

Social Sciences and Humanities Electives for Civil Engineering

2022-2023 Catalog

Requirements

Students in the civil engineering (CE) program must take at least 12 credits of social sciences and humanities (SSH) electives satisfying the following requirements:

- The University requires students to take three credits designated as International Perspectives (IP). Those courses on the list below marked with ¹ are designated as IP courses.
- At least 3 credits must come from the University's list of U.S. Diversity (USD) courses.
- The remaining courses must come from the courses below or USD courses.
- At least 6 credits must be at the 200 level or above.
- The total must be at least 12 credits even if either the IP or USD requirement is waived.

In 2016 the CE Curriculum Committee approved the following: "Foreign Language: Accept all courses in Arabic, Chinese, French, German, Greek, Latin, Russian, Spanish, except grammar and composition in the student's native language(s)".

Rationale

The SSH requirement aims to give CE students an opportunity to broaden their perspectives beyond what the math, science, and engineering courses can provide. For example, ABET, the organization that accredits engineering programs, requires that students have "the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context". The CE program believes that students with such a broad education will be better engineers.

Other approved courses

Be sure to check the 2022-2023 Catalog for prerequisites.
