Michael Berg, David Boulanger, Clark Bowden, Peter Cade, Anna Claussen, Camron Collier, Ryan Collins, Scott Cutler, Peter Cutler, Luke Daugherty, Austin Davis, Alicia Davison, Marko Dostanic, Laura Ellis, Jake Fuller, Ted Gerber, Nicholas Goedken, Karl Hafencher, David Hanks, Trevor Hanus, Benjamin Harriman, Austin Hennessey, Jimmy Hilton, Matthew Jahnke, Michael Janechek, Matthew Karns, Keith Kimsey, Jason Klein, Jonathan Klemm, Chad Lane, Brian Leitch, Matthew Lewton, Andrew Lowthorp, Jay Mathes, Mitchell McCulloch, Ryan McGreger, Anthony Meinke, Brad Meyer, Brandon Montgomery, Jacob Moss, Michael Moyer-Rowley, Patrick Mulloy, Brandon Nanke, Boyd Netley, Arren Nguyen, Phillip O'Loughlin, Rowdy O'Grady, Nick Olson, Bradley Paulsen, Michael Pokorney, Rachel Potthoff, Blake Pratt, Ryan Quid, Patricio Quiroga Cruz, Ewatt Roberts, Nicholas Roberts, Christopher Rosso, Matthew Schultz, Michael Schupbach, Johnathan Seibert, Ryan Shabino, Ryan Sievers, Branton Smith, Nathan Steffes, Nathaniel Stevenson, Colton Taylor, Taylor Theulen, Andrew Tribble, Brian Van Utrecht, Matt Warner, Steve Wiitanen, Tanner Wilks, Nathan Wolfe, Nicholas Wolff, Matthew Zaletel

The 2010 Masters graduates

Larry Cormicle, Kevin McLain, John Owens, Jainarine Ramkumar, Ali Satar Ali Aleksandr Sergek, Elizabeth Thoma, Tong Wang, Aaron Zutz

The 2011 Bachelors graduates

Aaron Andersen, Benjamin Bakkum, Luke Bowdish, Ryan Catus, Mitchell Cleveland, Jacob Conkin, Aidan Conlon, Scott Cronin, Konrad Dabrowski, Zachary Dennis, Christopher Engelstad, Eric Grewcock, Kenneth Gutowski, Wesley Hinnah, Bridget Horan, Scott Hoskins, Walter Hudyma, Cory Jacobs, Jacob Johnson, Erica Kabat, Alexander Kaehler, Peter Kataras, Thomas Koloseus-Gagnon, Kevin Leavitt, Michael Lebler, Bailey Marlow, Sasha Mecham, Austin Meyn, Brett Miller, Bridgette Miller, Adam Mueller, Nimota Nasiru, Ryan Noteboom, Thomas Owen, David Parr, Jay Prettyman, Derek Prouty, Joey Rains, Shea Ridge, Ian Rinker, Christopher Roderick, Angela Rohde, Eric Sanders, Marcus Seden, Jacob Shaw, Philip Sidles, Creighton Stifel, Guy Thevenot, Michael Van Drew, Jaden Vos, David Warning, Brian Watson, Robert West, Lauren Wiest

The 2011 Masters graduates

Bradley Kruse
